GOV
DOC.

A note to Review readers

In this issue of the Review you will notice a number of changes. The most evident is the new numbering system for the statistical tables; the former cardinal number system is being replaced by an alphanumeric system. Also, the order of the tables is slightly different and each group of tables is designated by its own letter prefix. Please consult the list of tables on pages S16-S20 for the tables you use frequently.

In addition, some of the tables have been changed. Table E3 on residential mortgage credit has been added. This new table shows the amount of the residential mortgage holdings of various types of lending institutions, which formerly could be found only on the balance sheets of the respective groups of lenders. The tables on merchandise trade have also undergone some changes. These changes, which are designed to show, where possible, the trade data on a balance of payments rather than a customs basis, are explained in the Technical note published on pages 17-28 of this issue of the Review. In addition, the series on the current account of the balance of payments in Table J2 and all the tables on merchandise trade except for J10 and J11 (merchandise trade on a customs basis) are now presented on a seasonally adjusted basis.

Table 47, which presented the assets and liabilities of Canadian financial institutions affiliated with foreign banks, had not been updated since January 1982 as almost all these institutions received charters to become Canadian banks after the change in the Bank Act in 1980 and are now included in the banking data. This table has therefore been dropped.

Avis aux lecteurs

Vous verrez à la lecture du présent numéro de la Revue qu'un certain nombre de changements ont été apportés à cette publication. Le plus manifeste de ces changements réside dans le remplacement de l'ancienne numérotation des tableaux statistiques par un mode d'identification alphanumérique. L'ordre des tableaux a également été légèrement modifié et chaque série de tableaux est identifiée maintenant par une lettre différente. Pour repérer les tableaux que vous utilisez souvent, veuillez vous référer à la liste des pages S16 à S20.

Par ailleurs, on a modifié certains tableaux et on en a ajouté un, le Tableau E3, qui porte sur les prêts hypothécaires à l'habitation. Ce nouveau tableau contient les chiffres des prêts hypothécaires à l'habitation accordés par les différentes catégories d'institutions financières, chiffres qu'on ne pouvait trouver jusqu'ici qu'aux bilans des institutions concernées. Les tableaux de la balance commerciale ont également subi certaines modifications qui visent, dans la mesure du possible, à présenter au public des données du commerce extérieur produites, non sur la base des statistiques douanières, mais sur la base de la balance des paiements. Ces changements sont expliqués dans la note technique publiée aux pages 17-28 de cette livraison de la Revue. En outre, vous trouverez maintenant des données désaisonnalisées de la balance commerciale dans les tableaux du commerce extérieur; toutefois, les données des Tableaux J10 et J11 (balance commerciale sur la base des statistiques douanières) ne sont pas corrigées des variations saisonnières.

Le Tableau 47, qui montre la situation des institutions financières canadiennes affiliées à des banques étrangères, a été supprimé. Ce tableau n'avait pas été mis à jour depuis janvier 1982, car, après la modification de la Loi sur les banques en 1980, presque tous ces établissements ont obtenu le statut de banques canadiennes. Les chiffres qui s'y rapportent sont donc compris depuis lors dans les statistiques bancaires.

Cover:

Roman Imperial: Brass sestertius

In ancient Rome members of the emperors' families were often honoured by issues of coins bearing their portraits. This month's cover features a brass sestertius of the Empress Sabina, wife of Hadrian, Emperor of Rome from A.D. 117 to 138.

The grandniece of the Emperor Trajan, Sabina married Hadrian in A.D. 100 and although burdened with an unhappy marriage, Sabina and Hadrian became avid patrons of the arts. Hadrian founded the Athenaeum, an academy for scholars in Rome and built such architectural wonders as Hadrian's Wall in northern England and Hadrian's Villa at Tivoli in Italy. This interest in cultural pursuits was not restricted to the major visual and liberal arts. The coinage issued during this period also reflected the Imperial couple's artistic inclinations.

The coin shown on the cover is a prime example of the artistic excellence achieved in coinage portraiture during the second century. Under Hadrian, the harsh realism of earlier eras gave way to a softer, finer rendition of form based on Greek models. The delicate strands of hair and fine facial contours of Sabina's portrait reflect this development. Subsequent emperors adopted this new style and applied it to their coinage but, except for brief periods, Roman coins never really recaptured the grace of the Hadrianic issues.

The coin illustrated on the cover is somewhat larger than a Canadian nickel and is part of the National Currency Collection, Bank of Canada. Photography by James Zagon, Ottawa.

Couverture :

Rome impériale : Sesterce de laiton

La Rome antique honorait souvent les membres des familles impériales par des pièces de monnaie frappées de leur effigie. La pièce reproduite en page couverture est un sesterce à l'effigie de l'Impératrice Sabine, épouse d'Hadrien, qui fut empereur de Rome de 117 à 138 après J.-C. Petite-nièce de l'Empereur Trajan, Sabine épousa Hadrien en l'an 100 et, en dépit d'une union sans bonheur, les conjoints devinrent des mécènes passionnés. Hadrien fonda une académie pour les universitaires romains, l'Athénée, et fit réaliser des merveilles d'architecture telles que le Mur d'Hadrien dans le nord de l'Angleterre et la Villa Hadriana à Tivoli, en Italie. Le mécénat de la famille impériale ne se manifesta pas exclusivement dans les domaines des grands arts visuels. Les pièces de monnaie émises durant le règne d'Hadrien reflètent également les goûts artistiques du couple impérial.

Le sesterce reproduit en couverture illustre parfaitement le degré de perfection atteint par les portraitistes graveurs au II^e siècle. Sous le règne d'Hadrien, le réalisme brutal des années précédentes fit place à un art plus raffiné, inspiré des œuvres grecques. La délicatesse avec laquelle l'artiste a immortalisé la chevelure et les traits du visage de Sabine témoigne de cette nouvelle tendance. Après Hadrien, les empereurs romains conservèrent ce style pour leurs monnaies; toutefois, à l'exception de quelques brèves périodes, les pièces gravées à l'effigie des souverains ne purent jamais réellement rivaliser de finesse avec celles qui avaient été émises sous Hadrien.

Cette pièce est légèrement plus grande qu'une pièce canadienne de cinq cents et fait partie de la Collection nationale de monnaies, Banque du Canada. Photographie : James Zagon, Ottawa.

Monetary aggregates: Some recent developments

This article describes the recent behaviour of monetary aggregates in Canada, focusing on developments in the past year. An earlier analysis, which appeared in the December 1983 issue of the Review, traced the evolution of the various monetary aggregates over the previous three years. In this earlier article special attention was given to the financial innovations and technological developments that had affected the growth of the aggregates. Recent data suggest that the diverse movements of the aggregates documented earlier are still in evidence, particularly the very slow rate of growth of M_1 , and the strong upward movement of M_{1A} . The broader aggregates, M_2 and M_3 , which had been growing very much more slowly than total spending in the economy (GNE), have tended in the last year to return to growth rates closer to that of GNE (Chart I).

The narrower aggregates

In the last twelve months the divergence between the growth of M_1 and M_{1A} has become even more pronounced, with M_1 roughly unchanged while M_{1A} has grown by more than 18 per cent.* † Though both aggregates are designed to measure transactions balances of Canadian households and businesses, the differences in their composition have caused them to respond very differently to recent institutional changes and financial innovations.

In the past, movements of M_1 could largely be explained by changes in total spending in the economy (as measured by Gross National Expenditure at current prices) and short-term interest rates. Increases in both prices and the real volume of spending typically led to a rise in the quantity of M_1 balances that households and businesses chose to hold for transactions purposes. Increases in interest rates, on the other hand,

* M_1 is comprised of currency held by the public plus net demand deposits at chartered banks. M_{1A} is more inclusive and is defined as M_1 plus daily interest chequable savings deposits and non-personal notice deposits at banks.

† These figures are based on year-over-year growth rates calculated from the fourth quarter of 1983 to the fourth quarter of 1984.

Quelques aspects de l'évolution récente des agrégats monétaires

Le présent article contient un exposé du comportement récent des agrégats monétaires au Canada et traite surtout de l'évolution enregistrée au cours de l'année dernière. Il fait suite à l'article publié dans la livraison de décembre 1983, qui traitait de l'évolution des agrégats monétaires de 1980 à 1983. Cet article portait principalement sur les innovations financières et les progrès techniques qui avaient influencé la croissance des agrégats. Les dernières statistiques donnent à penser que les tendances divergentes observées dans le passé se maintiennent toujours, tout spécialement la croissance très lente de M_1 et la forte progression de M_{1A} . Les taux de croissance des agrégats au sens large, M_2 et M_3 , qui étaient beaucoup plus faibles que ceux de la dépense globale (DNB), ont eu tendance l'année dernière à revenir à des niveaux plus proches de ceux de la DNB (voir Graphique I).

Les agrégats au sens étroit

L'écart observé entre les taux de croissance de M_1 et M_{1A} s'est encore creusé au cours des douze derniers mois, M_1 se maintenant plus ou moins à un niveau stable tandis que M_{1A} augmentait de plus de 18 %*,†. Bien que ces agrégats soient tous deux conçus pour mesurer les encaisses de transaction des entreprises et des ménages canadiens, leur composition a fait qu'ils ont réagi de façon très différente aux changements d'ordre institutionnel et aux innovations financières que le pays a connus ces derniers temps.

Dans le passé, les variations de M_1 pouvaient s'expliquer dans une large mesure par des variations de la dépense globale (dépense nationale brute à prix courants) et des taux d'intérêt à court terme. En règle générale, les hausses de prix et l'augmentation de la dépense en termes réels provoquaient un accroissement des composantes de M_1 que les ménages et les entreprises utilisent pour effectuer leurs transactions. D'autre part, les relèvements des taux d'intérêt avaient pour effet d'attirer dans des comptes rémunérés des fonds qui étaient gardés sous forme d'espèces ou de dépôts à vue, ce qui ralentissait la croissance de M_1 . Ces dernières années, cependant, le ratio de M_1 à la DNB a subi une

* M_1 comprend la monnaie hors banques et le montant net des dépôts à vue dans les banques à charte. M_{1A} comprend, outre les composantes de M_1 , les dépôts d'épargne à intérêt quotidien assortis de droit de tirage par chèque et les dépôts à préavis autres que ceux des particuliers dans les banques.

† Ces taux de croissance sont calculés à partir de la moyenne du dernier trimestre de 1983 et de celle du dernier trimestre de 1984.

attracted funds out of currency and demand deposits, and into other, interest-bearing, instruments, thus slowing the growth of M_1 . In recent years, however, the ratio of M_1 to GNE has fallen much further than can be accounted for by the movements in interest rates (Chart II).^{*} Indeed, the discrepancy between the actual level of M_1 and what would have been anticipated on the basis of past relationships with spending and interest rates has widened almost continuously over the last three years. This downward tendency in M_1 reflects the sluggish growth of both of its deposit components: the personal chequing accounts of households and the current accounts of businesses.

In the case of households, the shift out of personal chequing accounts has been caused primarily by the introduction and rapid acceptance of daily interest chequable savings accounts (Chart III). These new accounts combine the chequing features of personal chequing accounts with the interest-paying characteristics of regular savings deposits. While some form of daily interest chequable savings account has been offered by all major banks since 1982, recent changes have made them increasingly attractive to households. The principal development in the past year has been the tiering of these accounts in most deposit-taking institutions. Thus, a low rate of interest is paid on balances below a minimum level (\$1,000 or \$2,000), a rate equal to that on daily interest non-chequable saving accounts is paid on balances between this minimum level and a higher level (generally \$3,000 or \$5,000), and a higher rate is paid on balances above this upper level. The latter rate has typically been equal to that paid on personal fixed-term deposits with short terms to maturity and is about two percentage points above the rate paid on the intermediate tier. These features have worked in the direction of converting the daily interest chequable savings account into an "all-in-one account", encouraging households to consolidate all of their transactions and savings balances into one account. The introduction and growing popularity of these accounts has resulted in a persistent shift out of personal chequing accounts.

The same general pattern has held for current accounts of businesses, although the outflow has been less dramatic (Chart III). The relatively high rates of interest available on alternative instruments, such as

baisse beaucoup plus forte que celle qu'on peut expliquer par l'évolution des taux d'intérêt (voir Graphique II)*. De fait, l'écart entre le niveau effectif de M_1 et le niveau prévu à la lumière de la relation observée dans le passé entre M_1 d'une part et d'autre part la dépense globale et les taux d'intérêt s'est accru presque constamment au cours des trois dernières années. Cette tendance à la baisse de M_1 traduit la lenteur de la croissance des deux types de dépôts qui entrent dans la composition de cet agrégat, à savoir les comptes de chèques personnels des ménages et les comptes courants des entreprises.

Pour ce qui est des ménages, les tirages faits sur les comptes de chèques personnels pour alimenter des comptes d'épargne s'expliquent principalement par la création des comptes à intérêt quotidien assortis de droit de tirage par chèque, qui ont connu dès le début un vif succès (voir Graphique III). Ces nouveaux types de comptes combinent les caractéristiques respectives des comptes de chèques et des comptes d'épargne ordinaires, soit le droit d'émettre des chèques et la rémunération du dépôt. Certes, toutes les grandes banques offraient depuis 1982 certaines formes de comptes d'épargne à intérêt quotidien assortis de droit de tirage par chèque, mais les dernières améliorations apportées à ces comptes les ont rendus de plus en plus attrayants. Le principal changement apporté à ces comptes l'année dernière a été la création d'une véritable structure de taux d'intérêt par la majorité des institutions de dépôt, avec un faible taux pour les soldes inférieurs à un niveau minimum (1 000 ou 2 000 dollars), un taux égal à celui des comptes d'épargne à intérêt quotidien sans droit de tirage par chèque pour les soldes compris entre ce minimum et un niveau plus élevé (généralement 3 000 ou 5 000 dollars), et un taux plus élevé pour les comptes dont le solde dépasse la limite intermédiaire de 3 000 ou 5 000 dollars. En général, ce dernier taux est égal à celui des dépôts à court terme et à échéance fixe des particuliers et il est supérieur d'environ 2 points de pourcentage au taux applicable aux dépôts de la catégorie intermédiaire. Ces nouvelles caractéristiques ont eu pour effet de convertir le compte d'épargne à intérêt quotidien assorti de droit de tirage par chèque en un compte «universel» et d'inciter les particuliers à y réunir toutes leurs encaisses de transaction et toutes leurs économies. La création et la popularité croissante de ces comptes ont entraîné des sorties constantes de fonds des comptes de chèques personnels.

En ce qui concerne les comptes courants des entreprises, il s'est produit un phénomène assez semblable à celui qui vient d'être décrit, mais l'ampleur des sorties de fonds a été moins spectaculaire (voir Graphique III). Les taux d'intérêt relativement élevés dont étaient assortis les instruments financiers comparables, notamment les dépôts à préavis, ont encouragé les entreprises à dégarnir leurs comptes courants. Parallèlement, les

* The relatively steep downward trend in the ratio of M_1 to GNE that one observes over the 1970-79 period reflects the combined influence of three factors: (a) a tendency for desired transactions balances to increase less than proportionately in response to changes in real income, (b) a general upward movement in interest rates, and (c) a shift out of current account balances caused by financial innovations during the period 1976-77. Notice that the M_1 /GNE ratio typically rose when interest rates fell and dropped when interest rates increased.

La tendance à la baisse relativement marquée du ratio M_1 /DNB qu'on observe sur la période 1970-1979 reflète l'influence combinée de trois facteurs : a) une tendance des encaisses de transaction désirées à augmenter moins que proportionnellement suite à des variations du revenu réel, b) un mouvement général à la hausse des taux d'intérêt, et c) des transferts de fonds effectués à partir des comptes courants par suite des innovations financières des années 1976 et 1977. Il convient de noter que le ratio M_1 /DNB a augmenté en règle générale lorsque les taux d'intérêt baissaient et qu'il a diminué lorsque les taux d'intérêt augmentaient.

non-personal notice deposits, have encouraged a shift out of current accounts. At the same time financial innovation led to an outright economization of transactions balances. More specifically, some innovations such as "concentrator" accounts and "on-line" cash management systems have allowed businesses to conduct their operations with much smaller working balances. Instead of promoting substitutions between instruments, these developments have produced permanent reductions in the cash demands of business.* The behaviour of current accounts suggests that the shift out of these accounts has continued at a steady pace over the past year as more businesses have taken advantage of the available opportunities to reduce the cost of holding working balances.

* A more detailed description of these innovations is contained in "Monetary aggregates: Some recent developments", Bank of Canada Review, December 1983.

innovations financières leur ont permis de réduire directement les encaisses de transaction. Ainsi, certaines innovations, comme les comptes «centralisateurs» et les systèmes informatisés de gestion des encaisses, ont permis aux entreprises de poursuivre leurs opérations avec des disponibilités de trésorerie considérablement réduites. Cette évolution n'a pas entraîné de simples déplacements de fonds entre les comptes mais des réductions permanentes de la demande d'encaisses des entreprises*. Le comportement des comptes courants laisse croire que les ponctions faites sur ces comptes ont continué à un rythme régulier au cours de l'année dernière car un nombre croissant d'entreprises se sont prévaluées des possibilités qu'elles avaient de réduire les coûts liés au maintien des encaisses de transaction.

L'agrégat M1A a d'abord été conçu comme une mesure plus large des encaisses de

* On trouvera une description plus détaillée de ces innovations dans l'article publié dans le numéro de décembre 1983 de la Revue sous le titre «Quelques aspects de l'évolution récente des agrégats monétaires».

Billions of dollars Milliards de dollars

Personal deposits
Dépôts des particuliers

Non-personal deposits
Dépôts autres que ceux des particuliers

*The measures of personal chequing accounts, daily interest chequable savings accounts and current accounts used in this article are net of cheques in the process of collection. Since these items in transit cannot be identified as belonging to personal chequing accounts, daily interest chequable savings accounts or current accounts, the rule used was to allocate the items in transit proportionately to the value of the three kinds of accounts.

*Les chiffres des comptes de chèques personnels, des comptes d'épargne à intérêt quotidien avec droit de tirage par chèque et des comptes courants cités dans cet article sont nets, c'est-à-dire qu'on en a déduit le montant des chèques en cours de compensation. Comme il est impossible de distinguer dans la masse des effets en compensation les chèques tirés sur les comptes de chèques personnels, ceux qui sont tirés sur les comptes d'épargne à intérêt quotidien assortis de droit de tirage par chèque et ceux qui sont tirés sur les comptes courants, le montant de ces effets a été réparti proportionnellement aux montants détenus dans ces trois types de comptes.

The aggregate MIA was originally constructed as a more comprehensive measure of transactions balances that encompassed most of the chequing balances that were being shifted out of M1 into other forms of deposits. However, the addition of daily interest chequable savings accounts and non-personal notice deposits appears on balance to have over-compensated for these shifts especially over the last few months. As a result MIA has recently grown much faster than one would have anticipated on the basis of the growth of total spending and movements in interest rates (Chart II).

This rapid increase in MIA can more easily be explained if one breaks down the aggregate into its personal and non-personal deposit components (Chart III). On the personal side it is evident that daily interest chequable savings accounts have attracted funds from sources other than the personal chequing accounts of households. Balances in personal chequing accounts have fallen by \$0.4 billion (11 per cent) in the last twelve months, while balances in daily interest chequable savings accounts have grown by more than \$6.3 billion (187 per cent). Clearly, there has been a significant inflow of funds into daily interest chequable savings accounts from other types of personal savings deposits, including perhaps personal fixed-term deposits. This inflow has in turn led to a large increase in the personal component of MIA (personal chequing accounts plus daily interest chequable savings accounts).

On the non-personal side some current account balances have shifted to non-personal notice deposits so that the total non-personal segment of MIA has grown somewhat more rapidly than its current account component in the last two years. Nevertheless the rate of growth of this segment has been significantly lower than what might have been anticipated on the basis of historical relationships with spending and interest rates. This slower growth largely reflects reductions in corporate transactions balances because of the cash economization activities described earlier.

Until about 1983, the strong growth in the personal segment of MIA approximately offset the relatively slow growth of non-personal deposits in MIA, making it appear that the aggregate had a stable systematic relationship with total spending and interest rates. More recently, however, the shift out of traditional savings deposits into daily interest chequable savings accounts has begun to dominate the movements of MIA, causing the aggregate to grow at a much faster rate than typically would have resulted from the movements of spending and interest rates.

transaction, qui récupérerait la plupart des fonds retirés des comptes de chèques comptabilisés dans M1 pour constituer d'autres types de dépôts. Tout compte fait, il semble toutefois qu'en ajoutant au nouvel agrégat les comptes d'épargne à intérêt quotidien assortis de droit de tirage par chèque et les dépôts à préavis autres que ceux des particuliers, on ait plus que compensé les incidences des déplacements de fonds, surtout depuis quelques mois. C'est pour cette raison que la croissance de MIA a été ces derniers temps beaucoup plus rapide qu'on l'aurait prévu à partir de la progression de la dépense globale et de l'évolution des taux d'intérêt (voir Graphique II).

Cette vive augmentation de MIA peut être expliquée plus aisément si l'on analyse séparément les dépôts des particuliers et les autres dépôts compris dans cet agrégat (voir Graphique III). Au chapitre des dépôts des particuliers, il est manifeste que les comptes d'épargne à intérêt quotidien assortis de droit de tirage par chèque ont reçu des fonds provenant de sources autres que les comptes de chèques personnels des ménages. Le solde des comptes de chèques personnels a diminué de 0,4 milliard de dollars (soit de 11 %) au cours des 12 derniers mois, tandis que celui des comptes d'épargne à intérêt quotidien assortis de droit de tirage par chèque augmentait de plus de 6,3 milliards de dollars (soit 187 %). Ces comptes ont donc reçu de toute évidence un volume considérable de fonds qui provenaient d'autres types de dépôts d'épargne personnelle, et peut-être même des dépôts à terme fixe des particuliers. Cet afflux de fonds a entraîné à son tour une forte augmentation des dépôts des particuliers faisant partie de MIA (soit les comptes de chèques personnels et les comptes d'épargne à intérêt quotidien assortis de droit de tirage par chèque).

Pour ce qui est des dépôts autres que ceux des particuliers, un certain volume de fonds déposés dans des comptes courants ont été placés sous forme de dépôts à préavis de sorte que la portion de MIA constituée par les dépôts autres que ceux des particuliers s'est accrue au cours des deux dernières années à un rythme un peu plus rapide que la portion constituée par les comptes courants. Le taux de croissance de cette composante de MIA a été néanmoins beaucoup plus bas que l'on aurait pu le prévoir à la lumière de la relation observée dans le passé entre, d'une part, l'évolution de cet élément et, d'autre part, celle de la dépense globale et des taux d'intérêt. Le ralentissement de la croissance de cette composante résulte en grande partie de la gestion plus efficace des encaisses de transaction des entreprises, dont il a été question plus haut.

Jusqu'en 1983 environ, la forte croissance de la portion de MIA constituée par les dépôts des particuliers a plus ou moins compensé la croissance relativement lente de l'ensemble des autres dépôts, ce qui laissait l'impression qu'il existait une relation systématique stable entre l'évolution de cet agrégat et celle de la dépense globale et des taux d'intérêt. Ces derniers temps, toutefois, les transferts de fonds des comptes d'épargne traditionnels aux comptes d'épargne à intérêt quotidien assortis de droit de tirage par chèque ont commencé à dominer les variations de MIA, portant l'agrégat à

The broader aggregates

The broader monetary aggregates, M2 and M3, have traditionally displayed much less sensitivity to movements in interest rates than have the narrow aggregates, as most of their component deposits are interest-bearing. Moreover, M2 and M3 have been less affected by financial innovations. Because of their broad coverage, they have effectively internalized many of the substitutions that have taken place among the various deposit categories. In addition, because of the much larger size of the broader aggregates, those reductions in transactions balances that resulted from cash economization have had proportionally less impact than in the case

augmenter à un rythme beaucoup plus rapide que celui qu'auraient normalement engendré les variations de la dépense et des taux d'intérêt.

Les agrégats au sens large

De tout temps, les agrégats monétaires au sens large, M2 et M3, ont été beaucoup moins sensibles aux variations des taux d'intérêt que les agrégats au sens étroit, car la plupart des dépôts qui en font partie sont productifs d'intérêts. De plus, M2 et M3 ont été moins influencés par les innovations financières. Étant donné que M2 et M3 couvrent un plus large éventail de comptes de dépôts, un grand nombre des transferts de fonds effectués entre ces comptes sont réduits à de simples déplacements au sein d'un même agrégat. De

Chart IV Growth rates of GNE and M2 and M3
Graphique IV Taux de croissance de la DNB, de M2 et de M3

of M1 and M1A. Therefore, M2 and M3 maintained a reasonably close relationship to GNE over most of the 1971-82 period (Chart IV). Since the fourth quarter of 1982, however, the broad correlation between these aggregates and GNE has weakened considerably.

M2

The aggregate M2 is defined as M1A plus other notice deposits and personal fixed-term deposits at banks. Although M2 followed the movements of total spending reasonably closely over most of the period since 1971, this positive relationship has all but disappeared since the end of 1982. Whereas the growth rate of total spending rebounded strongly in 1983 before moderating somewhat this year, the growth rate of M2 declined throughout most of the period and has only recently begun to recover.

This sudden break in the relationship between M2 and GNE can be explained in part by a shift in market shares, with deposits at banks

plus, à cause de la plus grande taille des agrégats au sens large, les réductions des encaisses de transaction qui ont résulté des nouveaux services offerts par les banques ont eu sur eux une incidence proportionnellement plus faible que celle qu'elles ont eue sur M1 et M1A. Il n'est donc pas surprenant que la relation relativement étroite entre M2 et M3 d'une part et la DNB d'autre part se soit maintenue pendant la majeure partie de la période comprise entre 1971 et 1982 (voir Graphique IV). Toutefois, depuis le dernier trimestre de 1982, cette relation s'est considérablement affaiblie.

M2

L'agrégat M2 comprend, en plus de M1A, les autres dépôts à préavis et les dépôts à terme fixe des particuliers dans les banques. Même si le comportement de cet agrégat a suivi d'assez près les variations de la dépense globale durant la plus grande partie de la période commencée en 1971, la relation positive entre M2 et la dépense globale a presque totalement disparu depuis la fin de 1982. Si la croissance de la dépense globale s'est nettement accélérée en 1983 avant de s'essouffler quelque peu cette année, le taux de

Deposit data for credit unions and caisses populaires have been estimated for 1984 Q3.

Les chiffres des dépôts dans les caisses populaires et les crédits unions utilisés pour le 3^e trimestre de 1984 sont des estimations.

growing somewhat more slowly than the higher-yielding deposits at competing institutions.* When personal deposits at trust companies, mortgage loan companies, credit unions and caisses populaires are added to M2, the resulting aggregate, M2+, does bear a slightly closer relationship to GNE, especially over the 1983-84 period. Nonetheless the growth rate of M2+ has remained well below that of GNE over this period (Chart V). The correspondence is somewhat better in the last two years if Canada Savings Bonds are also included to form a still broader aggregate (M2+ augmented by CSBs in Chart V), although for the earlier periods their addition tends to weaken the relationship that existed between M2+ and GNE. While some M2+ balances have no doubt been shifted into Canada Savings Bonds, others have probably been moved into marketable government and private securities, attracted by the unusually wide interest rate spreads between money market instruments and personal deposits (Chart VI). This movement by households into marketable instruments has been facilitated by the arrangements recently made by some distributors of treasury bills to permit purchases of relatively small amounts of treasury bills at yields close to those obtained by purchasers of large amounts.†

Another important factor contributing to the slow growth of personal deposits over much of the 1983-84 period has been the restrained borrowing behaviour of households. It appears that relatively high interest rates and concerns about employment and income resulted in a smaller proportion of durable goods being purchased on credit and a larger proportion paid for from accumulated savings. Moreover, these concerns encouraged households to use available liquid assets to pay down existing consumer loans and residential mortgages.†† The net effect on financial institutions has been a sharp reduction in the growth of their personal and mortgage loan portfolios and of personal deposits. With the decline in interest rates in the latter part of 1984, there was a rebound in the growth of personal loans and of personal deposits at the banks; nonetheless household credit as a proportion of disposable income and durable expenditures has remained well below the average values recorded over the 1971-81 period.

* The reader is reminded that all the conventional aggregates include only bank deposits.

† Several distributors of treasury bills began in 1983 to offer treasury bills in small denominations to individual investors at very competitive rates. Though ideally one would want to include these securities along with Canada Savings Bonds in a still broader measure of M2-type balances, existing data do not provide a breakdown of the proportions of outstanding treasury bills that are held by households and businesses.

†† These and other related issues are discussed in greater detail in "Developments in the residential mortgage market" in the October 1984 issue of this Review, as well as in the Annual Report of the Governor of the Bank of Canada, 1983.

croissance de M2, lui, a baissé durant la plus grande partie de la période et n'a commencé à se redresser que tout récemment.

Cette rupture soudaine de la relation entre M2 et la DNB peut s'expliquer en partie par une modification des parts du marché, la croissance des dépôts bancaires ayant été un peu plus lente que celle des dépôts placés dans les institutions financières concurrentes à des taux d'intérêt plus élevés*. Si l'on ajoute à M2 les dépôts des particuliers dans les sociétés de fiducie, les sociétés de prêt hypothécaire, les *credit unions* et les caisses populaires, on obtient l'agrégat M2+ qui présente une relation un peu plus étroite avec la DNB, surtout sur la période 1983-1984. Son rythme de croissance est demeuré toutefois nettement au-dessous de celui de la DNB sur toute cette période (voir Graphique V). Par contre, si l'on ajoute aussi les obligations d'épargne du Canada (M2+ augmenté des OEC au Graphique V), on observe une relation un peu plus étroite pour les deux dernières années, même si cette opération tend à faire ressortir l'existence d'un lien plus faible entre M2+ et la DNB pendant les périodes antérieures. Bien que certains dépôts compris dans M2+ aient sûrement servi à l'acquisition d'obligations d'épargne du Canada, certains autres ont dû, à cause des écarts exceptionnellement grands entre les taux d'intérêt des titres du marché monétaire et ceux des dépôts des particuliers, s'orienter vers le marché des titres négociables du gouvernement et du secteur privé (voir Graphique VI). Ce déplacement de l'épargne des ménages vers les titres négociables a été facilité par des mécanismes que certaines institutions qui vendent des bons du Trésor ont mis au point ces derniers temps pour permettre aux investisseurs qui souscrivent des montants relativement faibles de bons du Trésor de bénéficier de taux de rendement proches de ceux que reçoivent les gros acheteurs†.

Une autre cause importante du faible taux d'accroissement des dépôts des particuliers durant la plus grande partie de la période 1983-1984 a été la réticence que les ménages ont manifestée face à l'emprunt. Le niveau relativement élevé des taux d'intérêt et les préoccupations au sujet du chômage et des revenus semblent avoir eu pour effet de réduire la proportion des achats de biens de consommation durables effectués à crédit et d'augmenter celle des achats payés avec des fonds épargnés. De plus, ces préoccupations ont incité les ménages à rembourser des prêts personnels et des emprunts hypothécaires à même leurs économies††. Tout compte fait, cette décision des ménages s'est traduite, au bilan des institutions financières, par une forte diminution de la croissance des prêts personnels, des portefeuilles hypothécaires et des dépôts des particuliers. À la faveur de la baisse des taux d'intérêt enregistrée durant les derniers mois de 1984, la croissance des

* Le lecteur se souviendra que les agrégats traditionnels ne comprennent que les dépôts bancaires.

† En 1983, plusieurs distributeurs de bons du Trésor ont commencé à offrir aux particuliers la possibilité d'acheter de petites coupures de bons du Trésor à des taux très intéressants. L'idéal serait de faire entrer ces titres ainsi que les obligations d'épargne du Canada dans un agrégat regroupant des dépôts du type M2, mais il n'existe pas de statistiques sur la proportion des bons du Trésor détenue par les ménages et par les entreprises.

†† Ce sujet et certaines questions connexes sont examinés de façon plus détaillée dans l'article intitulé "L'évolution récente du marché des prêts hypothécaires à l'habitation", qui a été publié dans la livraison d'octobre 1984 de la Revue, et dans le Rapport annuel du Gouverneur de la Banque du Canada pour 1983.

M3

The behaviour of M3, defined as M2 plus non-personal fixed-term deposits and the foreign currency deposits of residents booked in Canada, has been similar to that of M2, although the declining trend in its growth rate in the 1981-83 period was if anything more pronounced and has been followed by a sharper upturn in 1984. Businesses continued over the last year to restructure their balance sheets, reducing their degree of reliance on short-term forms of financing. The growth of business loans has therefore remained more subdued than in earlier periods, and banks have bid less aggressively for non-personal deposits to fund those loans. In recent months there has been some rebound in commercial lending as corporations have shifted some of their short-term financing out of money market instruments. While the growth of non-personal deposits has

prêts aux particuliers et des dépôts des particuliers dans les banques s'est accélérée. Toutefois, la proportion du crédit aux ménages par rapport au revenu disponible et aux dépenses en biens durables s'est maintenue à un niveau bien inférieur à la moyenne enregistrée sur la période allant de 1971 à 1981.

M3

M3, qui est défini comme la somme de M2, des dépôts à terme fixe autres que ceux des particuliers et des dépôts en devises étrangères comptabilisés au Canada au nom des résidents, a eu un comportement similaire à celui de M2, même si la tendance à la baisse de son taux de croissance a été plus accentuée au cours de la période 1981-1983 que celle de M2 et sa remontée plus forte en 1984. Les entreprises ont continué l'an dernier à restructurer leurs bilans et ont de nouveau réduit leur dépendance à l'endroit des sources de financement à court terme. Ainsi, la croissance des prêts aux entreprises a été encore

accelerated as a result, M3 has nevertheless continued to grow at a slower rate than total spending.

As with M2, it is possible to add to M3 other assets such as near-bank deposits (giving M3+), as well as CSBs and short-term money market instruments, in order to generate financial aggregates that are more encompassing than the traditional, bank specific, measures. However, the direction of the movements of both these wider financial aggregates is broadly similar to M3 (Chart VII). Neither the traditional monetary aggregates nor the augmented measures have borne a close relationship with GNE over the most recent period.

plus faible qu'au cours des périodes antérieures, et les banques se sont livrées à une concurrence moins vigoureuse pour se procurer les dépôts nécessaires dont elles ont besoin pour financer ces prêts. Ces derniers mois, les prêts commerciaux ont augmenté quelque peu, les sociétés ayant dans une certaine mesure préféré cette forme de financement à l'émission de titres à court terme sur le marché monétaire. Il en est résulté une progression des dépôts autres que ceux des particuliers, mais M3 n'en a pas moins continué de croître à un rythme plus lent que la dépense globale.

Il est possible d'ajouter à M3, comme on l'a fait pour M2, certains autres avoirs, tels que les dépôts dans les établissements parabancaires (ce qui donne l'agrégat M3+), ainsi que les obligations d'épargne du Canada et les titres du marché monétaire. On obtient alors

Chart VII Growth rates of GNE and M3, M3+ and M3+ augmented by CSBs and money market instruments
Graphique VII Taux de croissance de la DNB, de M3, de M3+ et de M3+ augmenté des OEC et des titres du marché monétaire

Deposit data for credit unions and caisses populaires have been estimated for 1984 Q3.
Les chiffres des dépôts dans les caisses populaires et les crédits unions utilisés pour le 3^e trimestre de 1984 sont des estimations.

* * *

In summary, recent financial innovations and market developments have continued to exert an influence on the monetary aggregates that has been both substantial and hard to predict. Since it has only been possible to separate the effects of ongoing institutional changes on the aggregates from the influences of total spending and interest rates well after the event, it remains very difficult to make timely judgements about the underlying trend of recent monetary growth.

des agrégats financiers plus larges que les agrégats traditionnels, qui se limitent aux dépôts bancaires. Toutefois, les variations de ces grands agrégats financiers vont à peu près dans le même sens que celles de M3 (voir Graphique VII). Ni les agrégats monétaires traditionnels ni les agrégats élargis n'ont maintenu une relation étroite avec la DNB ces derniers temps.

* * *

En résumé, on peut dire que les récentes innovations financières et certains phénomènes survenus sur le marché ont continué à exercer sur les agrégats monétaires une influence considérable et difficile à prévoir. Comme il s'écoule un laps de temps assez long avant qu'on parvienne à isoler les incidences que les changements d'ordre institutionnel ont sur les agrégats de celles de la dépense globale et des taux d'intérêt, il demeure très difficile de formuler en temps opportun des jugements sur la tendance sous-jacente la plus récente de l'expansion monétaire.

Technical note: Revisions to the balance of payments and merchandise trade tables

Note technique sur la modification des tableaux de la balance des paiements et de la balance commerciale

The availability of new seasonally adjusted merchandise trade and current account data from Statistics Canada has allowed some major improvements to the data published in the Review. Previously, the set of Tables 68-71 on the Canadian balance of payments and the set of Tables 72-77 on Canadian merchandise trade by commodity group and geographical area were not fully consistent. The former merchandise trade tables provided data that in most cases had not been adjusted for balance of payments purposes and/or had been seasonally adjusted by the Bank of Canada independently of the seasonally adjusted totals published by Statistics Canada. We have now tried to render them fully consistent wherever possible by using data on a balance of payments basis where available and using Statistics Canada's seasonally adjusted data on commodities, which add up to the seasonally adjusted total.

Beginning with this issue, four types of improvements have been made to the balance of payments and trade data published in the Review. First, the details of the current account (Table J2) are now presented on a seasonally adjusted basis so that their cyclical or secular behaviour can be more easily observed. Second, the values, volumes and prices for various commodity groups in global trade (Tables J5-J9) as well as the values for total exports and imports by geographical area (Table J4) are on a seasonally adjusted balance of payments basis. That is, they are measured on a basis that is fully consistent with the other elements of the balance of payments and with the totals for exports and imports that appear in the national income and expenditure accounts. Third, the new Bank of Canada classification of merchandise trade (Tables J6-J11) provides a more symmetrical treatment of exports and imports for all levels of

La production par Statistique Canada de nouvelles statistiques désaisonnalisées de la balance commerciale et de la balance courante a permis d'apporter certaines améliorations d'une grande importance aux données publiées dans la Revue. Jusqu'à maintenant, les données comprises dans les tableaux de la balance canadienne des paiements (Tableaux 68 à 71) n'étaient pas en tous points comparables à celles de la ventilation des échanges commerciaux du Canada par groupes de produits et par régions (Tableaux 72 à 77). Les anciens tableaux de la balance commerciale contenaient des chiffres qui, dans la plupart des cas, n'avaient pas été corrigés en fonction des critères de la balance des paiements ou avaient été désaisonnalisés séparément par la Banque du Canada et, par conséquent, ne correspondaient pas aux totaux désaisonnalisés publiés par Statistique Canada. Nous nous sommes donc efforcés d'assurer de notre mieux l'uniformité de ces chiffres en utilisant chaque fois que c'était possible des données établies sur la base de la balance des paiements ainsi que les chiffres désaisonnalisés de la ventilation par produits publiés par Statistique Canada et dont la somme correspond aux données globales désaisonnalisées.

Les améliorations qui ont été apportées ce mois-ci aux données de la balance des paiements et de la balance commerciale peuvent être groupées en quatre catégories. Premièrement, les données détaillées de la balance courante (Tableau J2) sont maintenant désaisonnalisées de sorte qu'on pourra mieux observer leur comportement cyclique ou leur tendance. Deuxièmement, les statistiques de la valeur, du volume et des prix de chaque catégorie de marchandises (Tableaux J5 à J9) de même que les chiffres de la ventilation régionale de l'ensemble des exportations et des importations (Tableau J4) sont désaisonnalisés et établis sur la base de la balance des paiements. Ces données sont donc calculées sur la même base que celles des autres éléments de la balance des paiements et concordent avec les séries de l'ensemble des exportations et des importations qui figurent dans la comptabilité nationale aux comptes des revenus et des dépenses. Troisièmement,

aggregation. Finally, two price indexes for total exports and imports are shown in Table J5, one calculated with a Paasche formula of current weights, the other with a Laspeyres formula of fixed 1971 weights. The latter allows a better reading of short-run price movements because it is free of the influence of weight shifts.

The remainder of this note details the changes on a table by table basis for Tables J2 and J4-J11.*

Current account (Table J2)

Table J2 replaces Tables 69 and 70 and provides details of the current account on a seasonally adjusted rather than raw basis. The information on implicit price indexes that was shown previously in Table 69 has been moved to Table J5. The Cansim numbers listed in Table J2 yield data that are seasonally adjusted at quarterly rates rather than the annual rates displayed in the table.

Merchandise trade: Geographic breakdown, prices and volumes (Tables J4 and J5)

Table J4 deals with the geographic breakdown of total merchandise trade and Table J5 with the prices and volumes. Data in both tables are adjusted by Statistics Canada for seasonality and for balance of payments purposes. In Table J4, the listed Cansim numbers yield data that are seasonally adjusted at quarterly rates rather than at annual rates. "All other countries" includes the category "Other America", which was previously shown separately but which is not available on a seasonally adjusted balance of payments basis from Statistics Canada. Table J5 shows prices and terms of trade on both a Laspeyres (fixed weights) and Paasche (current weights) basis. The volumes shown in Table J5 are in 1971 constant dollars and appear in the national income and expenditure accounts.†

Commodity classification (Tables J6-J9)

Tables J6-J9 present global merchandise trade flows by commodity group, aggregated from data that have been adjusted by Statistics Canada

la nouvelle classification du commerce extérieur établie par la Banque du Canada (Tableaux J6 à J11) permet un traitement plus uniforme des exportations et des importations, et ce, à tous les niveaux de leur agrégation. Enfin, le Tableau J5 contient deux indices des prix de l'ensemble des exportations et des importations, un indice de Paasche, à pondérations variables, et un indice de Laspeyres, qui utilise les pondérations de 1971. Cet indice permet de mieux observer les fluctuations des prix sur courte période parce qu'il n'est pas influencé par les variations de pondérations. Le lecteur trouvera dans les pages qui suivent un exposé détaillé des changements apportés au Tableau J2 et à chacun des tableaux de la série J4 à J11*.

La balance courante (Tableau J2)

Le Tableau J2, qui remplace les tableaux 69 et 70, renferme des données désaisonnalisées de la balance courante, et non des données brutes. Les séries des indices synthétiques des prix, qui étaient publiées auparavant au Tableau 69, figurent maintenant au Tableau J5. Les numéros du fichier Cansim listés au Tableau J2 concernent des données trimestrielles désaisonnalisées exprimées en chiffres trimestriels alors que les chiffres indiqués sont des données désaisonnalisées exprimées en chiffres annuels.

La balance commerciale : Répartition géographique, prix et volumes (Tableaux J4 et J5)

Le Tableau J4 contient une ventilation régionale des données de la balance commerciale, tandis que le tableau J5 porte sur les prix des marchandises et le volume des échanges. Les données de ces deux tableaux ont été corrigées des variations saisonnières et mises sur la base de la balance des paiements par Statistique Canada. Les numéros du fichier Cansim reproduits au Tableau J4 concernent des données désaisonnalisées exprimées en chiffres trimestriels, et non des données désaisonnalisées exprimées en chiffres annuels. La rubrique «Tous autres pays» englobe désormais les données des «autres pays d'Amérique», qui faisaient jusqu'ici l'objet d'une colonne distincte; Statistique Canada ne publie pas de données désaisonnalisées établies sur la base de la balance des paiements pour ce groupe de pays. Le Tableau J5 contient des chiffres des prix et des termes de l'échange établis à l'aide de l'indice de Laspeyres (à pondérations fixes) et de l'indice de Paasche (à pondérations variables). Les données du volume des échanges, qui sont reproduites au Tableau J5, sont exprimées en dollars de 1971 et figurent dans les comptes nationaux des revenus et des dépenses†.

* Tables J1 and J3 remain unchanged from previous Tables 68 and 71. They present, respectively, a summary of the balance of payments and the details of the capital account. The data are not seasonally adjusted because the capital account series are reported only on a raw basis by Statistics Canada. The source of the data on the balance of payments is Statistics Canada's "Quarterly Estimates of the Canadian Balance of International Payments", catalogue 67-001.

† At the moment, the national accounts carry the revisions to quarterly trade data back only to 1980.

* Les Tableaux J1 et J3 sont identiques aux anciens Tableaux 68 et 71. Ils contiennent respectivement un résumé des chiffres de la balance des paiements et les données détaillées de la balance des capitaux. Ces données ne sont pas désaisonnalisées parce que Statistique Canada ne publie pas de données désaisonnalisées des mouvements de capitaux. Les données de la balance des paiements proviennent des «Estimations trimestrielles de la balance canadienne des paiements internationaux», Statistique Canada, numéro de catalogue 67-001.

† Actuellement, les chiffres présentés dans les comptes nationaux ne tiennent compte que des révisions qui ont été apportées à partir de 1980 aux données trimestrielles sur les échanges commerciaux.

for seasonality and for balance of payments purposes. The categories used for the aggregated values in Tables J6 and J7 correspond exactly to the categories for prices and volumes displayed in Tables J8 and J9. Moreover, data totals are fully consistent with those in Tables J1, J2, J4 and J5. This attractive feature has been made possible by the changes to Statistics Canada's treatment of monthly trade data.

Some 60 commodity groups for both imports and exports are now reported by Statistics Canada on a seasonally adjusted balance of payments basis and constitute the building blocks of the merchandise trade data shown in Tables J6-J9. Seasonally adjusted total exports and imports are derived by aggregation of the commodity components* instead of being seasonally adjusted independently as before. In accordance with this methodological change, quarterly totals of exports and imports have been revised all the way back to 1971. Balance of payments adjustments place customs trade data on a basis consistent with the measurement of the other elements of the balance of payments in terms of coverage, valuation and timing. The source of the data contained in Tables J6-J9 is Statistics Canada's "Summary of External Trade", catalogue 65-001.† Further details about the new data and the nature of the balance of payments adjustments may be found in the Appendix. Also included in the Appendix is a concordance between the Bank of Canada commodity classification and the commodity groupings used by Statistics Canada.

Tables J6 and J7 present the revised Bank of Canada commodity classification of merchandise export and import values. As can be seen in the table below, this classification treats exports and imports in a more symmetrical manner than previously. Twelve major export and nine major import commodity categories are arranged under five broad groupings: food, energy materials, other (natural-resource) materials, motor vehicles and parts, and other manufactured goods.

"Food" consists largely of the products of agriculture, fishing, and food and beverages manufacturing industries but also includes a small amount of inedible products such as tobacco, furs, skins and hides. The category "Energy materials" comprises crude petroleum, natural gas, coal, petroleum and coal products and electricity, but excludes uranium ores and concentrates, a category which is not available separately.

* Components for which stable seasonality could not be reliably identified were not seasonally adjusted.

† Cansim matrices 900 to 902 covering the trade data previously contained in Tables 74 to 77 will no longer be updated. However, they will be retained in the database until December 1985.

La classification des marchandises (Tableaux J6 à J9)

Les Tableaux J6 à J9 contiennent une ventilation du flux global des échanges par groupes de produits, obtenue par agrégation de données corrigées des variations saisonnières et mises sur la base de la balance des paiements par Statistique Canada. Les rubriques des données globales des échanges en valeur qui figurent aux Tableaux J6 et J7 correspondent exactement à celles des prix et des volumes que l'on trouve aux Tableaux J8 et J9. De plus, les données globales concordent en tous points avec celles des Tableaux J1, J2, J4 et J5. Cette amélioration remarquable a été rendue possible grâce aux modifications apportées par Statistique Canada au traitement des données mensuelles du commerce extérieur.

Statistique Canada fournit à l'heure actuelle, sur la base de la balance des paiements, des données désaisonnalisées des importations et des exportations pour une soixantaine de groupes de produits; c'est par agrégation de ces groupes qu'on a produit les chiffres du commerce extérieur indiqués aux Tableaux J6 à J9. Pour obtenir les données désaisonnalisées de l'ensemble des exportations et des importations, Statistique Canada fait maintenant la somme des composantes des séries désaisonnalisées, au lieu de désaisonnaliser séparément les données globales*. Par suite de cette modification de la méthode de calcul, on a révisé rétroactivement les données trimestrielles de l'ensemble des exportations et des importations jusqu'en 1971. Les ajustements apportés aux statistiques douanières pour les mettre sur la base de la balance des paiements assurent la concordance des données du commerce extérieur avec celles des autres éléments de la balance des paiements, en ce qui a trait au champ d'observation, à l'évaluation et à la chronologie des transactions. Les données reproduites aux Tableaux J6 à J9 proviennent de la publication de Statistique Canada intitulée «Sommaire du commerce extérieur», numéro de catalogue 65-001†. On trouvera dans la section annexe de la présente note des renseignements supplémentaires sur ces nouvelles données et sur la nature des ajustements qui y ont été apportés en fonction des exigences de la balance des paiements. Cette section contient également un tableau établissant la concordance entre la classification des marchandises adoptée par la Banque du Canada et les groupes de marchandises constitués par Statistique Canada.

Les Tableaux J6 et J7 renferment les données, en valeur, des exportations et des importations de marchandises ventilées selon la classification révisée de la Banque du Canada. Comme on peut le voir au Tableau 1 ci-dessous, cette nouvelle méthode assure une présentation plus symétrique des exportations et des importations. Douze grandes catégories de produits exportés et neuf grandes catégories de produits importés sont groupées sous cinq rubriques : les produits alimentaires, les produits énergétiques, les

* Les chiffres des composantes qui n'ont pas un profil saisonnier manifeste n'ont pas été désaisonnalisées.

† Les matrices 900 à 902 des séries de Cansim relatives aux données des échanges commerciaux (anciens Tableaux 74 à 77) ne seront plus mises à jour. Toutefois, elles seront conservées dans la base de données jusqu'en décembre 1985.

“Other (natural-resource) materials” cover other crude and fabricated items such as forest products, metals and minerals and products, chemicals and (on the import side) textiles. Included in “Motor vehicles and parts” are passenger cars and chassis, trucks and other motor vehicles as well as engines and parts (excluding such auxiliary equipment as brake linings, tires, tubes, spark plugs and batteries*). “Other manufactured goods” comprise machinery and equipment, other consumer goods excluding food and, on the export side, some residual industrial products.

Structure of the Bank of Canada commodity classification

| Exports | Imports |
|---|--------------------------------|
| <i>Food</i> | |
| Wheat | Food |
| Other farm and fish products | |
| <i>Energy materials</i> | |
| Crude petroleum | Crude petroleum |
| Natural gas | |
| Other energy products | Other energy products |
| <i>Other (natural-resource) materials</i> | |
| Lumber and sawmill products | Construction materials |
| Pulp and paper | |
| Other metals and minerals | Industrial materials |
| Chemicals and fertilizers | |
| <i>Motor vehicles and parts</i> | |
| Motor vehicles and parts | Motor vehicles and parts |
| — U.S. (Table J8) | — U.S. (Table J9) |
| Motor vehicles and parts | Motor vehicles and parts |
| — Rest of the world (Table J8) | — Rest of the world (Table J9) |
| <i>Other manufactured goods</i> | |
| Other manufactured goods | Machinery and equipment |
| | Other consumer goods |

Although the major commodity categories are similar in name and coverage to what they were before, their composition has been revised to best use the newly available data and to facilitate comparisons between exports and imports of similar commodities. This is particularly evident in the case of the commodities pertaining to machinery and equipment and to food. Six sub-categories of machinery and equipment are shown on both the export and import side: “Aircraft and parts”, “Other transportation equipment”, “Agricultural machinery”, “Communications and electronic equipment”, “Industrial machinery” and “Other equipment and tools”. To enhance symmetry with respect to the food grouping, certain commodities have been added to both exports and imports: “Alcoholic beverages” which were previously included in “Other consumer goods” have been added in exports; on the import side,

* In the earlier Bank of Canada commodity classification, these items were included with motor vehicles and parts.

autres produits (ressources naturelles), les véhicules automobiles et pièces détachées et les autres produits manufacturés.

Les «produits alimentaires» comprennent principalement les produits de l'agriculture et de la pêche ainsi que les produits des industries de l'alimentation et des boissons; ils englobent également une petite quantité de produits non comestibles comme le tabac, les pelleteries, les peaux et les cuirs. La rubrique des «produits énergétiques» comprend le pétrole brut, le gaz naturel, le charbon, les produits des industries pétrolières et charbonnières et l'électricité; elle ne comprend pas les minerais et concentrés d'uranium, pour lesquels il n'existe pas de série distincte. Les «autres produits (ressources naturelles)» englobent les autres matières brutes ou autres produits manufacturés comme les produits de la forêt, les métaux, les minéraux et les matières minérales, les produits chimiques, et dans le cas des importations, les textiles. La rubrique des «véhicules automobiles et pièces détachées» concerne les voitures particulières et les châssis, les camions et autres véhicules à moteur ainsi que les moteurs et les pièces (à l'exclusion de pièces telles que les garnitures de freins, pneus, chambres à air, bougies d'allumage et accumulateurs*). Les «autres produits manufacturés» comprennent la machinerie et l'équipement, les autres biens de consommation, produits alimentaires exclus, et, dans le cas des exportations, quelques produits industriels non couverts par les rubriques précédentes.

Classification des marchandises de la Banque du Canada

| Exportations | Importations |
|--|---|
| <i>Produits alimentaires</i> | |
| Blé | Produits alimentaires |
| Autres produits de l'agriculture et de la pêche | |
| <i>Produits énergétiques</i> | |
| Pétrole brut | Pétrole brut |
| Gaz naturel | |
| Autres produits énergétiques | Autres produits énergétiques |
| <i>Autres produits (ressources naturelles)</i> | |
| Bois d'œuvre et sciages | Matériaux de construction |
| Pâtes et papiers | |
| Autres métaux et minéraux | Matières industrielles |
| Produits chimiques et engrais | |
| <i>Véhicules automobiles et pièces détachées</i> | |
| Véhicules automobiles et pièces détachées | Véhicules automobiles et pièces détachées |
| — E.-U. (Tableau J8) | — E.-U. (Tableau J9) |
| Véhicules automobiles et pièces détachées | Véhicules automobiles et pièces détachées |
| Autres pays (Tableau J8) | — Autres pays (Tableau J9) |
| <i>Autres produits manufacturés</i> | |
| Autres produits manufacturés | Machinerie et équipement |
| | Autres biens de consommation |

Bien que le titre des grandes catégories de marchandises et le champ couvert par elles n'aient pas changé, la composition de ces catégories a été modifiée de façon à permettre

* Dans l'ancienne classification des marchandises de la Banque du Canada, ces articles étaient rattachés aux véhicules automobiles et pièces détachées.

the additions are "Live animals", "Crude animal products", "Crude vegetable products", "Fodder and feed" and "Oils and fats", all of which were previously included in "Industrial materials".

The symmetry of the export and import classifications is however only partial with respect to fabricated materials. Metal, textile and some other fabricated materials are found in "Other manufactured goods" on the export side (Table J6) but in "Other (natural-resource) materials" on the import side (Table J7).

Other important changes to the commodity composition of major categories have been made. The division of forest product exports between "Lumber" and "Other forest products" has been changed to "Lumber and sawmill products" and "Pulp and paper" to be more in line with the distinction between the output of the wood and the pulp and paper industries. Moreover, "Other sawmill products" and "Other paper" are now shown individually. Other major changes to Table J6 include a separate identification of "Ores and concentrates" and "Non-metallic minerals" under "Other metals and minerals" and of "Fertilizers" under "Chemicals and fertilizers". Table J7, dealing with imports, shows a finer breakdown of "Industrial materials".

"Other exports" and "Other imports" are new categories in the Bank of Canada commodity classification. They comprise unallocated balance of payments adjustments and special transactions such as shipments valued at less than \$800 each, contractors' equipment and tools, and Canadian exports returned within five years. The negative sign of "Other imports" is ascribable to the unallocated balance of payments adjustments, which are negative on the import side.

Tables J8 and J9 show the prices and volumes of merchandise exports and imports respectively on a balance of payments basis for *all* the commodity groupings, not just for crude petroleum, natural gas and motor vehicles and parts as before. Moreover, the basic series are now seasonally adjusted by Statistics Canada rather than by the Bank of Canada. A concordance between the categories shown in these tables and the detailed Bank of Canada commodity classification on the one hand and Statistics Canada's commodity groupings on the other is presented in the Appendix. While price and volume figures are not shown for the categories "Other exports" and "Other imports", these are included in the total price and volume series in Tables J8 and J9. Data on trade with the United States in motor vehicles and parts are not yet published by Statistics Canada on a seasonally adjusted balance of payments basis. The

une utilisation optimale des plus récentes données disponibles et à faciliter la comparaison des données des exportations et des importations des produits de nature similaire. Cette remarque s'applique particulièrement à la rubrique de la machinerie et de l'équipement et à celle des produits alimentaires. À la rubrique «Machinerie et équipement», on trouve, à la fois du côté des exportations et du côté des importations, les six subdivisions suivantes : «Aéronefs et pièces détachées», «Autres types de matériel de transport», «Machinerie agricole», «Matériel électronique et de télécommunications», «Machines industrielles» et «Autres types d'équipement et outillage.» Dans le souci d'apporter une plus grande symétrie à la rubrique des produits alimentaires, on a ajouté certaines marchandises aux exportations et aux importations. Ainsi, la rubrique «Boissons alcooliques», qui était auparavant rattachée à «Autres biens de consommation», a été ajoutée aux exportations; du côté des importations, on a ajouté les rubriques «Animaux vivants», «Produits bruts d'origine animale», «Produits végétaux bruts», «Fourrages et provendes» et «Produits laitiers et oeufs», lesquelles faisaient toutes partie des «Matières industrielles.»

En ce qui concerne les matières ouvrées, la symétrie entre les séries des exportations et celles des importations n'est que partielle. Les chiffres des exportations de produits métalliques, de textiles et de quelques autres matières ouvrées sont compris dans «Autres produits manufacturés» (Tableau J6), alors que les chiffres des importations de ces mêmes marchandises se retrouvent sous «Autres produits (ressources naturelles)» (Tableau J7).

Certaines autres modifications importantes ont été apportées à la composition des grandes catégories de produits. Les exportations des produits de la forêt, qui étaient ventilées auparavant en «bois d'oeuvre» et «autres produits de la forêt», sont présentées maintenant sous les rubriques «bois d'oeuvre et sciages» et «pulpe et papier», qui reflètent mieux la distinction existant entre la production de l'industrie du bois et celle de l'industrie des pâtes et papiers. De plus, il existe désormais des séries distinctes pour «Autres sciages» et «Autres types de papier». Au nombre des autres modifications importantes apportées au Tableau J6, il y a lieu de mentionner la création des séries «Minerais et concentrés» et «Minéraux non métalliques», qui sont des subdivisions de «Autres métaux et minéraux», et de la série «Engrais», qui figure sous «Produits chimiques et engrais.» Le Tableau J7, qui traite des importations, contient aussi une répartition plus détaillée des «Matières industrielles.»

Les rubriques «Autres exportations» et «Autres importations» ont été ajoutées à la classification des marchandises de la Banque du Canada. Elles concernent les montants non répartis des ajustements de la balance des paiements et certaines opérations spéciales comme les envois d'une valeur unitaire de moins de 800 dollars, l'équipement et les outils utilisés par les entreprises de construction et les exportations canadiennes retournées dans moins de cinq ans. Le signe négatif dont sont affectés les chiffres des

series shown in Tables J8 and J9 are constructed from seasonal factors and raw balance-of-payments-adjusted data provided by Statistics Canada.* Trade with other countries is calculated residually.

Commodity classification of merchandise trade by destination/origin (Tables J10 and J11)

Tables J10 and J11 respectively show export values by destination and import values by origin, disaggregated into the same commodity classifications used in Tables J6 and J7. These values are obtained by compiling raw data on a customs basis. Statistics Canada has not yet produced disaggregated commodity data by geographical area on a seasonally adjusted balance of payments basis. The source of the raw, customs data is Statistics Canada's "Exports by Commodities", catalogue 65-004 and "Imports by Commodities", catalogue 65-007.

autres importations» s'explique par les ajustements non répartis de la balance des paiements, qui sont négatifs dans le cas des importations.

Les Tableaux J8 et J9 contiennent respectivement les chiffres des prix et des volumes des exportations et des importations sur la base de la balance des paiements pour *tous* les groupes de marchandises, pas seulement pour le pétrole brut, le gaz naturel et les véhicules automobiles et pièces détachées comme c'était le cas auparavant. En outre, les séries de base sont maintenant désaisonnalisées par Statistique Canada plutôt que par la Banque du Canada. On trouvera en annexe un tableau indiquant les concordances entre, d'une part, les rubriques de ces tableaux et celles de la classification des marchandises de la Banque et, d'autre part, les catégories de marchandises groupées par Statistique Canada. Il n'y a pas de chiffres des prix ni des volumes sous les rubriques «Autres exportations» et «Autres importations», mais ces données sont comprises dans les séries globales des prix et des volumes des Tableaux J8 et J9. En ce qui a trait au commerce des véhicules automobiles et des pièces détachées avec les États-Unis, Statistique Canada n'a pas encore commencé à publier des données désaisonnalisées et mises sur la base de la balance des paiements. Les chiffres publiés aux Tableaux J8 et J9 sont produits à l'aide de facteurs de désaisonnalisation et de données brutes corrigées en fonction des critères de la balance des paiements provenant tous deux de Statistique Canada*. Les chiffres des échanges commerciaux avec les autres pays sont obtenus par soustraction.

Répartition par destination et par provenance des données de la balance commerciale (Tableaux J10 et J11).

Le Tableau J10, qui contient une ventilation des exportations en valeur selon leur destination, et le Tableau J11, une ventilation des importations en valeur selon leur provenance, fournissent tous les deux des données qui ont été subdivisées selon la même classification utilisée aux Tableaux J6 et J7. Ces chiffres proviennent de la compilation des données brutes présentées sur la base des statistiques douanières. Statistique Canada n'a pas encore produit de ventilation régionale détaillée des données désaisonnalisées et mises sur la base de la balance des paiements. Les données brutes exprimées sur la base de statistiques douanières proviennent des publications suivantes de Statistique Canada : «Exportations par marchandises», numéro de catalogue 65-004, et «Importations par marchandises», numéro de catalogue 65-007.

* On the export side, the value of each of the three components of motor vehicles and parts (passenger cars, trucks and parts) is adjusted using the same seasonal factors that are applied to exports of these products to all countries. The price deflators are the same as those published for exports to all countries as the latter are built exclusively from United States price components. On the import side, the value of passenger cars and trucks is adjusted using specific seasonal factors for the United States provided by Statistics Canada; the price of passenger car imports from the United States also differs from the one applied to imports from all countries. Otherwise, seasonal factors and prices prevailing for imports from all countries are used to calculate the appropriate series for imports from the United States.

* En ce qui a trait aux exportations, la valeur de chacune des trois composantes des véhicules et pièces détachées (voitures particulières, camions et pièces détachées) est corrigée à l'aide des mêmes facteurs de désaisonnalisation que ceux qui sont utilisés pour les exportations de ces produits à l'ensemble des pays étrangers. Les indices importés des prix sont les mêmes que ceux qui sont publiés pour les exportations vers l'ensemble des pays étrangers puisque ces derniers indices sont établis exclusivement à partir des prix américains. Dans le cas des importations, on a corrigé la valeur des voitures particulières et des camions avec des facteurs de désaisonnalisation des États-Unis fournis par Statistique Canada; le prix applicable aux importations de voitures particulières américaines diffère également de celui qui est appliqué aux importations en provenance des autres pays. Dans les autres cas, ce sont les facteurs de désaisonnalisation et les prix en vigueur pour les importations en provenance de l'ensemble des pays étrangers qui sont utilisés dans le calcul des séries applicables aux importations de produits américains.

Appendix

Statistics Canada's new merchandise trade data

Since the April 1984 issue of its "Summary of External Trade" publication, Statistics Canada has made available disaggregated values and prices for merchandise trade on a basis fully consistent with the national income and expenditure accounts. Now, some 60 commodity groupings for both imports and exports as well as their regional totals are reported on a seasonally adjusted balance of payments basis. Previously, only total imports and total exports were available in that form; specific commodity groups were reported without seasonal and balance of payments adjustments while the geographic breakdown of total imports and exports, although seasonally adjusted, was available only on the basis of customs data (without balance of payments adjustments). Moreover, seasonally adjusted total imports and exports are now derived by aggregation of their seasonally adjusted commodity components. Previously, totals were seasonally adjusted independently of the components.

Customs trade data differ from balance of payments data in terms of coverage, valuation and timing. The purpose of the balance of payments adjustments is to make customs trade data consistent in these respects with the way the other elements of the balance of payments are measured. Several commodity groupings are adjusted. On the export side, energy products are adjusted for timing of crude petroleum and natural gas shipments by pipeline and electricity exports, all of which appear with a lag of one month in the customs data*; farm products, to reflect better information from the Canadian Grain Commission on volumes of grain clearances from exporting warehouses during the full calendar month; forest products, to remove elements of freight costs to the United States, which should more appropriately appear in the service account of the balance of payments; other metals and minerals, to reflect changes in non-resident ownership of gold held in Canada; motor vehicles and parts, to remove the tooling and model-launching charges that are included in the value of imported parts; and machinery and equipment, to substitute progress payments in connection with the construction of aircraft and ships and other equipment and tools for a one-time entry coinciding with the actual delivery of the equipment.

* However, starting with the January 1984 data, exports of these products on a customs basis are subsequently shifted back one month.

Annexe

Nouvelles données de Statistique Canada sur le commerce extérieur

Depuis le numéro d'avril 1984, Statistique Canada publie dans «Sommaire du commerce extérieur» des chiffres détaillés des échanges commerciaux en valeur et en prix, qu'on peut directement comparer avec ceux des comptes nationaux des revenus et des dépenses. Actuellement, les données d'une soixantaine de groupes de produits d'exportation ainsi que les totaux de ces données, ventilés par région, sont corrigés des variations saisonnières et mis sur la base de la balance des paiements. Auparavant, seules les données globales des importations et des exportations étaient produites sous cette forme; en effet, les chiffres se rapportant aux groupes de marchandises ne faisaient pas l'objet de ces deux types d'ajustement, tandis que les données réparties par région de l'ensemble des importations et des exportations étaient désaisonnalisées mais n'étaient fournies que sur la base des statistiques douanières, c'est-à-dire qu'elles n'étaient pas mises sur la base de la balance des paiements. De plus, les données désaisonnalisées des importations et des exportations globales sont maintenant produites par agrégation des données désaisonnalisées de leurs composantes. Auparavant, les chiffres globaux étaient désaisonnalisés indépendamment de ceux des composantes.

Les statistiques douanières diffèrent de celles de la balance des paiements par le champ d'observation, le mode d'évaluation et la chronologie des transactions. Les ajustements apportés aux données en fonction des critères de la balance des paiements visent à obtenir des statistiques de la balance commerciale qui soient comparables, sous ces trois aspects, aux chiffres des autres éléments de la balance des paiements; on a donc corrigé les données de plusieurs groupes de marchandises. Du côté des exportations, les données des produits énergétiques ont été modifiées de façon à imputer au dernier mois pour lequel les données sont publiées les expéditions de pétrole brut et de gaz naturel par pipeline et les exportations d'électricité, qui figurent toutes avec un mois de décalage dans les chiffres des douanes*. Des ajustements similaires ont été apportés à d'autres rubriques pour les raisons suivantes : aux produits agricoles, pour tenir compte de la meilleure qualité des renseignements fournis par la Commission canadienne des grains pour un mois civil donné sur le volume des grains passés par les entrepôts d'exportation; aux produits de la forêt, pour soustraire des chiffres les coûts du transport à destination des États-Unis, qu'il convient de comptabiliser au poste des services de la balance des paiements; aux autres métaux et minéraux, pour tenir compte des acquisitions par des non-résidents d'or qui reste au Canada; aux véhicules automobiles et pièces détachées, pour soustraire les frais d'usinage et de lancement des nouveaux modèles, qui sont compris dans la valeur des pièces importées et, enfin, à la machinerie et à l'équipement,

* Toutefois, à partir des données de janvier 1984, les chiffres douaniers des exportations de ces produits sont décalés d'un mois.

Specific balance of payments adjustments among import groupings are somewhat less widespread than among exports. The bulk of the adjustment has occurred in crude petroleum, industrial materials, motor vehicles and parts, and machinery and equipment. Unallocated balance of payments adjustments, arising out of the reconciliation of Canada-U.S. trade data with those published by the United States, are part of "Other exports" and "Other imports" in the Bank of Canada commodity classification, as are "Special transactions, trade". The latter mainly refers to shipments valued at less than \$800 each, contractors' equipment and tools, Canadian exports returned within five years and unclassifiable exports and imports. Unallocated adjustments are negative on the import side and explain the negative sign of "Other imports" in Table J7.

pour substituer les paiements échelonnés faits durant la fabrication des aéronefs, des bateaux et d'autres types de biens d'équipement au paiement global qui est effectué au moment de la livraison effective de l'article concerné.

Les corrections faites exclusivement en fonction des critères de la balance des paiements sont un peu moins fréquentes dans les groupes de produits d'importation que dans ceux des produits d'exportation. L'essentiel de ces modifications concerne le pétrole brut, les matières industrielles, les véhicules et pièces détachées et la machinerie et l'équipement. Les montants non répartis des ajustements de la balance des paiements, qui résultent de la conciliation des données sur les échanges commerciaux entre le Canada et les É.-U. avec les chiffres publiés aux États-Unis, sont compris dans les rubriques «Autres exportations» et «Autres importations» de la classification des marchandises de la Banque du Canada; il en est de même des chiffres de la rubrique «Transactions commerciales spéciales». Dans ce dernier cas, il s'agit principalement d'envois d'une valeur unitaire de moins de 800 dollars, des biens d'équipement et des outils des entreprises de construction, des exportations canadiennes retournées au pays avant cinq ans et des exportations et importations qui ne peuvent être classées à une rubrique précise. Les montants non attribués des ajustements qui se rapportent à des importations sont négatifs et c'est ce qui explique que les chiffres de la rubrique «Autres importations» du Tableau J7 soient affectés d'un signe négatif.

Major press statements issued by the Bank of Canada and selected other official releases of related interest are published below.

On trouvera sous cette rubrique certains communiqués importants publiés par la Banque du Canada ou par d'autres organismes officiels.

Department of Finance

11 January 1985

Canada renegotiates U.S.\$4 billion revolving credit agreement

The Honourable Michael Wilson, Minister of Finance, today announced a number of amendments to the U.S.\$4 billion revolving standby credit agreement with international banks that has been in place since 23 June 1978. The amendments have been negotiated with Citibank acting as agent for the syndicate of banks participating in the loan facility.

These amendments will provide Canada with more favourable terms including a reduced commitment fee and more flexible borrowing options which will lower borrowing costs. The maturity of the agreement has also been extended from 23 June 1988 to 10 January 1993.

The commitment fee payable on the unused portion of the line has been reduced from 1/4 of 1 per cent per annum to 1/8 of 1 per cent per annum. This lower commitment fee will result in savings of up to U.S.\$5 million per year for the Government of Canada, depending on usage of the facility. The amendments also allow for competitive advances which are expected to reduce Canada's borrowing costs when this credit facility is used. Under this provision members of the syndicate can, at their discretion, bid for participation in a planned borrowing with the competition leading to lower borrowing costs for Canada. The notice period for this type of advance is seven days.

The total amount that may be borrowed by the government remains unchanged at U.S.\$4 billion, but the U.S.\$500 million limit on the amount that can be borrowed on any one day has been removed. There is also an option to draw funds at a spread of 3/8 of 1 per cent over the Certificate of Deposit (CD) rate for major banks in the New York market in addition to the previous options of drawing funds at the U.S. Prime rate or at the London Interbank Borrowing Offered Rate (LIBOR) plus 1/4 of 1 per cent. Also, these spreads are now available for the first \$2 billion of credit instead of the first \$1.5 billion. For borrowings over \$2 billion the relevant spreads increase by 1/8 of 1 per cent. The notice period for drawings based on Prime, LIBOR and CD rates has been reduced to four days from five.

The revised agreement also permits Canada to borrow up to \$1 billion from a subset of the syndicate banks on one day's notice for a maximum term of 14 days. Advances under this "Swing Line" option can at Canada's option, bear interest at the U.S. Prime rate or LIBOR plus 1/8 of 1 per cent, if total borrowings under the credit agreement are less than U.S.\$2 billion. If drawings exceed \$2 billion, the applicable rates would be U.S. Prime plus 1/8 of 1 per cent or LIBOR plus 1/4 of 1 per cent.

"With these amendments now in place" Mr. Wilson said, "Canada will realize substantial cost savings while at the same time enhance our ability to add U.S. dollar reserves to Canada's exchange fund on short notice."

Ministère des Finances

le 11 janvier 1985

Le Canada renégocie la ligne de crédit renouvelable de \$4 milliards E.-U.

L'honorable Michael Wilson, ministre des Finances, a annoncé aujourd'hui un certain nombre de modifications à l'entente comportant une ligne de crédit renouvelable de \$4 milliards E.-U. auprès des banques internationales, laquelle est en place depuis le 23 juin 1978. Les modifications ont été négociées avec la Citibank en qualité d'agent du consortium de banques participant au mécanisme d'emprunt.

Ces modifications offrent des modalités plus favorables au Canada, dont une commission d'engagement réduite ainsi que des options d'emprunt plus souples qui réduiront les coûts d'emprunt. L'échéance de l'entente a également été prolongée du 23 juin 1988 au 10 janvier 1993.

La commission d'engagement payable sur la partie inutilisée de la ligne de crédit a été réduite à 1/8 de 1 pour cent de 1/4 de 1 pour cent par an. Cette commission d'engagement réduite permettra au gouvernement du Canada de réaliser une épargne allant jusqu'à \$5 milliards E.U. par année, selon l'usage qu'il fera de la ligne. Les modifications permettront également l'octroi d'avances concurrentielles qui devraient réduire les coûts d'emprunt du Canada lors de ses tirages sur la ligne. Cette disposition prévoit que les membres du consortium pourront, à leur gré, faire une offre de participation à un emprunt prévu, la concurrence prenant les devants pour réduire les coûts d'emprunt du Canada. La période de préavis pour ce genre d'avance sera de sept jours.

Le maximum que pourra emprunter le Canada demeure inchangé à \$4 milliards E.-U., mais la limite de \$500 millions pouvant être empruntés en une seule journée a été éliminée. L'entente prévoit également une option d'emprunt avec un écart de 3/8 de 1 pour cent au-dessus du taux des Certificats de dépôts (C.D.) pour les principales banques du marché de New York, en plus des options précédentes qui permettaient des tirages au taux préférentiel américain ou au taux interbancaire de Londres (LIBOR) plus 1/4 de 1 pour cent. En outre, ces écarts sont disponibles pour les premiers \$2 milliards de crédit au lieu des premiers \$1.5 milliard. Pour les emprunts de plus de \$2 milliards, les écarts prévus augmentent de 1/8 de 1 pour cent. Dans le cas des tirages fondés sur le taux préférentiel américain, sur LIBOR ou sur le taux C.D., la période de préavis a été réduite à quatre jours de cinq.

L'entente modifiée permet également au Canada d'emprunter jusqu'à \$1 milliard d'un sous-groupe du consortium bancaire sur avis d'un jour pour un terme de 14 jours au plus. Les avances octroyées dans le cadre de cet arrangement dit «Swing Line» pourront, au gré du Canada, porter intérêt au taux préférentiel américain ou au taux LIBOR plus 1/8 de 1 pour cent, si l'encours total sur cette ligne est inférieur à \$2 milliards E.-U. Lorsque les tirages excèdent \$2 milliards, le taux applicable sera soit le taux préférentiel américain plus 1/8 de 1 pour cent ou le taux LIBOR plus 1/4 de 1 pour cent.

«Ces modifications étant en place, le Canada pourra réduire considérablement ses coûts tout en augmentant sa capacité à ajouter des devises américaines au fonds de changes du Canada à court préavis» a affirmé M. Wilson.

Seasonally adjusted—monthly average of Wednesdays
Données désaisonnalisées—Moyenne mensuelle des mercredis

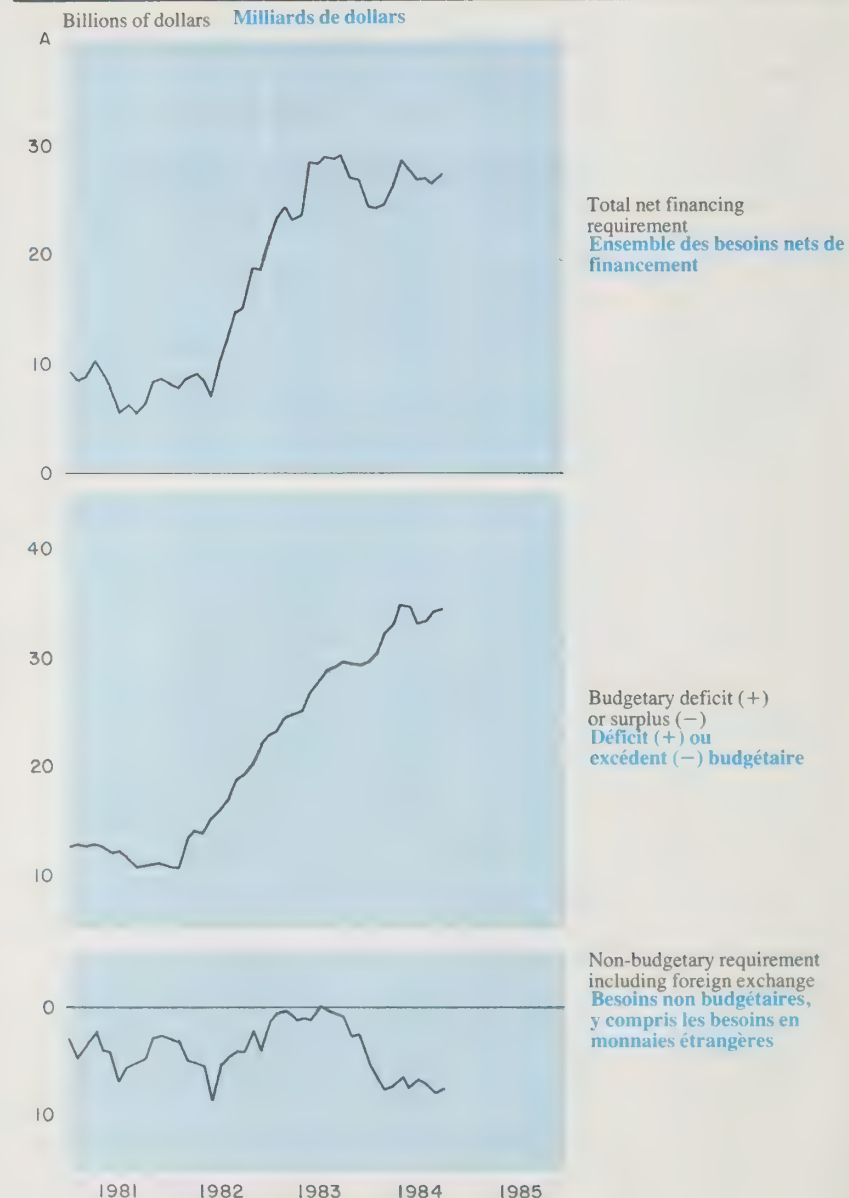

*Data prior to January 1982 have been adjusted to eliminate major discontinuities in November 1981 in the series resulting from the revision to the Bank Act in 1980 and the introduction of a new statistical reporting system. See articles in Bank of Canada Review November 1981 and March 1983.

*Les données antérieures à janvier 1982 ont été corrigées afin d'éliminer les ruptures importantes survenues dans les séries en novembre 1981 par suite de la révision de la Loi sur les banques de 1980 et de l'adoption d'un nouveau système de relevés statistiques. Voir articles publiés dans les livraisons de novembre 1981 et mars 1983 de la Revue de la Banque du Canada.

Statistical tables

The asterisks (*) indicate occasional tables which are published in the K section. Latest publication date is in parentheses.

A. Major financial and economic indicators

- A1 Analytical summary
- A2 Government of Canada fiscal position

B. Bank of Canada

- B1 Bank of Canada: Monthly series
- B2 Bank of Canada: Weekly series
- K1* Bank of Canada: Note liabilities (February 1984)

C. Chartered banks

- C1 Chartered bank selected assets: Weekly series
- C2 Chartered bank selected liabilities: Weekly series
- C3 Chartered bank assets: Monthly series
- C4 Chartered bank liabilities: Monthly series
- C5 Chartered banks: Regional distribution of assets
- C6 Chartered banks: Regional distribution of liabilities
- C7 Chartered banks: Quarterly classification of loans to non-financial corporations and unincorporated businesses by type and size of authorization
- C8 Chartered banks: Quarterly classification of non-mortgage loans
- C9 Selected seasonally adjusted series: Chartered bank assets and liabilities
- C10 Chartered banks: Cash and secondary reserves
- C11 Chartered banks: Total foreign currency assets and liabilities
- C12 Chartered banks: Total foreign currency assets and liabilities booked in Canada
- C13 Chartered banks: U.S. dollar assets and liabilities booked in Canada
- K2* Total Canadian-owned chartered banks: Consolidated statement of revenue and expense (April 1984)
- K3* Total Canadian-owned chartered banks: Consolidated statement of shareholders' equity and appropriations for contingencies (February 1984)

D. Other financial institutions

- D1 Trust and mortgage loan companies: Quarterly statement of estimated assets and liabilities
- D2 Trust and mortgage loan companies excluding bank mortgage subsidiaries

Tableaux statistiques

Les astérisques (*) désignent les tableaux de la section K qui sont publiés à des fréquences variables. La date à laquelle ces tableaux ont été publiés la dernière fois est indiquée entre parenthèses.

A. Principaux indicateurs financiers et économiques

- A1 Principaux indicateurs financiers et économiques : Résumé analytique
- A2 Trésorerie du gouvernement canadien

B. Banque du Canada

- B1 Banque du Canada : Séries mensuelles
- B2 Banque du Canada : Séries hebdomadaires
- K1* Banque du Canada : Passif-billets (Février 1984)

C. Banques à charte

- C1 Banques à charte : Quelques éléments de l'actif — Séries hebdomadaires
- C2 Banques à charte : Quelques éléments du passif — Séries hebdomadaires
- C3 Banques à charte : Actif — Séries mensuelles
- C4 Banques à charte : Passif — Séries mensuelles
- C5 Banques à charte : Répartition régionale de l'actif
- C6 Banques à charte : Répartition régionale du passif
- C7 Banques à charte : Ventilation trimestrielle des prêts aux sociétés non financières et aux entreprises individuelles, par type de prêt et montant autorisé
- C8 Banques à charte : Ventilation trimestrielle des prêts non hypothécaires
- C9 Quelques statistiques bancaires désaisonnalisées : Avoirs et engagements des banques à charte
- C10 Banques à charte : Réserves-encaisse et réserves secondaires
- C11 Banques à charte : Avoirs et engagements en monnaies étrangères
- C12 Banques à charte : Avoirs et engagements en monnaies étrangères comptabilisés au Canada
- C13 Banques à charte : Avoirs et engagements en dollars américains comptabilisés au Canada
- K2* Ensemble des banques à charte à capital canadien : État consolidé des revenus et dépenses — Chiffres corrigés (Avril 1984)
- K3* Ensemble des banques à charte à capital canadien : État consolidé de l'avoir des actionnaires et des provisions pour éventualités (Février 1984)

D. Autres institutions financières

- D1 Sociétés de fiducie ou de prêt hypothécaire : Situation trimestrielle (estimations)
- D2 Sociétés de fiducie ou de prêt hypothécaire (non compris les filiales hypothécaires des banques à charte)

- D3 Mortgage loan companies associated with chartered banks: Monthly statement of estimated assets and liabilities
- D4 Local credit unions and caisses populaires: Quarterly statement of estimated assets and liabilities
- D5 Quebec savings banks
- K4* Deposits with government savings institutions (February 1984)
- D6 Sales finance and consumer loan companies: Quarterly statement of estimated assets and liabilities
- D7 Sales finance and consumer loan companies: Monthly statement of estimated assets and liabilities
- D8 Canadian investment transactions of sixteen life insurance companies
- K5* Life insurance companies: Assets held in Canada (October 1984)
- D9 Investment dealers: Weekly report on inventories of securities
- D10 Investment funds: Quarterly statement of estimated assets and liabilities
- D11 Closed-end funds: Quarterly statement of estimated assets and liabilities
- D12 Federal Business Development Bank
- K6* Trusteed pension plans (January 1984)

E. Financial aggregates

- E1 Selected indicators of money and credit
- K7* Monetary aggregates and credit measures (February 1984)
- E2 Consumer credit: Outstanding balances of selected holders
- E3 Residential mortgage credit: Outstanding balances of major private institutional lenders

F. Financial markets

- F1 Selected Canadian and international interest rates, including bond yields and interest arbitrage
- F2 Money market statistics 19
- F3 Estimated treasury bills and other short-term paper outstanding (excluding Government of Canada)
- F4 Stock market statistics: Canada and United States
- F5 Net new security issues placed in Canada and abroad
- F6 Net new security issues placed in Canada (includes foreign currency issues placed in Canada)
- F7 Net new security issues placed abroad (includes Canadian dollar issues placed in overseas markets)

- D3 Sociétés de prêt hypothécaire liées aux banques à charte : Situation mensuelle (estimations)
- D4 Caisses populaires et credit unions locales : Situation trimestrielle (estimations)
- D5 Banques d'épargne du Québec
- K4* Dépôts dans les caisses d'épargne publiques (Février 1984)
- D6 Sociétés de financement ou de prêt à la consommation : Situation trimestrielle (estimations)
- D7 Sociétés de financement ou de prêt à la consommation : Situation mensuelle (estimations)
- D8 Opérations d'investissement en dollars canadiens de seize compagnies d'assurance-vie
- K5* Compagnies d'assurance-vie : Avoirs détenus au Canada (Octobre 1984)
- D9 Courtiers en valeurs mobilières : Relevé hebdomadaire des stocks de titres
- D10 Sociétés de placement : Situation trimestrielle (estimations)
- D11 Sociétés d'investissement à capital fixe : Situation trimestrielle (estimations)
- D12 Banque fédérale de développement
- K6* Caisses de retraite gérées en fiducie (Janvier 1984)

E. Agrégats financiers

- E1 Indicateurs de l'évolution de la masse monétaire et du crédit
- K7* Agrégats monétaires et mesures du crédit (Février 1984)
- E2 Encours du crédit à la consommation consenti par les principaux prêteurs
- E3 Crédit hypothécaire à l'habitation : Encours des principales catégories d'institutions prêteuses du secteur privé

F. Marchés financiers

- F1 Statistiques diverses sur le loyer de l'argent au Canada et à l'étranger, y compris le taux de rendement des obligations
- F2 Statistiques du marché monétaire
- F3 Estimations de l'encours des bons du Trésor et des autres effets à court terme (non compris les titres du gouvernement canadien)
- F4 Statistiques boursières : Canada et États-Unis
- F5 Émissions nettes de titres placés au Canada et à l'étranger
- F6 Émissions nettes de titres placés au Canada (y compris les titres libellés en monnaies étrangères placés au Canada)
- F7 Émissions nettes de titres placés à l'étranger (y compris les titres libellés en dollars canadiens placés sur les marchés d'outre-mer)

- F8 Gross new bond issues and retirements: Government of Canada and provinces
- F9 Gross new bond issues and retirements: Municipalities
- F10 Gross new issues and retirements: Corporations, other institutions and foreign debtors
- F11 Net new issues of securities by financial and non-financial corporations
- K8* Bonds outstanding: Government of Canada, provincial, municipal, corporate and other bonds (October 1984)
- K9* Net new issues of corporate securities: Industrial classification (October 1984)

G. Government of Canada securities markets

- G1 Government of Canada direct and guaranteed marketable bonds: New issues and retirements
- G2 Government of Canada direct and guaranteed marketable bonds: Details of unmatured outstanding issues
- G3 Government of Canada direct and guaranteed securities and loans: Distribution of holdings
- G4 Government of Canada direct and guaranteed securities and loans: Distribution by type of holder
- G5 Government of Canada direct and guaranteed securities and loans: Classified by remaining term to maturity and type of asset
- G6 Government of Canada direct and guaranteed securities and loans: Holdings of general public classified by remaining term to maturity
- G7 Government of Canada direct and guaranteed marketable bonds: Prices and yields

H. General economic statistics

- H1 Population
- H2 National accounts
- H3 Gross national expenditure at constant prices
- H4 Gross national expenditure: Implicit price indexes
- H5 Gross domestic product of non-agricultural industries
- H6 Capacity utilization rates
- H7 Labour force status of the population
- H8 Labour force status of the population by region
- H9 Employment in non-agricultural establishments
- H10 Residential construction
- H11 Residential mortgage activity
- H12 Consumer price index
- H13 Other prices and costs
- H14 Other economic indicators

- F8 Émissions brutes d'obligations et remboursements : Gouvernement canadien et provinces
- F9 Émissions brutes d'obligations et remboursements : Municipalités
- F10 Émissions brutes de titres, remboursements et rachats : Sociétés, autres institutions et emprunteurs étrangers
- F11 Émissions nettes de titres : Sociétés financières ou non financières
- K8* Encours des obligations : Gouvernement canadien, provinces, municipalités, sociétés et autres emprunteurs (Octobre 1984)
- K9* Émissions nettes des sociétés : Répartition selon la branche d'activité économique (Octobre 1984)

G. Marchés des titres du gouvernement du Canada

- G1 Obligations négociables émises ou garanties par le gouvernement canadien : Émissions et remboursements
- G2 Obligations négociables émises ou garanties par le gouvernement canadien : Description des titres en circulation
- G3 Titres et emprunts émis ou garantis par le gouvernement canadien : Répartition des portefeuilles
- G4 Titres et emprunts émis ou garantis par le gouvernement canadien : Répartition par type de détenteur
- G5 Titres et emprunts émis ou garantis par le gouvernement canadien : Répartition par terme à courir et catégorie d'avoirs
- G6 Titres et emprunts émis ou garantis par le gouvernement canadien : Répartition, par terme à courir, des portefeuilles du public
- G7 Obligations négociables émises ou garanties par le gouvernement canadien : Cours et taux de rendement

H. Statistiques économiques diverses

- H1 Démographie
- H2 Comptes nationaux
- H3 Dépense nationale brute à prix constants
- H4 Dépense nationale brute : Indices synthétiques des prix
- H5 Produit intérieur brut du secteur non agricole
- H6 Taux d'utilisation des capacités
- H7 Répartition de la population active
- H8 Répartition de la population active par région
- H9 Emploi dans les entreprises non agricoles
- H10 Construction de logements
- H11 Opérations de prêt hypothécaire à l'habitation
- H12 Indice des prix à la consommation
- H13 Autres prix et coûts
- H14 Autres indicateurs économiques

I. Foreign exchange market and reserves

- I1 Exchange rates

*Data for consumer credit balances are now shown on an average-of month ends basis where applicable.

*A partir de maintenant, les données de l'encours du crédit à la consommation sont des moyennes de fins de mois lorsqu'il y a lieu.

Special features of a number of issues are as follows:

- a) Subject to partial redemption at par for the sinking fund on each interest payment date, commencing with 15 April 1965. The earliest call date is 15 October 1977.
- b) This item represents the cancellation of securities held by purchase funds.
- c) The earliest call date is 1 June 1978.
- d) Callable after 15 September 1996.
- e) On 18 March 1975 the Government of Canada announced that the 3% perpetual bonds will be redeemed at par on 15 September 1996.
- g) Callable after 1 October 1984.
- h) Callable after 1 April 1988.
- i) Callable after 15 October 1988.
- j) Callable after 20 March 1985.
- k) Exchangeable on or before 14 December 1984 into an equal par value of 133/4%, 15 March 1990.
- l) Exchangeable on or before 1 February 1985 into an equal par value of 13 1/2%, 1 May 1990.
- m) Exchangeable on or before 29 June 1984 into an equal par value of 12 1/2%, 1 October 1990.
- n) Exchangeable on or before 1 November 1985 into an equal par value of 12 1/2%, 1 February 1991.
- o) Exchangeable on or before 1 May 1984 into an equal par value of 13 3/4%, 1 August 1989.
- p) Exchangeable on or before 1 November 1984 into an equal par value of 13 1/4%, 1 February 1990.
- q) Exchangeable on or before 31 January 1986 into an equal par value of 14 1/2%, 1 May 1991.
- r) Exchangeable on or before 28 February 1986 into an equal par value of 15 1/4%, 1 June 1993.
- s) Exchangeable on or before 1 April 1986 into an equal par value of 14 3/4%, 1 July 1993.
- t) Exchangeable on or before 30 June 1986 into an equal par value of 18%, 1 October 1991.
- u) Exchangeable on or before 31 October 1986 into an equal par value of 15 1/2%, 1 February 1992.
- v) Exchangeable on or before 1 April 1987 into an equal par value of 15%, 1 July 1992.
- x) Exchangeable on or before 1 June 1987 into an equal par value of 14 1/4%, 1 September 1992.

Les renvois ci-dessous indiquent les particularités de certaines émissions :

- (a) Emprunt sujet à remboursement partiel par le fonds d'amortissement, au pair, aux dates d'échéance des coupons, à partir du 15 avril 1965; ne peut être remboursé intégralement par anticipation avant le 15 octobre 1977.
- (b) Annulation de titres détenus par le fonds de rachat.
- (c) Ces obligations ne peuvent être remboursées par anticipation avant le 1^{er} juin 1978.
- (d) Remboursables par anticipation après le 15 septembre 1996.
- (e) Le 18 mars 1975, le gouvernement canadien a annoncé que les rentes perpétuelles 3% seront remboursées à leur valeur nominale le 15 septembre 1996.
- (g) Remboursables par anticipation, après le 1^{er} octobre 1984.
- (h) Remboursables par anticipation, après le 1^{er} avril 1988.
- (i) Remboursables par anticipation, après le 15 octobre 1988.
- (j) Remboursables par anticipation, après le 20 mars 1985.
- (k) Échangeables, au plus tard le 14 décembre 1984, contre une valeur nominale égale d'obligation 133/4% échéant le 15 mars 1990.
- (l) Échangeables, au plus tard le 1^{er} février 1985, contre une valeur nominale égale d'obligation 13% échéant le 1^{er} mai 1990.
- (m) Échangeables, au plus tard le 29 juin 1984, contre une valeur nominale égale d'obligation 12 1/2% échéant le 1^{er} octobre 1990.
- (n) Échangeables, au plus tard le 1^{er} novembre 1985, contre une valeur nominale égale d'obligation 12 1/2% échéant le 1^{er} février 1991.
- (o) Échangeables, au plus tard le 1^{er} mai 1984, contre une valeur nominale égale d'obligation 13 3/4% échéant le 1^{er} août 1989.
- (p) Échangeables, au plus tard le 1^{er} novembre 1984, contre une valeur nominale égale d'obligation 13 1/4% échéant le 1^{er} février 1990.
- (q) Échangeables, au plus tard le 31 janvier 1986, contre une valeur nominale égale d'obligation 14 1/2% échéant le 1^{er} mai 1991.
- (r) Échangeables, au plus tard le 28 février 1986, contre une valeur nominale égale d'obligation 15 1/4% échéant le 1^{er} juin 1993.
- (s) Échangeables, au plus tard le 1^{er} avril 1986, contre une valeur nominale égale d'obligation 14 3/4% échéant le 1^{er} juillet 1993.
- (t) Échangeables, au plus tard le 30 juin 1986, contre une valeur nominale égale d'obligation 18% échéant le 1^{er} octobre 1991.
- (u) Échangeables, au plus tard le 31 octobre 1986, contre une valeur nominale égale d'obligation 15 1/2% échéant le 1^{er} février 1992.
- (v) Échangeables, au plus tard le 1^{er} avril 1987, contre une valeur nominale égale d'obligation 15% échéant le 1^{er} juillet 1992.
- (x) Échangeables, au plus tard le 1^{er} juin 1987, contre une valeur nominale égale d'obligation 14 1/4% échéant le 1^{er} septembre 1992.

*Users of these measures of capacity utilization are advised to refer to the discussion of them in the May 1980 issue of this Review "Measuring Capacity Utilization: A Technical Note". Particular attention should be paid to the discussion of how the data are to be evaluated and interpreted.

*Les utilisateurs des données des taux d'utilisation des capacités sont invités à se référer à l'étude qui a été publiée sur ce sujet dans la Revue de mai 1980 sous le titre : « Les méthodes d'estimation des taux d'utilisation des capacités ». Il convient d'accorder une attention particulière à l'analyse de la façon dont il faut évaluer et interpréter ces données.

Notes to the tables

Symbols used in charts and tables

| | |
|---|-------------------|
| A | arithmetic scale |
| L | logarithmic scale |
| E | estimated |
| P | preliminary |
| R | revised |
| N | not available |
| C | corrected |

Owing to the rounding of figures, components may not always add to the totals shown. A horizontal rule in the body of the table indicates either a break in the series or that the earlier figures are available only at a more aggregated level.

Cansim—Databank identification numbers

Many of the time series published in the Review are available from Statistics Canada in machine-readable form, for use on computers, or in print-outs. Each time series of annual, quarterly, monthly or weekly data on the Cansim system (Canadian Socio-Economic Information Management) has an identification number. Series maintained by Statistics Canada have D or L prefixes (e.g. D1432), those maintained by the Bank of Canada have a B prefix (e.g. B318) and those maintained by Canada Mortgage and Housing Corporation have a H prefix (e.g. H48). The identification number is given as a reference at the top of each column of data and refers to the series of weekly, monthly or quarterly data in that column. Where the frequency of a series as it is available on Cansim is different from that shown in the table or where a combination of quarterly and monthly data is shown in the table, the frequency of the Cansim series is indicated by a superscript M if monthly or by a superscript Q if quarterly. Current and revised data are entered into Cansim immediately on release.

Weekly series

The tables in the Review do not cover a full year of weekly data. For all Wednesday series, in the event a holiday falls on a Wednesday, data for the preceding business day will be shown. Figures for weekly series for which the Bank of Canada is the source are available on request to the Department of Monetary and Financial Analysis, Bank of Canada, Ottawa K1A 0G9.

Notes to the tables

The reference notes to the statistical tables in the Review, which prior to 1981 were included in each monthly issue, are now printed under a separate cover. The separate section of notes will be updated and reprinted at approximately yearly intervals. Additional copies of the explanatory notes may be obtained by writing to the Bank of Canada Review, Public Information Division, Secretary's Department, Bank of Canada, Ottawa K1A 0G9.

This section of the monthly Review will include only revisions to the notes as may be required to keep them current for users of the statistical tables, as well as the reference notes pertaining to tables that are published only occasionally in the Review.

Notes relatives aux tableaux

Abréviations utilisées dans les graphiques et les tableaux

| | |
|---|--------------------------|
| A | Échelle arithmétique |
| L | Ordonnées logarithmiques |
| E | Estimations |
| P | Chiffres provisoires |
| R | Chiffres révisés |
| N | Chiffres non disponibles |
| C | Chiffres corrigés |

Du fait que les chiffres sont arrondis, l'addition des éléments d'un tableau ne correspond pas toujours exactement au total indiqué. Une ligne horizontale dans le corps d'un tableau indique soit qu'il y a une rupture dans une série, soit que les données des périodes antérieures ne sont disponibles que sous une forme plus agrégée.

Cansim — Numéros de référence des séries de Databank

Nombre des séries chronologiques publiées dans la Revue peuvent être obtenues de Statistique Canada sous une forme directement exploitable par ordinateur ou sous la forme d'imprimés. Elles font partie intégrante du fichier Cansim¹, dont chaque série chronologique — annuelle, trimestrielle, mensuelle ou hebdomadaire — est identifiée par un numéro de référence. Les numéros des séries élaborées par Statistique Canada sont précédés de la lettre «D» ou «L» (par exemple : D1432), ceux des séries de la Banque du Canada, de la lettre «B» (par exemple : B318), et ceux de la Société canadienne d'hypothèques et de logement, de la lettre «H» (par exemple : H48). Dans nos tableaux, le numéro apparaît en tête de la colonne et identifie la série hebdomadaire, mensuelle ou trimestrielle qui figure dans la colonne; dans les cas où les fréquences de données figurant au fichier Cansim et dans un tableau de la Revue diffèrent ou lorsque le tableau comporte à la fois une série mensuelle et une série trimestrielle, la fréquence de la série Cansim est indiquée par la lettre «M» si la série est mensuelle et par la lettre «Q» si elle est trimestrielle.

¹ Ce sigle est une abréviation de *Canadian Socio-Economic Information Management System* — Système canadien de traitement des données socio-économiques.

Séries hebdomadaires

Dans les tableaux de la Revue, les séries de données hebdomadaires ne couvrent pas une année entière. Lorsque le mercredi est un jour férié, les statistiques du mercredi sont établies à partir des données du jour ouvrable précédent. On pourra obtenir les données provenant de la Banque du Canada en s'adressant au département des Études monétaires et financières, Banque du Canada, Ottawa K1A 0G9.

Notes relatives aux tableaux

Les notes relatives aux tableaux de la Revue, qui jusqu'à la fin de 1981 étaient reproduites dans chaque livraison, sont désormais imprimées séparément. Les éditions ultérieures seront mises à jour et publiées environ une fois par année. Ceux qui désirent recevoir d'autres exemplaires des notes sont priés de s'adresser à la Revue de la Banque du Canada, Section de l'information, Secrétariat, Banque du Canada, Ottawa K1A 0G9.

La présente section de la Revue ne contiendra que les mises à jour essentielles à l'interprétation des statistiques et les notes se rapportent aux tableaux publiés à des fréquences variables dans la Revue.

Bank of Canada Review

Revue de la Banque du Canada

Notes to the tables

Notes relatives aux tableaux

JANUARY 1985

JANVIER 1985

Notes to the tables

These explanatory notes to the tables in the Bank of Canada Review are printed under a separate cover and sent to all subscribers of the Review at approximately yearly intervals. Users should keep this copy of the notes for reference.

In the event the note to a table requires updating or changing throughout the year, that note will be printed in the regular monthly Review and will be carried in each issue until the next printing of the notes.

Subscribers who require additional copies of the notes may obtain these by writing to the Bank of Canada Review, Public Information Division, Secretary's Department, Bank of Canada, Ottawa, Canada K1A 0G9.

Notes relatives aux tableaux

Les notes relatives aux tableaux de la Revue de la Banque du Canada sont maintenant réunies dans une brochure distincte, qui est envoyée aux abonnés de la Revue à des intervalles d'environ un an. Les utilisateurs des statistiques correspondantes sont priés de conserver cette brochure pour consultation future.

Au cas où la note relative à un tableau doit être mise à jour ou modifiée au cours de l'année, elle sera imprimée dans le numéro régulier du mois et reprise dans toutes les livraisons suivantes jusqu'à la prochaine impression des notes.

Les abonnés qui désirent recevoir d'autres exemplaires des notes sont priés d'écrire à cet effet à la Revue de la Banque du Canada, Section de l'information, Secrétariat, Banque du Canada, Ottawa, Canada K1A 0G9.

Notes to the tables

Symbols used in charts and tables

| | |
|---|-------------------|
| A | arithmetic scale |
| L | logarithmic scale |
| E | estimated |
| P | preliminary |
| R | revised |
| N | not available |
| C | corrected |

Owing to the rounding of figures, components may not always add to the totals shown. A horizontal rule in the body of the table indicates either a break in the series or that the earlier figures are available only at a more aggregated level.

Cansim—Databank identification numbers

Many of the time series published in the Review are available from Statistics Canada in machine-readable form, for use on computers, or in print-outs. Each time series of annual, quarterly, monthly or weekly data on the Cansim system (Canadian Socio-Economic Information Management) has an identification number. Series maintained by Statistics Canada have D or L prefixes (e.g. D1432), those maintained by the Bank of Canada have a B prefix (e.g. B318) and those maintained by Canada Mortgage and Housing Corporation have a H prefix (e.g. H48). The identification number is given as a reference at the top of each column of data and refers to the series of weekly, monthly or quarterly data in that column. Where the frequency of a series as it is available on Cansim is different from that shown in the table or where a combination of quarterly and monthly data is shown in the table, the frequency of the Cansim series is indicated by a superscript M if monthly or by a superscript Q if quarterly. Current and revised data are entered into Cansim immediately on release.

Weekly series

The tables in the Review do not cover a full year of weekly data. For all Wednesday series, in the event a holiday falls on a Wednesday, data for the preceding business day will be shown. Figures for weekly series for which the Bank of Canada is the source are available on request to the Department of Monetary and Financial Analysis, Bank of Canada, Ottawa K1A 0G9.

A1

Data in this table are based on or derived from series published in the main statistical section of the Review. Except where noted seasonally adjusted data have been used. For those series where percentage rates of change are given, the time periods are as follows: change in annual average from preceding annual average; change in quarterly average from preceding quarter and change in average of latest three months from preceding three months at annual rates; monthly change at monthly rates. For each column in Table A1, a more detailed description of the data and the source table in the Review are given below.

Data for all monetary aggregates incorporate adjustments to take account of a number of discontinuities in November 1981 caused mainly by the changes associated with the 1980 Bank Act revision. Descriptions and measures of these adjustments are discussed in the article published in the March 1983 issue of the Bank of Canada Review.

Notes relatives aux tableaux

Abréviations utilisées dans les graphiques et les tableaux

| | |
|---|--------------------------|
| A | Échelle arithmétique |
| L | Ordonnées logarithmiques |
| E | Estimations |
| P | Chiffres provisoires |
| R | Chiffres révisés |
| N | Chiffres non disponibles |
| C | Chiffres corrigés |

Du fait que les chiffres sont arrondis, l'addition des éléments d'un tableau ne correspond pas toujours exactement au total indiqué. Une ligne horizontale dans le corps d'un tableau indique soit qu'il y a une rupture dans une série, soit que les données des périodes antérieures ne sont disponibles que sous une forme plus agrégée.

Cansim — Numéros de référence des séries de Databank

Nombre des séries chronologiques publiées dans la Revue peuvent être obtenues de Statistique Canada sous une forme directement exploitable par ordinateur ou sous la forme d'imprimés. Elles font partie intégrante du fichier Cansim¹, dont chaque série chronologique — annuelle, trimestrielle, mensuelle ou hebdomadaire — est identifiée par un numéro de référence. Les numéros des séries élaborées par Statistique Canada sont précédés de la lettre «D» ou «L» (par exemple : D1432), ceux des séries de la Banque du Canada, de la lettre «B» (par exemple : B318), et ceux de la Société canadienne d'hypothèques et de logement, de la lettre «H» (par exemple : H48). Dans nos tableaux, le numéro apparaît en tête de la colonne et identifie la série hebdomadaire, mensuelle ou trimestrielle qui figure dans la colonne; dans les cas où les fréquences de données figurant au fichier Cansim et dans un tableau de la Revue diffèrent ou lorsque le tableau comporte à la fois une série mensuelle et une série trimestrielle, la fréquence de la série Cansim est indiquée par la lettre «M» si la série est mensuelle et par la lettre «Q» si elle est trimestrielle.

¹ Ce sigle est une abréviation de *Canadian Socio-Economic Information Management System* — Système canadien de traitement des données socio-économiques.

Séries hebdomadaires

Dans les tableaux de la Revue, les séries de données hebdomadaires ne couvrent pas une année entière. Lorsque le mercredi est un jour férié, les statistiques du mercredi sont établies à partir des données du jour ouvrable précédent. On pourra obtenir les données provenant de la Banque du Canada en s'adressant au département des Études monétaires et financières, Banque du Canada, Ottawa K1A 0G9.

A1

Les données de ce tableau sont tirées des séries publiées dans la section statistique de la Revue et, sauf indication contraire, elles sont dérivées de données désaisonnalisées. Dans le cas des séries pour lesquelles la variation est indiquée en pourcentage, il s'agit de taux annuels, lorsqu'on compare la moyenne d'une année à celle de l'année précédente ou la moyenne d'un trimestre à celle du trimestre précédent ou encore la moyenne des trois derniers mois à celle des trois mois précédents, tandis qu'il s'agit de taux mensuels lorsqu'on compare les chiffres d'un mois à ceux du mois précédent. On trouvera ci-dessous, pour chaque colonne de données reproduites au Tableau A1, une description détaillée des données et le numéro du tableau de la Revue d'où proviennent les chiffres de base.

Les données de tous les agrégats monétaires ont été ajustées pour tenir compte des ruptures survenues en novembre 1981 par suite surtout des modifications découlant de la révision de 1980 de la Loi sur les banques.

1 Currency outside banks and chartered bank Canadian dollar demand deposits (less private sector float) excluding Government of Canada deposits (M1); average of Wednesdays. (Table E1)

2 M1 plus daily interest chequable deposits plus non-personal notice accounts (M1A); average of Wednesdays. (Table E1)

3 M1A plus other notice deposits plus personal fixed-term deposits (M2); average of Wednesdays. (Table E1)

4 M2 plus non-personal fixed-term deposits plus foreign currency deposits of residents booked in Canada (M3); average of Wednesdays. (Table E1)

5 Chartered bank general loans; averages of Wednesdays. (Table C9)

6 Chartered bank total Canadian dollar major assets; averages of Wednesdays. (Table C9)

7 Change in outstanding balances of selected holders of consumer credit reporting monthly; millions of dollars at end of period. (Table E2)

8 Change in outstanding balances of chartered bank total personal loans; millions of dollars at end of period. (Table E2)

9 Gross national product in current prices. (Table H2)

10 Gross national product at constant (1971) prices. (Table H3)

11 Gross domestic product of non-agricultural industries; 1971 = 100. (Table H5)

12 Index of industrial production; 1971 = 100. (Table H14)

13 Index of manufacturing production; 1971 = 100. (Table H5)

14 Gross national expenditure implicit price index; 1971 = 100. (Table H4)

15 Consumer price index excluding food; 1981 = 100. (Table H12)

16 Index of non-farm commercial wages and salaries per unit of output; 1971 = 100. (Table H13)

17 Total labour income including supplementary income. (Table H14)

19 Corporate profits before taxes. (Table H2)

20 Civilian labour force. (Table H7)

21 Civilian employment as per labour force survey. (Table H7)

22 Personal expenditures on goods and services. (Table H2)

23 Government expenditures on goods and services. (Table H2)

24 Business fixed investment expenditure on non-residential construction and machinery and equipment. (Table H2)

25 Change in manufacturers' owned inventories, millions of dollars at end of period. (Table H14)

26 Estimated housing starts, all areas. (Table H10)

27 Total number of passenger car sales. (Table H14)

28 Retail trade excluding sales of new and used car dealers. (Table H14)

29 Merchandise exports, balance of payments basis (Table J4)

30 Merchandise imports, balance of payments basis (Table J4)

31 Canadian dollar financing requirements of the Government of Canada in millions of dollars for 12 months ending with quarter or month. (Table A2)

32 Average yield on 91-day treasury bills at Thursday tender. (Table F1)

33 Average yield on Government of Canada long-term bonds, with a maturity of 10 years or more. (Table F1)

34 Ratio of chartered bank Canadian liquid assets to total Canadian dollar major assets. (Table C9)

35 Unemployment as a percentage of the labour force. (Table H7)

36 Year-to-year percentage change in consumer price index. (Table H12)

37 Merchandise trade balance, balance of payments basis, millions of dollars. (Table J2)

38 Current account balance, balance of payments basis, millions of dollars. (Table J2)

39 Change in official international reserves in millions of U.S. dollars. (Table I3)

40 U.S. dollar in Canadian funds, average noon spot rate. (Table I1)

On trouvera une description et une évaluation de ces ajustements dans l'article publié dans la livraison de mars 1983 de la Revue de la Banque du Canada.

1 Monnaie hors banques et dépôts à vue en dollars canadiens dans les banques à charte (moins effets du secteur privé en cours de compensation), dépôts du gouvernement canadien exclus (M1); moyennes des mercredis (Tableau E1)

2 M1 plus les dépôts à intérêt quotidien transférables par chèques et les dépôts à préavis autres que ceux des particuliers (M1A); moyennes des mercredis (Tableau E1)

3 M1A plus autres dépôts à préavis et les dépôts à terme fixe des particuliers (M2); moyennes des mercredis (Tableau E1)

4 M2 plus les dépôts à terme fixe autres que ceux des particuliers et les dépôts en monnaies étrangères comptabilisés au Canada au nom des résidents (M3); moyennes des mercredis (Tableau E1)

5 Prêts généraux consentis par les banques à charte; moyennes des mercredis (Tableau C9)

6 Ensemble des principaux avoirs en dollars canadiens des banques à charte; moyennes des mercredis (Tableau C9)

7 Variation de l'encours du crédit à la consommation consenti par les principaux prêteurs, données mensuelles; en millions de dollars, en fin de période (Tableau E2)

8 Variation de l'encours de l'ensemble des prêts personnels consentis par les banques à charte; en millions de dollars, en fin de période (Tableau E2)

9 Produit national brut à prix courants (Tableau H2)

10 Produit national brut à prix constants (1971) (Tableau H3)

11 Produit intérieur brut du secteur non agricole; 1971 = 100 (Tableau H5)

12 Indice de la production industrielle; 1971 = 100 (Tableau H14)

13 Indice de la production manufacturière; 1971 = 100 (Tableau H5)

14 Dépense nationale brute; indice synthétique des prix; 1971 = 100 (Tableau H4)

15 Indice des prix à la consommation, alimentation exclue; 1981 = 100 (Tableau H12)

16 Indice des salaires et traitements par unité produite dans les entreprises commerciales non agricoles; 1971 = 100 (Tableau H13)

17 Revenu total du travail, y compris les revenus supplémentaires (Tableau H14)

19 Bénéfices des sociétés avant impôts (Tableau H2)

20 Population active civile (Tableau H7)

21 Personnes ayant un emploi, d'après l'enquête sur la population active (militaires exclus) (Tableau H7)

22 Consommation des ménages en biens et en services (Tableau H2)

23 Dépenses publiques en biens et en services (Tableau H2)

24 Investissements fixes des entreprises en construction (logements exclus), en machines et en équipement (Tableau H2)

25 Variation des stocks des fabricants; en millions de dollars, en fin de période (Tableau H14)

26 Logements mis en chantier, toutes régions — estimations (Tableau H10)

27 Nombre de voitures particulières vendues (Tableau H14)

28 Commerce de détail, non compris les ventes d'automobiles effectuées par les concessionnaires et les marchands de voitures d'occasion (Tableau H14)

29 Exportations sur la base de la balance des paiements (Tableau J4)

30 Importations sur la base de la balance des paiements (Tableau J4)

31 Besoins de trésorerie en dollars canadiens du gouvernement canadien (en millions de dollars, périodes de 12 mois se terminant à la fin du trimestre ou du mois) (Tableau A2)

32 Rendement moyen des bons du Trésor à 91 jours, à l'adjudication du jeudi (Tableau F1)

33 Rendement moyen des obligations à long terme du gouvernement canadien, échéance à 10 ans ou plus (Tableau F1)

34 Banques à charte : Avoirs liquides canadiens, en pourcentage de l'ensemble des principaux avoirs en dollars canadiens (Tableau C9)

35 Taux de chômage, en pourcentage de la population active (Tableau H7)

36 Taux de variation de l'indice des prix à la consommation par rapport à l'année précédente (Tableau H12)

37 Balance commerciale sur la base de la balance des paiements, en millions de dollars (Tableau J2)

38 Paiements courants sur la base de la balance des paiements, en millions de dollars (Tableau J2)

39 Variation des réserves officielles de change, en millions de dollars É.-U. (Tableau I3)

40 Moyenne des cours au comptant du dollar É.-U. en dollars canadiens à midi (Tableau I1)

A2

Sources: Supply and Services Canada, Statistics Canada, Bank of Canada

This table provides a summary of the transactions affecting the fiscal position of the Government of Canada, the net financing requirement and the sources of funds used to meet the financing requirement. Data for the first part are compiled from the Statistics Canada publication "National Income and Expenditure Accounts", Catalogue 13-001. Data for the second part are compiled from the "Statement of Financial Operations" published in the Canada Gazette. Data revisions have been incorporated where possible to be consistent with subsequent publications of the "Public Accounts of Canada". The government's supplementary period transactions are included in the March figures. Because of changes in accounting concepts and practices, comparable data for these Public Accounts series are not available prior to 1976. Canada Post Corporation came into existence on 16 October 1981 and data from fiscal 1982 have been adjusted for this effect. These revisions have no net effect on the budgetary position of the government.

The data in the third part of the table are compiled by the Bank of Canada; the series are derived mainly from Table G3 in the Review as well as from Tables B1, C4 and D5.

- *Direct taxes on persons* also include transfers from persons to the federal government.
- *Other taxes* (3) include various excise taxes and duties. • *Non-tax revenue* (4) includes mainly returns on investments and postal revenues. • *Loans, investments and advances* (8) show effect on Consolidated Revenue Fund of net appropriations to (–) or net repayments from (+) various entities such as Crown corporations, provincial, territorial and foreign governments, and private sector enterprises. • *Specified purpose accounts* (9) includes the net receipts or disbursements of the Canada Pension Plan, Unemployment Insurance, various government superannuation and annuity accounts, provincial tax collection agreement account, deposit and trust and other accounts. • *Other non-budgetary transactions* (10) are comprised of the net source of requirement arising from such asset or liability accounts as "interest and matured debt", accounts payable, outstanding cheques, cash in transit and miscellaneous accounts. • *Requirement for foreign exchange transactions* (13) reflects the net effect of changes in those foreign assets and foreign liabilities that are financial claims and obligations of the government. The most important type of transaction resulting in an increase or decrease in the Canadian dollar financing requirement is an advance from the Consolidated Revenue Fund to the Exchange Fund Account or the repayment of such an advance.

- *Net Canadian dollar financing requirement* (15) is identical to the total requirement shown in column 14, with the sign reversed. • *Reduction or increase in Canadian dollar cash balances* (16) is the sum of changes in the Government of Canada's balances at the Bank of Canada and with directly clearing members of the Canadian Payments Association. Prior to December 1983 the balances were held at the Bank of Canada, the chartered banks and Quebec savings banks. This series differs from the figures shown in the Public Accounts in that it excludes small foreign currency balances and a few minor special deposits. • The data on *other sources of financing* to meet the Canadian dollar requirement (20) are determined residually by subtracting columns 16-19 from column 15. They mainly represent: changes in the holdings of government securities by Government of Canada accounts as defined in the notes to Table G3 in the Review; and changes in the government's matured debt outstanding which are excluded from the Public Accounts. There are also slight differences in the definition of government cash balances and of government accounts, as well as in the recording of Canada Savings Bond transactions.

A2

Sources : Approvisionnement et Services Canada, Statistique Canada, Banque du Canada

Ce tableau retrace, sous une forme simplifiée, l'évolution de la trésorerie du gouvernement canadien, les besoins nets de financement ainsi que la provenance des ressources financières utilisées pour couvrir ces besoins. Les données figurant dans la première partie sont tirées des « Comptes nationaux des revenus et dépenses » de Statistique Canada, n° de catalogue 13-001. Les données fournies dans la seconde partie sont tirées de l'« État des opérations financières » publié dans la Gazette du Canada. Lorsqu'il était possible de le faire, les données ont été mises à jour afin qu'elles tiennent compte des éditions plus récentes des « Comptes publics du Canada ». Les transactions effectuées par le gouvernement au cours de la période supplémentaire figurent dans les données de mars. En raison des modifications apportées aux concepts et pratiques comptables, il n'existe pas, pour la période antérieure à 1976, de statistiques de ces comptes du secteur public qui soient comparables à celles de la période postérieure. La Société canadienne des postes a commencé ses opérations le 16 octobre 1981, et les données de l'exercice budgétaire 1982 ont été corrigées en conséquence. Les révisions effectuées n'ont pas eu, en termes nets, d'incidence sur la situation budgétaire du gouvernement.

Les données contenues dans la troisième partie du tableau proviennent de la Banque du Canada; les séries sont principalement tirées du Tableau G3 de la Revue et des Tableaux B1, C4 et D5.

- *Impôts directs sur le revenu des particuliers*. Comprennent également les transferts des particuliers au gouvernement. • *Autres impôts* (3). Comprennent divers droits et taxes d'accise. • *Recettes autres que les impôts* (4). Il s'agit surtout du rendement des placements et des recettes des Postes. • *Prêts, placements et avances* (8). Les chiffres de cette colonne montrent l'incidence sur le Fonds du revenu consolidé des affectations nettes de crédits (–) à diverses entités telles que les sociétés de la Couronne, les administrations provinciales et territoriales, les gouvernements étrangers et les entreprises du secteur privé ou des remboursements nets (+) provenant de ces entités. • *Sont comptabilisées aux comptes à fins déterminées* (9) les entrées ou les sorties nettes de fonds du Régime de pensions du Canada, de l'Assurance-chômage et de diverses caisses de retraite et de rentes du gouvernement. Il en est de même des mouvements des comptes servant à la perception des impôts conformément aux accords fiscaux, des mouvements des comptes de dépôt, des comptes en fiducie et d'autres comptes. • *Autres opérations non budgétaires* (10). Il s'agit des sources ou des besoins nets de financement que constituent des comptes d'actif ou de passif tels que les comptes « intérêts et dette échue », créditeurs, chèques en circulation et fonds en cours de compensation ainsi que divers autres comptes. • *Besoins de financement des opérations de change* (13). Cette colonne montre l'incidence nette des variations des avoirs et engagements en monnaies étrangères qui constituent des créances et des obligations financières pour le gouvernement. Les avances versées par le Fonds du revenu consolidé au Compte du fonds des changes ou les remboursements de ces avances constituent la principale catégorie de transactions qui font croître ou diminuer les besoins de trésorerie en dollars canadiens.

- *Besoins nets de trésorerie en dollars canadiens* (15). Les chiffres de cette colonne sont identiques à ceux qui figurent à la colonne 14, sauf qu'ils sont exprimés avec le signe inverse. • *Réduction ou augmentation des dépôts en dollars canadiens* (16). Cette colonne représente le total des variations des dépôts du gouvernement à la Banque du Canada, ainsi que chez les membres adhérents de l'Association canadienne des paiements. Avant décembre 1983, les fonds étaient détenus à la Banque du Canada, dans les banques à charte et dans les banques d'épargne du Québec. Les données de cette série diffèrent de celles qui figurent dans les Comptes publics en ce qu'elles ne tiennent pas compte des dépôts en devises et de quelques dépôts spéciaux de faible valeur. • *Autres sources du financement nécessaire à la couverture des besoins de trésorerie en dollars canadiens* (20). Les données contenues dans cette colonne représentent la différence obtenue par soustraction du total des colonnes 16 à 19 du nombre figurant à la colonne 15. Ces données reflètent surtout les variations des portefeuilles de titres du gouvernement qui se trouvent dans les comptes du gouvernement canadien tels qu'ils sont définis dans les notes relatives au Tableau G3 de la Revue et les variations de l'encours de la dette échue contractée par le gouvernement qui sont exclues des comptes publics. La définition des dépôts en dollars du gouvernement et des comptes du gouvernement et la méthode de comptabilisation des transactions relatives aux obligations d'épargne du Canada diffèrent également quelque peu dans les deux cas.

B1–B2

Source: Bank of Canada

The Bank of Canada commenced operations in March 1935 under the terms of the Bank of Canada Act of 1934. Data for the month-end series (Table B1) are available from the commencement of operations and for the Wednesday series (Table B2), from 1954. The statement of assets and liabilities, presented in the tables, follows in general the form presented in the Bank of Canada Act. Information on chartered bank cash reserves can be found in Table C10 and on the money market in Table F2.

• *Government of Canada direct and guaranteed securities* held by the Bank are purchased in the open market from investment dealers and chartered banks, or directly from the Receiver General for Canada. • *Purchase and resale agreements* (PRA) are arrangements whereby the Bank of Canada provides temporary accommodation to investment dealers. (A fuller description of purchase and resale agreements can be found in the notes to Table F2.) • *Other bills* are purchased by the Bank of Canada from time to time in conjunction with its open market operations. Prior to December 1980 they were also eligible for purchase and resale agreements with investment dealers. • *Advances to members of the Canadian Payments Association (CPA)*. Prior to 1 December 1980, these were made only to chartered and Quebec savings banks. • *Investment in the Industrial Development Bank (IDB)* prior to 2 October 1975 represents the capital stock and debentures of the IDB. At that date the Federal Business Development Bank began operations (see notes to Table D12) and the capital stock of the IDB was purchased at par by the Government of Canada. • *Other investments* comprise mainly holdings of U.S. dollar denominated securities. • *All other assets* (Table B1) comprise principally Bank premises and equipment. In Table B2, cheques on other banks, Government of Canada items in transit (net) and accrued interest on investments are also included in all other assets.

• *Notes in circulation* include notes held by the chartered banks and by the general public. The total includes a small amount of notes issued by governments and banks before the Bank of Canada became the sole issuer of notes in circulation in Canada and took over the liability for these early notes from their original issuers. • *Canadian dollar deposits of the Government of Canada*. This is the deposit account used by the Receiver General for Canada for current requirements. Receipts and disbursements made by the Bank of Canada in performing its fiscal agency functions for the government are handled through this account. The Receiver General for Canada also maintains deposit accounts with the direct clearers of the Canadian Payments Association. • *Deposits of the chartered banks* represent that portion of their cash reserves held in this form. The chartered banks are required under section 208 of the Bank Act to maintain minimum cash reserves in the form of notes of, or deposits with, the Bank of Canada, and coin, against certain Canadian dollar and foreign currency deposit liabilities. See notes to Table C10 for a fuller description of reserve requirements. • *Other Canadian dollar deposits* (Table B1) include privately owned balances transferred by the chartered and savings banks because they have been unclaimed for ten years. Prior to February 1983 this item also included deposits of the Quebec savings banks. In Table B2, the accounts of Government of Canada enterprises, foreign central banks and official institutions are also included. • *Foreign currency liabilities* include balances maintained by the federal government and by other central banks. • *All other liabilities* (Table B1) include the profit of the Bank of Canada net of expenses and the total of the paid-up capital and the rest fund, which has amounted to \$30 million since 31 December 1955. At this date, the rest fund reached the maximum permitted under the Bank of Canada Act of five times the paid-up capital. Since then, all profits have been remitted to the Receiver General for Canada. In Table B2, Bank of Canada cheques outstanding and Government of Canada items in transit (net) are also included in all other liabilities.

B1 et B2

Source : Banque du Canada

La Banque du Canada a commencé ses opérations en mars 1935, conformément aux dispositions de la Loi de 1934 sur la Banque du Canada. Les données de fin de mois (Tableau B1) remontent à 1935 et celles du mercredi (Tableau B2), à 1954. La ventilation de l'actif et du passif de la Banque dans ces deux tableaux suit dans l'ensemble celle que l'on trouve dans la Loi sur la Banque du Canada. On trouvera au Tableau C10 les données concernant les réserves-encaisse des banques à charte et au Tableau F2, celles du marché monétaire.

• *Titres émis ou garantis par le gouvernement canadien*. La Banque du Canada achète ces titres, soit dans le cadre de ses opérations d'open-market avec les banques à charte ou les courtiers en valeurs mobilières, soit directement du Receveur général du Canada. • *Prises en pension*. Opérations par lesquelles la Banque du Canada accorde des facilités de caisse, à titre temporaire, à des courtiers en valeurs mobilières. (On trouvera d'autres détails à ce sujet dans les notes relatives au Tableau F2.) • *Autres bons*. La Banque du Canada acquiert de temps à autre des acceptations bancaires dans le cadre de ses opérations d'open-market. Avant décembre 1980, ces titres pouvaient aussi être utilisés dans le cadre d'opérations de prises en pension avec les courtiers en valeurs mobilières. • *Avances aux membres de l'Association canadienne des paiements* (ACP). Jusqu'au 1^{er} décembre 1980, ces avances n'étaient consenties qu'aux banques à charte et aux banques d'épargne du Québec. • *Titres de la BEI*. Ce poste comprenait le capital-actions et les débentures de la Banque d'expansion industrielle jusqu'au 2 octobre 1975, date à laquelle la Banque fédérale de développement a commencé ses opérations (voir note au Tableau D12). Les actions de la BEI ont alors été achetées à leur valeur nominale par le gouvernement canadien. • *Autres placements*. Ce poste comprend principalement les titres libellés en dollars É.-U. • *Autres éléments de l'actif*. Comprennent notamment, au Tableau B1, les immeubles et l'équipement; comprennent en outre, au Tableau B2, les chèques sur d'autres banques, le solde net des effets du gouvernement canadien en cours de compensation et l'intérêt couru sur le portefeuille.

• *Billets en circulation*. Ce poste comprend les billets de la Banque du Canada détenus par les banques à charte et par le public. Comprend également un montant peu considérable de billets émis par les gouvernements et les banques au temps où le privilège d'émission n'était pas réservé exclusivement à la Banque du Canada et qui sont encore en circulation. La Banque du Canada est chargée de racheter ces billets pour le compte des émetteurs.

• *Dépôts du gouvernement canadien en dollars canadiens*. Compte utilisé par le Receveur général du Canada pour effectuer ses opérations courantes. Les encaissements et les paiements effectués par la Banque du Canada à titre d'agent financier du gouvernement canadien sont enregistrés à ce compte. Le Receveur général du Canada a également des dépôts chez des membres adhérents de l'Association canadienne des paiements. • *Dépôts des banques à charte*. Représentent la partie de leurs réserves-encaisse qu'elles détiennent sous forme de dépôts à la banque centrale. En vertu de l'article 208 de la Loi sur les banques, les banques à charte sont tenues de maintenir, sous forme de pièces de monnaie, de billets de la Banque du Canada ou de dépôts à cette institution, une réserve-encaisse minimale, calculée en pourcentage de certains dépôts en dollars canadiens et en monnaies étrangères. On trouvera à la note au Tableau C10 une description plus complète des exigences en matière de réserves. • *Autres dépôts en dollars canadiens*. Comprennent, au Tableau B1, les comptes et autres effets transférés à la Banque du Canada par les banques à charte et les banques d'épargne, parce que non réclamés depuis dix ans. Avant février 1983, ce poste comprenait aussi les dépôts des banques d'épargne du Québec. Comprennent en outre, au Tableau B2, les dépôts des entreprises du gouvernement canadien, d'autres banques centrales et d'organismes officiels étrangers. • *Engagements en monnaies étrangères*. Comprennent les dépôts en devises maintenus par le gouvernement canadien et par d'autres banques centrales. • *Autres éléments du passif*. Comprennent, au Tableau B1, le capital versé et le Fonds de réserve de la Banque — dont l'ensemble se chiffre à 30 millions de dollars — plus les bénéfices depuis le début de l'exercice, après déduction des dépenses. La Loi sur la Banque du Canada prévoit que le Fonds de réserve ne doit pas dépasser cinq fois le montant du capital versé; ce maximum a été atteint le 31 décembre 1955 et tous les bénéfices réalisés par la suite ont été versés chaque année au Receveur général du Canada. Au Tableau B2, ce poste comprend en outre les chèques de la Banque en circulation, ainsi que le solde net des effets du gouvernement canadien en cours de compensation.

C1–C13

Source: Bank of Canada

Canada's commercial banking system is comprised of privately owned banks which have been chartered by Parliament or have received letters patent by Order-in-Council as provided for in the 1980 Bank Act. This Act provided for Canadian financial institutions affiliated with foreign banks to become incorporated as Canadian banks and allowed the establishment of new foreign-owned banks in Canada. As at 31 October 1984, there were 58 foreign banks which had received letters patent following this revision. The banks operate under the terms and provisions of this Act, which defines their range of activities and regulates certain internal aspects of their operations as well as their relationship with the government and the Bank of Canada. Under the Act, the banks are required to submit reports on their operations to the Minister of Finance and the Bank of Canada. The data in Tables C1–C13 and E1 are based on these reports and comprise the principal banking statistics. Weekly data are also reported in the "Weekly Financial Statistics" issued by the Bank of Canada. Information on chartered bank deposit and lending rates can be found in Table F1. It has been the practice to revise the Bank Act at approximately ten-year intervals. The most recent revision was in 1980. As a result of these revisions, as well as periodic changes in regulations and changes in the structure of the industry due to mergers, earlier data are not always strictly comparable. Users are referred to the notes to the tables in the December 1982 and earlier issues of this Review for a description of the impact on the data of the 1967 Bank Act revisions. Coincident with the 1980 Bank Act revision, the reporting system was substantially revised and the new system was implemented on 1 November 1981. The level of consolidation and the treatment of accrued interest were two of the more significant changes. Users should refer to the article in the November 1981 issue of the Review for an overview of the changes. Changes that have affected the data published here are described in the following notes.

C1–C4

Source: Bank of Canada

Total chartered bank assets and liabilities at month-end from November 1981, which in general are classified according to the form set out in Schedule J of the 1980 Bank Act, are summarized in Tables C3 and C4. Earlier month-end data collected on Schedule M of the 1967 Bank Act are available in the December 1982 and earlier issues of this Review. Information on major assets and liabilities, submitted weekly to the Bank of Canada, is given in Tables C1 and C2. From November 1981 data in Tables C1 and C2 consolidate all wholly and majority owned subsidiaries of the chartered banks and accrued interest is not included in the various asset and liability items but rather is included in "other assets" and "other liabilities". Prior to this date, the data consolidated only foreign wholly owned banking subsidiaries and accrued interest was included on an item-by-item basis. Treasury bills are shown at amortized value in Table C1 beginning November 1981; prior to this date they were valued at par. Certain personal loans have been reclassified into business loans, resulting in a reduction in personal loans and an increase in business loans of approximately \$900 million in November 1981. Data for the month-end series are available from January 1926 and for Wednesday series from August 1953. Additional information on chartered bank assets and liabilities can be found in Tables C5–C13. Information on chartered bank deposit and loan rates can be found in Table F1.

La Banque Populaire (previously a savings bank, La Banque d'Économie de Québec) commenced operations as a chartered bank on 10 November 1969. As a result, Canadian dollar deposits of the chartered banks at 30 November 1969 were increased by \$66 million. The principal asset items affected were general loans, other residential mortgages and provincial and municipal securities. La Banque Populaire merged with La Banque Provinciale du Canada in August 1970. In June 1977 the Unity Bank of Canada amalgamated with La Banque Provinciale du Canada and in November 1979 La Banque Provinciale du Canada merged with La Banque Canadienne Nationale to become the National Bank of Canada. On 4 June 1979 the Continental Bank of Canada began

C1 à C13

Source : Banque du Canada

Le système bancaire commercial canadien est formé de banques du secteur privé, qui ont reçu une charte du Parlement ou des lettres patentes délivrées par arrêté en conseil conformément aux dispositions de la Loi sur les banques de 1980. Cette loi stipule que les institutions financières canadiennes affiliées à des banques étrangères peuvent obtenir le statut de banques canadiennes et autorise l'établissement de nouvelles banques étrangères au Canada. Au 31 octobre 1984, 58 banques étrangères avaient reçu leurs lettres patentes en conformité des nouvelles dispositions de la Loi. La Loi sur les banques, qui régit le fonctionnement de ces établissements, définit le champ de leurs activités et règle certaines modalités de leurs opérations, ainsi que la nature de leurs relations avec le gouvernement canadien et la Banque du Canada. En vertu de cette loi, les banques sont tenues de remettre périodiquement au ministre des Finances et à la Banque du Canada des rapports sur leurs opérations. Les données des Tableaux C1 à C13 et E1 ont été tirées de ces rapports et sont la source des principales statistiques bancaires. Les données hebdomadaires sont également publiées dans le « Bulletin hebdomadaire de statistiques financières » de la Banque du Canada. On trouvera au Tableau F1 des données sur les taux d'intérêt créditeurs et débiteurs pratiqués par les banques à charte. Traditionnellement, la Loi sur les banques est révisée environ tous les dix ans, la dernière révision datant de 1980. Par suite de ces révisions, des modifications périodiques de la réglementation et aussi des changements structurels du système bancaire consécutifs à des fusions, les données ne sont pas toujours absolument comparables d'une période à l'autre. Les utilisateurs trouveront, dans les notes relatives aux tableaux parues dans la livraison de décembre 1982 et dans les numéros précédents de la Revue, une description des répercussions que les révisions apportées en 1967 à la Loi sur les banques ont eues sur les données. Parallèlement à la révision de la Loi sur les banques de 1980, le système de relevés a été considérablement modifié; le nouveau système est entré en vigueur le 1^{er} novembre 1981. Le mode de comptabilisation de l'intérêt couru et le niveau de consolidation constituent deux des plus importants changements. Les utilisateurs de ces données trouveront dans la livraison de novembre 1981 un article contenant une explication détaillée de ces changements. Les notes qui suivent retracent les principaux changements de cette nature qui ont influé sur les données reproduites dans ces tableaux.

C1 à C4

Source : Banque du Canada

Depuis novembre 1981, les Tableaux C3 et C4, qui résument la situation des banques à charte en fin de mois, suivent dans l'ensemble la ventilation de l'Annexe J de la Loi sur les banques de 1980. Les données de fin de mois pour la période antérieure, qui étaient déclarées selon le modèle de l'Annexe M de la Loi sur les banques de 1967, sont reproduites dans la livraison de décembre 1982 et dans les numéros précédents de la Revue. Les Tableaux C1 et C2 groupent les chiffres, déclarés par les banques chaque semaine, des principaux postes de leur bilan. À partir de novembre 1981, les données des Tableaux C1 et C2 sont des données consolidées de l'ensemble des banques à charte et des filiales dont elles possèdent l'intégralité ou la majorité des actions, et l'intérêt couru n'est pas compris dans les divers postes de l'actif ou du passif, mais dans les autres éléments de l'actif et les autres éléments du passif. Auparavant, seules les données des filiales bancaires en propriété exclusive détenues à l'étranger étaient consolidées, et l'intérêt couru était, dans chaque cas, compris dans les chiffres du poste concerné. Les bons du Trésor qui, jusqu'à novembre 1981, figuraient au Tableau C1 à leur valeur nominale y sont comptabilisés actuellement à leur valeur amortie. En novembre 1981, certains prêts qui figuraient sous la rubrique des prêts aux particuliers ont été groupés avec les prêts commerciaux; il en est résulté une baisse des prêts aux particuliers et une augmentation des prêts commerciaux de l'ordre de 900 millions de dollars. Les Tableaux C3 et C4 (données de fin de mois) remontent à janvier 1926 et les Tableaux C1 et C2 (données du mercredi), à août 1953. On trouvera aux Tableaux C5 à C13 d'autres détails sur divers postes du bilan des banques à charte et au Tableau F1 des données sur les taux d'intérêt créditeurs et débiteurs pratiqués par les banques.

Le 10 novembre 1969, la Banque d'Économie de Québec, jusque-là banque d'épargne, est devenue banque à charte sous le nom de Banque Populaire. Cette transformation s'est traduite par une augmentation de 66 millions de dollars des dépôts en dollars canadiens dans les banques à charte au 30 novembre 1969; la contrepartie à l'actif se trouve essentiellement aux postes suivants : Prêts généraux, Autres prêts hypothécaires à l'habitation, Titres des provinces et des municipalités. La Banque Populaire a été absorbée par La Banque Provinciale en août 1970. En juin 1977, L'Unité Banque du Canada a été absorbée par La Banque Provinciale et en novembre 1979 La Banque Provinciale du Canada a fusionné avec la Banque Canadienne Nationale pour former la Banque Nationale du Canada. La Banque Continentale du Canada a commencé ses opérations le 4 juin 1979 avec le

operations, initially as a wholly owned subsidiary of IAC Ltd; the two institutions merged on 1 November 1981. Citibank Canada amalgamated with three Canadian subsidiaries of its parent company, Citibank N.A., effective 1 November 1982.

C1–C2

Source: Bank of Canada

• *Treasury bills* are reported at amortized value beginning in November 1981; previously they were reported at par value. • *Government of Canada direct and guaranteed bonds* are at amortized value and until November 1981 include accrued interest. • *Call and short loans* to investment dealers and stock-brokers are divided between *special call loans* and *other call and short loans*. Special call loans can be liquidated by either the lender or borrower on the same day that notice is given or in 24 hours after notice is given. • *Loans in Canadian dollars* until November 1981 include securities with a term of less than one year that have been purchased directly from an issuer at time of issue. • *CSB loans* are loans to finance purchases of Canada Savings Bonds at the time of issue including those purchased by pay-roll deductions.

• *General loans* comprise business and personal loans, including loans to farmers, loans to religious, educational, health and welfare institutions and loans to grain dealers and to sales finance and consumer loan companies. Loans to provinces, municipalities, and loans for the purchase of Canada Savings Bonds are not included. Beginning November 1981 non-residential mortgages are excluded and shown separately. • *Canadian securities* prior to November 1981 did not include securities with a term of less than one year at time of issue that were purchased directly from an issuer, since these were classified as loans.

• *Provincial securities* are at amortized value and include securities guaranteed by provincial governments. • *Municipal and corporate securities* are shown at not more than market value, until November 1981 when they are shown at amortized value. • *Personal loans* include personal loans against marketable securities, Home Improvement Loans, student loans and all other loans to individuals to finance the purchase of consumer goods and services (see Table C8). Certain personal loans have been reclassified into business loans, resulting in a reduction in personal loans and an increase in business loans of approximately \$900 million in November 1981. • *Business loans* are defined as general loans less personal loans. • *General loans* are the sum of personal loans and business loans.

• *Estimated private sector float* comprises cheques and other items relating to private sector deposits that have not been cleared, which create an element of double counting in the Canadian dollar deposit liabilities of the chartered banks. The figures for total float shown on a weekly basis in Table C2 are estimated by the Bank of Canada. The estimates are based on the difference between total Canadian dollar major liabilities (deposit liabilities and advances from the Bank of Canada) and total major assets (including net foreign currency assets) which are reported weekly, and the net balance of other liability and asset items on the basis of the most recent month-end data. This estimate of total float is adjusted to exclude float relating to Government of Canada and Bank of Canada transactions.

• *Total Canadian dollar major assets* do not include net Canadian dollar items in transit, customers' liability under acceptances, Canadian dollar deposits with other banks and "all other assets". • *Net foreign currency assets* are defined as the total of gold coin and bullion, foreign currency, bank deposits in foreign currencies, foreign securities, foreign-pay securities issued by Canadian borrowers, day, call and short loans to investment dealers and stock-brokers in foreign currencies, other loans in foreign currencies, investment in controlled corporations abroad (until November 1981), and net foreign currency items in transit less deposits by banks in foreign currencies and other deposits in foreign currencies. Total foreign currency assets and total foreign currency liabilities are shown in Tables C3 and C4 respectively. • *Holdings of selected short-term assets* are in addition to those included in "Canadian dollar liquid assets". • *Short-term paper* consists of notes, treasury bills and like evidences of indebtedness payable in Canadian dollars and issued for a term of one year or less (Government of Canada treasury bills and bankers' acceptances of other banks are excluded). Short-term paper acquired directly from the issuer was included in

statut de filiale en propriété exclusive de la IAC Limitée; les deux institutions ont fusionné le 1^{er} novembre 1981. La Citibanque Canada et trois filiales canadiennes de la société mère, Citibank N.A., ont fusionné le 1^{er} novembre 1982.

C1 et C2

Source : Banque du Canada

• À partir de novembre 1981, les *bons du Trésor* sont comptabilisés à leur valeur amortie; auparavant, ils étaient inscrits à leur valeur nominale. • Les *obligations émises ou garanties par le gouvernement canadien* figurent à leur valeur amortie, majorée, jusqu'en novembre 1981, des intérêts courus. • Les *prêts à vue ou à court terme* aux courtiers en valeurs mobilières ou aux agents de change sont répartis en *prêts à vue spéciaux* et en *autres prêts à vue ou à court terme*. Les prêts à vue spéciaux peuvent être remboursés sur préavis du prêteur ou de l'emprunteur le jour même du préavis ou dans les 24 heures. • Jusqu'en novembre 1981, les *prêts en dollars canadiens* incluaient les titres achetés directement des émetteurs lors de leur émission et dont l'échéance était de moins d'un an. • La rubrique *Obligations d'épargne du Canada* désigne des prêts destinés à financer des souscriptions aux obligations d'épargne du Canada, y compris les souscriptions selon le Mode d'épargne sur le salaire.

• Les *prêts généraux* regroupent les prêts aux particuliers et les prêts aux entreprises, y compris les prêts aux agriculteurs, aux institutions religieuses et aux établissements d'enseignement, de soins de santé et de bienfaisance, aux négociants en grains et aux sociétés de financement ou de prêt à la consommation. En sont exclus les prêts aux provinces, aux municipalités et les prêts destinés à financer l'achat d'obligations d'épargne du Canada. À partir de novembre 1981, les prêts hypothécaires autres que les prêts à l'habitation sont exclus de cette catégorie et présentés séparément. • Jusqu'en novembre 1981, les *titres canadiens* ne comprenaient pas les titres achetés directement de l'émetteur et dont l'échéance à l'émission ne dépassait pas un an, car ces derniers étaient assimilés à des prêts. • Les *titres des provinces* — qui comprennent également les titres émis sous la garantie d'un gouvernement provincial — figurent ici à leur valeur amortie. • Jusqu'en novembre 1981, les *titres des municipalités et des sociétés* figurent à une valeur qui ne dépasse pas leur valeur sur le marché; à partir de cette date, ils figurent à leur valeur amortie. • Les *prêts aux particuliers* comprennent les prêts personnels sur titres négociables, les prêts pour l'amélioration des maisons, les prêts aux étudiants et tous les autres prêts aux particuliers destinés à financer l'achat de biens de consommation et de services (voir Tableau C8). En novembre 1981, certains prêts qui figuraient sous la rubrique des prêts aux particuliers ont été groupés avec les prêts commerciaux; il en est résulté une baisse des prêts aux particuliers et une augmentation des prêts commerciaux de l'ordre de 900 millions de dollars. • Les *prêts aux entreprises* correspondent aux prêts généraux moins les prêts aux particuliers. • Les *prêts généraux* sont la somme des prêts aux particuliers et des prêts aux entreprises. • Les *effets du secteur privé en cours de compensation* comprennent les chèques et autres instruments relatifs aux dépôts du secteur privé qui n'ont pas encore été compensés et, par conséquent, font double emploi dans le calcul du passif-dépôts en dollars canadiens des banques à charte. Les données hebdomadaires de ce poste (Tableau C2) sont des estimations de la Banque du Canada, obtenues en additionnant algébriquement a) la différence entre le total des principaux engagements en dollars canadiens (passif-dépôts et avances de la Banque du Canada) et celui des principaux avoirs (y compris les avoirs nets en monnaies étrangères), dont les chiffres nous sont déclarés chaque semaine, et b) le solde net des autres éléments de l'actif et du passif d'après la dernière situation mensuelle disponible. Ces estimations de l'ensemble des effets en cours de compensation sont des données dont on a déduit le montant des effets en compensation liés aux opérations du gouvernement canadien et de la Banque du Canada.

• L'ensemble des *principaux avoirs en dollars canadiens* ne comprend pas les postes suivants : le solde net des effets en dollars canadiens en cours de compensation, les acceptations, les dépôts en dollars canadiens auprès d'autres banques, ni les autres postes de l'actif. • Les *avoirs nets en monnaies étrangères* comprennent l'encaisse-or (pièces et lingots), les monnaies étrangères, les dépôts bancaires en monnaies étrangères, les titres en monnaies étrangères, y compris ceux émis par des emprunteurs canadiens, les prêts en monnaies étrangères aux agents de change et aux courtiers en valeurs mobilières (prêts au jour le jour ou prêts sur titres à vue ou à court terme), les autres prêts en monnaies étrangères, les investissements dans des sociétés étrangères sous le contrôle de la banque (jusqu'en novembre 1981) et le solde net des effets en monnaies étrangères en cours de compensation — déduction faite du passif-dépôts en monnaies étrangères (envers d'autres banques ou tous autres déposants). L'ensemble des avoirs en monnaies étrangères figure au Tableau C3, l'ensemble des engagements en monnaies étrangères au Tableau C4. • La rubrique *Divers avoirs à court terme* ne tient pas compte des éléments qui figurent déjà à celle des *avoirs liquides en dollars canadiens*. • Le *papier à court*

loans while paper acquired in the market was included in Canadian securities until November 1981. Since then all paper acquired by the banks is classified as securities. Acceptances of the reporting bank, when bought by the bank, are classified as loans. • *Chartered bank instruments* consisted of bankers' acceptances of other banks and bearer term notes until November 1981; since then they consist of acceptances of other banks and non-operating deposits with other banks. They are not included in "total major assets".

• *Liquid asset ratios.* The first series shows Canadian liquid assets — Bank of Canada notes and deposits, day-to-day loans, treasury bills (at amortized value beginning in November 1981), Government of Canada direct and guaranteed bonds, call and short loans to stock-brokers and investment dealers — as a ratio of total Canadian dollar major assets. The second series shows "free" Canadian dollar liquid assets, i.e., Canadian dollar liquid assets (with treasury bills valued at par) less required cash and secondary reserves, as a ratio of total Canadian dollar major assets. (See Table C10 for data on chartered bank cash and secondary reserves.)

• *Bankers' acceptances outstanding.* When a bank purchases its own acceptances for investment purposes, these purchases are included in general loans and are netted from the amount of bankers' acceptances outstanding on both the asset and liability side of the balance sheet. Purchases of other banks' acceptances are included in *Canadian dollar deposits with other banks* in Table C3.

C3—C4

Source: Bank of Canada

Data cover total chartered bank assets and liabilities at month-end from November 1981 onwards, and are generally classified according to the form set out in Schedule J of the 1980 Bank Act. Bank-by-bank data according to Schedule J are published in the *Canada Gazette*. These data are, for the most part, a continuation of month-end assets and liabilities formerly based on Schedule M of the 1967 Bank Act. In addition to the format changes, Tables C3 and C4 differ from earlier data because of changes in the level of consolidation and other accounting practices. Data in Tables C3 and C4 consolidate all wholly and majority-owned subsidiaries of the chartered banks; previously only wholly owned foreign banking subsidiaries were consolidated. Equity accounting is used to take account of a bank's investment in companies in which it holds at least 20 per cent and not more than 50 per cent of the companies' voting shares. Accrued interest is included in "other assets" or "other liabilities"; previously it was included in the related asset or liability item. The data in Tables C3 and C4 differ from data prior to November 1981 in the following ways: (i) all debt securities are valued at amortized value; (ii) interim profits are transferred to retained earnings quarterly rather than at the end of each fiscal year; and (iii) letters of credit and guarantees are no longer included as balance sheet items. All these changes are described in more detail in the article "The new chartered bank statistical reporting system" published in the November 1981 issue of this Review.

• *Call and short loans* to investment dealers and stock-brokers are divided between *special call loans* and *other call and short loans*. Special call loans can be liquidated by either borrower or lender on the same day that notice is given or in 24 hours after notice is given. They are typically secured by short-term paper and other money market securities.

• *General loans* comprise personal and business loans (including loans to farmers; loans to religious, educational, health and welfare institutions; loans to grain dealers; and loans to sales finance and consumer loan companies). • *Residential mortgages* are loans secured by real estate comprising buildings of which at least 50 per cent of the floor space is used or will be used for permanent private accommodation. • *Non-residential mortgages* are all mortgages not classified as residential, such as those on hotels, stores, office buildings, garages, theatres, warehouses, industrial plants, institutional properties, farms and vacant land. • *Leasing receivables* reflect the financial leasing activities of wholly owned chartered

termes comprend les billets, les bons du Trésor et d'autres titres de créance du même genre libellés en dollars canadiens et dont l'échéance à l'émission ne dépassait pas un an, mais non les bons du Trésor du gouvernement canadien ni les acceptations bancaires d'autres banques. Jusqu'en novembre 1981, le papier à court terme acheté directement de l'émetteur était classé avec les prêts, tandis que le papier acheté directement sur le marché figurait dans la colonne des titres canadiens. Depuis tout le papier acheté par les banques est groupé avec les titres. Les acceptations de la banque déclarante sont classées avec les prêts quand elles sont achetées par celle-ci.

• *Les effets bancaires* comprennent, jusqu'en novembre 1981, les acceptations bancaires d'autres banques et les billets à terme au porteur; à partir de cette date, ils comprennent les acceptations des autres banques et les dépôts à des comptes autres que des comptes d'exploitation tenus dans d'autres banques. Ces éléments ne font pas partie de l'ensemble des principaux avoirs.

• *Ratios* ou coefficients de liquidité. Le premier coefficient exprime le rapport entre les avoirs liquides canadiens — billets de la Banque du Canada, dépôts à la Banque du Canada, prêts au jour le jour, bons du Trésor (à partir de novembre 1981, à la valeur amortie), obligations émises ou garanties par le gouvernement canadien, prêts sur titres à vue ou à court terme aux agents de change et aux courtiers en valeurs mobilières — et l'ensemble des principaux avoirs en dollars canadiens. Le second coefficient exprime le rapport entre les avoirs liquides en dollars canadiens «libres» — avoirs liquides en dollars canadiens (bons du Trésor inscrits à la valeur nominale) diminués des réserves-encaisse et des réserves secondaires — et l'ensemble des principaux avoirs en dollars canadiens. (On trouvera au Tableau C10 des données concernant les réserves-encaisse et les réserves secondaires des banques à charte.)

• *Acceptations bancaires en circulation.* Lorsqu'une banque acquiert ses propres acceptations à des fins de placement, le montant de ces acceptations est porté à la rubrique *Prêts généraux* après avoir été déduit, à l'actif et au passif, de l'encours des acceptations de la banque. Par contre, les acceptations d'autres banques détenues en portefeuille sont comprises dans les *dépôts en dollars canadiens à d'autres banques* au Tableau C3.

C3 et C4

Source : Banque du Canada

Ces tableaux constituent un résumé de la situation des banques à charte en fin de mois à partir de novembre 1981, et ils suivent en général la ventilation de l'Annexe J de la Loi sur les banques de 1980. Les données communiquées par chacune des banques conformément au modèle de l'Annexe J sont publiées dans la *Gazette du Canada*. Les tableaux font suite pour la majeure partie aux chiffres en fin de mois des principaux postes du bilan des banques qui, auparavant, étaient présentés conformément à l'Annexe M de la Loi sur les banques de 1967. Outre les modifications apportées à leur présentation, il existe entre les Tableaux C3 et C4 et les tableaux antérieurs des différences dues à des changements opérés au niveau de la consolidation des données et des méthodes comptables. Aux Tableaux C3 et C4, les données de toutes les filiales dont les banques possèdent l'intégralité ou la majorité des actions sont consolidées avec celles des banques concernées, tandis qu'auparavant seules les données des filiales en propriété exclusive que les banques à charte ont à l'étranger étaient consolidées. Par ailleurs, on comptabilise maintenant à la valeur de consolidation les placements d'une banque dans une société dont celle-ci détient au moins 20 % mais pas plus de 50 % des actions donnant droit de vote. De plus, l'intérêt couru est incorporé maintenant aux *autres éléments de l'actif* ou aux *autres éléments du passif*; auparavant, il était compris au poste concerné de l'actif ou du passif. Les autres modifications qui distinguent les données des Tableaux C3 et C4 des données publiées avant novembre 1981 sont les suivantes : i) tous les titres de créance figurent maintenant à leur valeur amortie; ii) le montant provisoire des bénéfices n'est plus viré à la fin de l'exercice, mais chaque trimestre, au poste des bénéfices non distribués et iii) les lettres de crédit et les garanties ne figurent plus à un poste distinct du relevé. Tous ces changements sont expliqués en détail dans l'article intitulé «Le nouveau système de relevés statistiques des banques à charte», qui a été publié dans la livraison de novembre 1981 de la Revue.

• *Les prêts à vue ou à court terme* aux courtiers en valeurs mobilières et agents de change sont répartis en *prêts à vue spéciaux* et *autres prêts à vue ou à court terme*. Les prêts à vue spéciaux peuvent être remboursés à la demande de l'emprunteur ou du prêteur le jour même où le préavis est donné ou dans les 24 heures. Ces prêts sont habituellement garantis par du papier à court terme ou par d'autres titres du marché monétaire. • *Les prêts généraux* comprennent les prêts aux particuliers et les prêts aux entreprises (entre autres les prêts aux agriculteurs; les prêts aux institutions religieuses, aux établissements d'enseignement, de soins de santé et de bienfaisance; les prêts aux négociants en grains et aux sociétés de financement ou de prêt à la consommation).

• *Les prêts hypothécaires à l'habitation* sont des prêts garantis par des biens immobiliers comprenant des immeubles dont au moins 50 % de la superficie sert ou servira en permanence de logement. • *Les prêts hypothécaires sur immeubles non résidentiels* comprennent tous les prêts hypothécaires garantis par des biens

bank leasing subsidiaries carried on according to Sections 173(1)j and 193(1) of the 1980 Bank Act. • Securities of corporations associated with banks include all common and preferred shares, debt securities and the chartered banks' share of the earnings of these companies. Associated corporations are those companies in which a bank owns at least 20 per cent and not more than 50 per cent of the voting shares. • Items in transit (float) is taken directly from Schedule J and is not adjusted for float arising from Government of Canada and Bank of Canada transactions. • Other assets include other coin, land, buildings and equipment, and other assets. • Bankers' acceptances outstanding represent acceptances issued by a bank and not purchased by that same bank. If a bank purchases its own acceptances, these acceptances are included in general loans and are netted from the amount of bankers' acceptances outstanding on both the asset and liability side of the balance sheet. Purchases of other banks' acceptances are included in deposits with banks (other balances). • Liabilities of subsidiaries other than deposits include liabilities of subsidiaries other than those included in deposit liabilities, such as debentures. • Minority interests represent the amounts arising from the preparation of Schedule J on a consolidated basis.

C5–C6

Source: Inspector General of Banks

Data cover total chartered bank assets and liabilities at the end of each calendar quarter and are classified on a basis consistent with Schedule J of the 1980 Bank Act. These data are, for the most part a continuation of quarterly regional distribution of assets and liabilities formerly, based on Schedule M of the 1967 Bank Act. In addition to the format changes, the new data differ from earlier data because of changes in the level of consolidation and other accounting practices. See the notes to Tables C3–C4 for further details on these changes.

Unless otherwise indicated, claims on and liabilities to residents are allocated on the basis of the location of the branch in which they are booked; claims on and liabilities to non-residents are allocated to Head Office/International. Loans are reported gross of specific provisions for losses, which are allocated to Head Office/International.

Securities of the Government of Canada, corporate securities, lease receivables, day-to-day loans, Canadian currency items in transit, and debentures issued and outstanding are allocated on the basis of total Canadian dollar deposit liabilities. Securities of and loans to associated corporations are allocated on the basis of the location of the head office of the associated corporation.

- Bank of Canada notes and deposits. Deposits are allocated in the same proportion as total statutory deposit liabilities weighted by the appropriate reserve requirement.
- Securities of provinces are distributed by province of issuing authority.
- Residential mortgages are allocated on the basis of the location of the mortgaged property.
- Loans to provinces are classified by provinces.
- Loans to municipalities are classified by the province of the borrower.
- Personal loans under credit cards are allocated by province of residence of the cardholder.
- Total personal loans differ from the series shown in Table C8 and Table C1 because of the inclusion of loans made for the purchase of Canada Savings Bonds in fully secured loans.
- Agricultural loans include loans to the Wheat Board and other grain dealers.
- All other assets are allocated by location of the branch where possible; otherwise, on the basis of total deposit liabilities.
- Deposits of the Government of Canada are allocated in the same proportion as the total of other deposit liabilities in Canadian currency.
- Deposits of provinces are classified by creditor province.
- Appropriations for contingencies and shareholders' equity are allocated on the basis of total deposit liabilities.
- All other liabilities are allocated by location of branch, where possible; otherwise, on the basis of total deposit liabilities.

immobiliers autres que des logements, par exemple les hôtels, magasins, immeubles à bureaux, garages, théâtres, entrepôts, usines, biens immobiliers appartenant à des institutions, fermes et terrains vagues. • Les données des créances résultant de baux financiers font état de toutes les opérations de financement par crédit-bail qu'effectuent les filiales en propriété exclusive spécialisées des banques et qui sont prévues à l'alinéa 173(1)j et au paragraphe 193(1) de la Loi sur les banques de 1980. • Les titres des sociétés associées aux banques comprennent les actions ordinaires et privilégiées, les titres de créance sur ces sociétés ainsi que la part de bénéfices de ces sociétés qui est versée aux banques à charte. Une société associée est une société dont au moins 20 % mais pas plus de 50 % des actions donnant droit de vote est détenu par une banque à charte. • Les données relatives aux effets en cours de compensation proviennent directement de l'Annexe J et ne sont pas corrigées pour prendre en compte le solde des effets en compensation du gouvernement canadien ni les opérations de la Banque du Canada. • Les autres éléments de l'actif comprennent les autres pièces de monnaie, les terrains, les immeubles et l'équipement et divers autres avoirs. • Les données des acceptations représentent l'encours des acceptations émises par une banque et non rachetées par elle-même. Lorsqu'une banque acquiert ses propres acceptations, elle les déclare sous la rubrique des prêts généraux et les déduit, à l'actif et au passif de son bilan, de l'encours de ses acceptations. Lorsqu'une banque achète des acceptations d'une autre banque, elle les inscrit sous la rubrique des dépôts à d'autres banques (autres soldes). • Les engagements de filiales autres que les dépôts comprennent les engagements qui sont contractés par les filiales et qui sont inscrits à un poste autre que celui du passif-dépôts, les débetures par exemple. • Les données qui figurent sous la rubrique Participation minoritaire dans les filiales représentent les montants résultant de la préparation de l'Annexe J sur une base consolidée.

C5 et C6

Source : Inspecteur général des banques

Ces tableaux constituent un résumé de la situation des banques à charte à la fin de chaque trimestre de l'année civile, et leurs données sont classées conformément aux dispositions de l'Annexe J de la Loi sur les banques de 1980. Ils font suite pour la majeure partie aux données trimestrielles concernant la répartition géographique de l'actif et du passif qui, auparavant, étaient présentées conformément à l'Annexe M de la Loi sur les banques de 1967. Outre les modifications apportées à leur présentation, les nouvelles données diffèrent aussi des anciennes en raison des changements opérés au niveau de la consolidation des données et des méthodes comptables. Ces changements sont expliqués de façon plus détaillée dans les notes relatives aux Tableaux C3 et C4.

Sauf indication contraire, les créances sur les résidents ainsi que les engagements vis-à-vis des résidents sont répartis selon l'endroit où se trouve la succursale bancaire où ils sont comptabilisés; les créances sur les non-résidents et les engagements envers eux sont présentés en regard de la rubrique Siège social ou opérations internationales. Les provisions pour pertes ne sont pas déduites des chiffres des prêts et autres actifs figurant en regard des provinces mais plutôt en regard du poste Siège social ou opérations internationales.

Les titres du gouvernement canadien, les titres des sociétés, les créances résultant de baux financiers, les prêts au jour le jour, les effets en cours de compensation libellés en dollars canadiens et les débetures en circulation sont ventilés dans les mêmes proportions que l'ensemble du passif-dépôts en dollars canadiens. Les titres détenus par les sociétés associées et les prêts qui leur sont consentis sont répartis selon l'endroit où se trouve le siège social de la société associée.

- Créances sur la Banque du Canada (dépôts et billets). Les dépôts sont répartis dans la même proportion que l'ensemble du passif-dépôts (base légale) et pondérés en fonction du coefficient approprié des réserves.
- Les titres des provinces sont ventilés par province émettrice.
- Les prêts hypothécaires à l'habitation sont répartis selon l'emplacement de l'immeuble hypothéqué.
- Les prêts aux provinces sont classés par province.
- Les prêts aux municipalités sont ventilés selon la province.
- Les prêts sur cartes de crédit consentis aux particuliers sont répartis selon la province où réside le détenteur de la carte. Les données de l'ensemble des prêts aux particuliers diffèrent de celles des Tableaux C8 et C1, du fait que les avances octroyées pour l'achat d'obligations d'épargne du Canada sont comprises dans les prêts aux particuliers garantis.
- Les données des prêts agricoles comprennent les prêts à la Commission canadienne du blé et à d'autres négociants en grains.
- Les autres éléments de l'actif sont répartis suivant l'endroit où se trouve la succursale; quand il n'est pas possible d'employer ce critère, les données sont ventilées de la même façon que l'ensemble du passif-dépôts.
- Les dépôts du gouvernement canadien sont ventilés comme l'ensemble des autres éléments du passif-dépôts en dollars canadiens.
- Les dépôts des provinces sont répartis suivant la province au nom de laquelle les dépôts sont inscrits.
- Les provisions pour éventualités et avoir propre des actionnaires sont ventilés de la même

façon que l'ensemble du passif-dépôts. • *Les autres éléments du passif* sont ventilés suivant l'endroit où se trouve la succursale; quand il n'est pas possible d'appliquer ce critère, les données sont ventilées de la même façon que l'ensemble du passif-dépôts.

C7

Source: Bank of Canada

The data cover chartered bank loans to Canadian private non-financial corporations and unincorporated businesses and government enterprises. • *Authorizations* are the maximum lines of credit established under which loans are made subject to certain terms and conditions. Where an authorization provides for drawings in either Canadian dollars or foreign currency, the authorization is to be reported as Canadian dollars less any advances made in foreign currency, which are to be reported as foreign currency authorizations. Foreign currency loans have been converted into their Canadian dollar equivalent using the closing rate of exchange on the last business day of the quarter. • *Term loans* are considered to be loans written with a specified date for retirement, whether or not there is a commitment for making periodic payments. All other loans are *demand loans*. Loan authorizations which are not formally allocated between demand and term loans are to be allocated as follows: the allocation to term is the amount outstanding as a term loan while the balance of the authorization is demand. Historical data on outstanding term loans are available on request from the Department of Monetary and Financial Analysis; these historical data include only term loans that, when made, were expected to have a repayment period of more than one year.

C8

Source: Bank of Canada

Data cover chartered bank non-mortgage loans. The institutional sectors used for these data conform to the Statistics Canada definitions in the financial flow sector accounts. Data in this table are reported gross of specific provisions for losses and will therefore differ from non-mortgage loans as reported on Schedule J and presented in Table C3. The detailed loan categories cover only non-mortgage loans to Canadian residents — loans to non-residents are shown separately in the table. Foreign currency loans have been converted into their Canadian dollar equivalents using the closing exchange rate prevailing on the last business day of the quarter.

- The Canadian dollar portion of *loans to Canadian individuals for non-business purposes* generally conforms to the total personal loan series previously reported, except that loans are reported gross of specific provisions for losses and also do not include loans to non-residents.
- *Tax-sheltered plans* include loans for registered savings plans such as RRSPs and RHSPs.
- *Marketable stocks and bonds* are loans to individuals other than investment dealers and brokers which when made were fully secured by marketable stocks and bonds. Loans to finance the purchase of Canada Savings Bonds at the time of issue are not included.
- *Loans to purchase consumer goods and services* include loans secured by marketable stocks and bonds if such loans are identified as being used to purchase consumer goods or services.
- *Private passenger vehicles* comprise all loans so identified whether or not they are secured by the purchased vehicle.
- *Mobile homes* include non-mortgage loans for all mobile homes as defined in the National Housing Act.
- A loan made under a *personal loan plan* is a fixed-rate loan repayable by instalment with a fixed date by which the loan is to be fully repaid.
- *Credit cards* comprise interest-bearing and non-interest-bearing outstanding balances under a credit card plan.
- *Public* financial institutions are generally considered to be enterprises which are of a commercial nature, have relatively autonomous management, and maintain financial accounts separate from those of the government that established them.
- *Deposit-taking* financial institutions include Canadian chartered banks, Quebec savings banks, credit unions and caisses populaires, trust companies and mortgage loan companies.
- *Other private*

C7

Source : Banque du Canada

Les données portent sur les prêts consentis par les banques à charte aux sociétés non financières du secteur privé, aux entreprises non constituées en sociétés et aux entreprises du secteur public. • *Les crédits autorisés* sont des lignes de crédit permettant à un client d'emprunter jusqu'à concurrence d'un montant maximal sous réserve de conditions prédéterminées. Lorsque les modalités de ces lignes de crédit prévoient des tirages en dollars canadiens ou en monnaies étrangères, les banques doivent déclarer séparément les avances en dollars canadiens et les avances en monnaies étrangères. Les prêts en monnaies étrangères sont convertis en dollars canadiens au taux de change en vigueur à la fermeture du marché le dernier jour ouvrable du trimestre. • Sont considérés comme *prêts à terme* les prêts dont le remboursement doit être effectué à une date précise, que le client se soit engagé ou non à effectuer des versements périodiques. Tous les autres prêts sont des *prêts à vue*. Les crédits autorisés qui ne sont pas formellement répartis en prêts à vue et en prêts à terme doivent être répartis comme suit : l'encours des prêts à terme est classé comme prêts à terme, et la différence entre ce montant et le plafond de la ligne de crédit est classée comme prêts à vue. Pour obtenir les données chronologiques relatives à l'encours des prêts à terme, il suffit de s'adresser au département des Études monétaires et financières. Ces données ne tiennent compte que des prêts à terme, qui, au moment où ils ont été consentis, étaient censés être remboursés dans un délai de plus d'un an.

C8

Source : Banque du Canada

Ces données concernent les prêts non hypothécaires des banques à charte. Les définitions des secteurs institutionnels utilisés dans la production de ces données concordent avec celles qu'utilise Statistique Canada dans les comptes des flux financiers. Les chiffres contenus dans ce tableau sont déclarés en termes bruts, c'est-à-dire que les provisions spécifiques pour pertes n'en sont pas déduites; ils diffèrent donc des données des prêts non hypothécaires déclarées selon le modèle de l'Annexe J et présentées au Tableau C3. Les différentes composantes de cette rubrique recouvrent seulement les prêts non hypothécaires octroyés aux résidents canadiens; les prêts aux non-résidents sont groupés sous une rubrique distincte. Les montants des prêts en devises étrangères sont convertis en dollars canadiens au taux de clôture du dernier jour ouvrable du trimestre.

- La tranche des *prêts non commerciaux à des Canadiens* constituée par les prêts en dollars canadiens correspond en gros à l'ensemble des prêts personnels, dont les chiffres étaient publiés auparavant dans la Revue, sauf que les données des prêts sont déclarées en termes bruts — c'est-à-dire sans que les provisions spécifiques pour pertes n'en soient déduites — et qu'elles ne comprennent pas les prêts aux non-résidents.
- *Les régimes fiscalement avantageux* comprennent les prêts dont le produit a été versé à des régimes d'épargne enregistrés, par exemple un REEL ou un REER.
- *Les actions et obligations négociables* comprennent les prêts consentis à des particuliers autres que les négociants et courtiers en valeurs mobilières, et qui, au moment de leur octroi, étaient garantis par des obligations ou des actions négociables. Les prêts destinés à financer l'achat d'obligations d'épargne du Canada lors de l'émission de ces titres n'entrent pas dans cette catégorie.
- *Les prêts pour l'achat de services et de biens de consommation* comprennent les prêts garantis par des obligations et des actions négociables, s'il est établi que leur produit servira à l'achat de services et de biens de consommation.
- *Voitures particulières*. Ce poste regroupe tous les prêts de cette catégorie, qu'ils soient ou non garantis par le véhicule acheté.
- *Maisons mobiles*. Ce poste comprend tous les prêts non hypothécaires destinés à l'achat de maisons mobiles, dont on trouve la définition dans la Loi nationale sur l'habitation.
- *Les prêts personnels à tempérament* sont des prêts à taux fixe, remboursables par versements et qui doivent être remboursés intégralement à une date donnée.
- *Cartes de crédit*. Ce poste recouvre les sommes dues au titre d'un régime de carte de crédit, qu'elles portent intérêt ou non.
- Sont considérées comme institutions financières *publiques* les entreprises commerciales, qui ont une autonomie relative sur le plan de la gestion et dont la comptabilité financière est distincte de celle du gouvernement qui les a constituées.
- *Les institutions de dépôt* comprennent les banques à charte canadiennes,

financial institutions include insurance companies, pension funds, sales finance and consumer loan companies and financial leasing companies.

- *Non-financial private corporations and unincorporated businesses* include all corporations, unincorporated businesses and unincorporated branches of foreign corporations operating in Canada (except financial institutions and government enterprises), and are classified using the 1980 Standard Industrial Classification published by Statistics Canada.

- *Agriculture* comprises agricultural industries as well as service industries incidental to agriculture, e.g., veterinary, harvesting, etc.
- *Oil and gas* include establishments primarily engaged in exploration for and/or production of conventional petroleum or natural gas.
- *Builders and developers* include those engaged in either residential or non-residential building activities. Land developers are included under *other construction*.
- *Multi-product conglomerates* comprise those non-financial private corporations in which no one business constitutes more than 50 per cent of the corporation's total activity.
- *Unincorporated businesses* include all businesses which are not incorporated under the law of Canada or a province and which are not unincorporated branches of foreign corporations.

- *Government enterprises* comprise all Canadian corporations in which a government holds at least 50 per cent of the voting stock and any subsidiaries of these companies. It also includes all separately constituted boards and commissions of government that carry on a business and have their own borrowing authority.
- *Loans to institutions* include loans to private non-profit institutions, religious, health and educational institutions.
- *Loans to government* include loans to all emanations of government that do not carry on a business or do not have their own borrowing authority.
- *Loans to non-residents* are loans to individuals, corporations or other organizations not ordinarily resident in Canada, but do not include lease financing receivables of non-residents or loans to and deposits with non-resident associated corporations, which are reported under *leasing receivables* or *other loans*, respectively.
- *Loans made under Government of Canada guaranteed loans* schemes do not include funds advanced under the Small Business Development Bond or Small Business Bond programs, as these instruments are classified as securities on the books of the chartered banks.

Source: Bank of Canada

The data shown are averages of the four or five Wednesdays in the month. The series have been seasonally adjusted by means of the X-11 variant of the U.S. Bureau of the Census Method II Seasonal Adjustment Program, which employs a ratio to moving average technique. Since the seasonal adjustment is recalculated when an additional 12 months data become available, the series are subject to annual revisions. Mail strikes in 1974, 1975, 1978 and 1981 caused distortions in the demand deposit series and clearly affected the seasonal adjustment factors for the relevant months. The X-11 'strike option' was used to adjust for these distortions in April and May 1974, November and December 1975, November 1978 and July 1981. (See the note in the May 1977 Review for a discussion of the methodology of these adjustments.) Furthermore, the entire series for demand deposits is adjusted for the influence of the dates of Wednesdays before the standard X-11 technique is used. (See the note in the March 1979 Review for a discussion of the adjustment for the effects of the dates of Wednesdays.) The individual series as well as the aggregates are adjusted independently; consequently, the seasonally adjusted components do not necessarily add to the totals. Data are available from July 1954.

La Banque Populaire (formerly a savings bank, La Banque d'Économie de Québec) commenced operations as a chartered bank in November 1969. In August 1970, La Banque Populaire merged with La Banque Provinciale du Canada. The Unity Bank of Canada amalgamated with La Banque Provinciale du Canada in June 1977 and in November 1979 La Banque Provinciale du Canada merged with La Banque Canadienne Nationale to become

les banques d'épargne du Québec, les caisses populaires et credit unions, les sociétés de fiducie et les sociétés de prêt hypothécaire.

- Les autres institutions financières du secteur privé comprennent les compagnies d'assurance, les caisses de retraite, les sociétés de financement des ventes ou de prêt à la consommation et les sociétés de crédit-bail financier.

- *Sociétés privées non financières et entreprises non constituées en sociétés*. Ce poste comprend toutes les sociétés, les entreprises non constituées en sociétés et les succursales canadiennes des sociétés étrangères (institutions financières et entreprises publiques exclues); elles sont groupées conformément à la Classification type des industries de 1980, publiée par Statistique Canada.
- *L'agriculture* comprend les industries de transformation des produits agricoles ainsi que les services liés à l'agriculture, soit la médecine vétérinaire, les récoltes, etc.
- La rubrique *Pétrole et gaz* comprend les entreprises qui se consacraient à l'origine à l'exploration ou à la production de pétrole conventionnel et de gaz naturel.
- *Constructeurs et promoteurs immobiliers*. Ce poste concerne les entreprises qui œuvrent dans le domaine de la construction résidentielle ou non résidentielle. Les promoteurs fonciers sont groupés sous la rubrique *Autres*.
- *Les conglomerats multi-produits* comprennent toutes les sociétés non financières du secteur privé dans lesquelles aucune activité commerciale ne représente à elle seule plus de 50 % de l'ensemble des activités de la société.
- *Les entreprises non constituées en sociétés* comprennent toutes les entreprises qui ne sont pas régies par une loi canadienne ou provinciale et qui ne sont pas des succursales de sociétés étrangères.

- *Les entreprises publiques* comprennent, d'une part, toutes les sociétés canadiennes dans lesquelles un gouvernement détient au moins 50 % des actions donnant droit de vote et, d'autre part, toutes les filiales de ces sociétés. Cette rubrique recouvre également tous les conseils ou commissions du secteur public qui exercent une activité commerciale et qui ont le pouvoir d'emprunter.
- Le poste *Prêts aux institutions* comprend les prêts aux institutions privées sans but lucratif, aux institutions religieuses et aux établissements de soins de santé et d'enseignement.
- La rubrique *Prêts aux administrations publiques* comprend tous les prêts aux administrations publiques qui n'exercent pas une activité commerciale ou qui n'ont pas le pouvoir d'emprunter.

- *Prêts aux non-résidents*. Ce poste regroupe les prêts aux particuliers, sociétés ou autres organismes qui ne sont pas normalement des résidents canadiens, mais il ne recouvre pas les créances résultant de baux financiers sur les non-résidents ni les opérations de prêt ou de dépôt avec des sociétés non résidentes associées à ces dernières; ces opérations figurent respectivement sous la rubrique *Créances résultant de baux financiers* et sous la rubrique *Autres prêts*.
- *Les prêts consentis en vertu des programmes garantis par le gouvernement fédéral* ne comprennent pas les avances octroyées dans le cadre des programmes d'émission d'obligations pour l'expansion de la petite entreprise ou pour le financement de la petite entreprise, car ces placements sont classés comme titres dans les livres des banques à charte.

Source : Banque du Canada

Ces données sont les moyennes des quatre ou cinq mercredis du mois. Les séries ont été désaisonnalisées d'après la Méthode II, variante X-11 du programme de désaisonnalisation du Bureau du recensement des États-Unis, qui utilise la technique des moyennes mobiles. Les facteurs de désaisonnalisation sont calculés à nouveau chaque fois que deviennent disponibles les données d'une nouvelle période de douze mois, de sorte que ces séries sont révisées chaque année. Les grèves des services postaux survenues en 1974, 1975, 1978 et 1981 ont provoqué des perturbations au niveau des statistiques des dépôts à vue et influencé visiblement les facteurs de désaisonnalisation applicables aux données des mois concernés. L'«option grève» du programme X-11 a servi à tenir compte de ces perturbations en avril et mai 1974, en novembre et décembre 1975, en novembre 1978 et en juillet 1981. (Voir l'article publié dans la Revue de mai 1977 sur la méthode utilisée pour effectuer ces ajustements.) De plus, toutes les séries relatives aux dépôts à vue sont corrigées afin de tenir compte de l'échelonnement des mercredis avant d'être désaisonnalisées à l'aide de la Méthode X-11. (Voir l'article publié dans la Revue de mars 1979 sur la façon de tenir compte de l'échelonnement des mercredis.) Du fait que ces statistiques sont désaisonnalisées séparément, l'addition des éléments d'un même ensemble ne correspond pas toujours au total indiqué. Ces données remontent à juillet 1954.

En novembre 1969, la Banque d'Économie de Québec, jusque-là banque d'épargne, est devenue banque à charte, sous le nom de Banque Populaire. La Banque Populaire a été absorbée par La Banque Provinciale en août 1970. En juin 1977, L'Unité Banque du Canada a été absorbée par La Banque Provinciale et en novembre 1979 La Banque Provinciale du Canada a fusionné avec la Banque Canadienne Nationale pour former la Banque Nationale du Canada. La Banque Continentale du Canada a commencé ses opérations le 4 juin 1979 avec le statut de filiale en propriété exclusive de la IAC Ltée; les deux institutions ont fusionné le 1^{er} novembre 1981.

the National Bank of Canada. On 4 June 1979 the Continental Bank of Canada began operations, initially as a wholly owned subsidiary of IAC Ltd.; the two institutions merged on 1 November 1981. Citibank Canada amalgamated with three Canadian subsidiaries of its parent company, Citibank N.A., effective 1 November 1982.

Users are referred to the notes to the tables in the December 1982 and earlier issues of this Review for a description of the impact on the data of the 1967 Bank Act revisions.

• *Demand deposits* are net of estimated private sector float. • *Canadian dollar liquid assets* consist of Bank of Canada notes and deposits, Government of Canada treasury bills and bonds and total call and other short loans. Beginning November 1981 treasury bills are shown at amortized value rather than par value. • *Less liquid Canadian dollar assets* consist principally of loans, mortgages and non-Government of Canada securities. • *Total loans* do not include day-to-day loans, call loans, residential mortgage loans and loans for the purchase of Canada Savings Bonds. • *General loans* represent business and personal loans, loans to farmers, loans to religious, educational, health and welfare institutions and loans to grain dealers and to sales finance and consumer loan companies. Loans to provinces, municipalities, and loans for the purchase of CSBs are not included.

C10

Source: Bank of Canada

Data shown relate to averages of reservable days for the period indicated except for the series on coin and Bank of Canada notes, and statutory deposit liabilities which, effective February 1981, are averages of the four consecutive Wednesdays ending with the second Wednesday of the previous month. Before February 1981 these were calculated as averages of the four consecutive Wednesdays ending with the second last Wednesday of the previous month. Data are available from July 1954. La Banque Populaire (formerly a savings bank, La Banque d'Économie de Québec) commenced operations as a chartered bank on 10 November 1969. In August 1970 La Banque Populaire merged with La Banque Provinciale du Canada. In June 1977 the Unity Bank of Canada amalgamated with La Banque Provinciale du Canada and in November 1979 La Banque Provinciale du Canada merged with La Banque Canadienne Nationale to become the National Bank of Canada. On 4 June 1979 the Continental Bank of Canada began operations, initially as a wholly owned subsidiary of IAC Limited; the two institutions merged on 1 November 1981. Citibank Canada amalgamated with three Canadian subsidiaries of its parent company, Citibank N.A., effective 1 November 1982.

The 1980 Bank Act provided for Canadian financial institutions affiliated with foreign banks to become incorporated as Canadian banks and allowed the establishment of new foreign-owned banks in Canada. As at 31 October 1984, there were 58 foreign banks which had received letters patent following this revision.

• Effective February 1981 *statutory deposits* are averages of the four consecutive Wednesdays ending with the second Wednesday of the previous month. As defined in section 208 of the Bank Act, they consist of reservable deposit liabilities payable on demand in Canadian currency, reservable deposit liabilities payable after notice in Canadian currency, reservable foreign currency deposits of residents, and revisions to previously reported statutory deposit liabilities. • *Cash reserves* of the chartered banks are held in the form of deposits with, and notes of, the Bank of Canada; effective February 1981 they also include coin with a face value of two dollars or less that are current under the Currency Act. Deposits with the Bank of Canada are calculated as an average of each day's deposits during the averaging period, coin and Bank of Canada notes are measured on a statutory basis, i.e., as an average of holdings on the four consecutive Wednesdays ending with the second Wednesday of the previous month. The 1980 Bank Act permits certain chartered banks to hold their primary reserves on deposit with another chartered bank, with the approval of the Bank of Canada. A chartered bank receiving such deposits is in turn obligated to hold an amount equal to the total of all these deposits on deposit with the Bank of Canada, along with

La Citibanque Canada et trois filiales canadiennes de la société mère, Citibank N.A., ont fusionné le 1^{er} novembre 1982.

Les utilisateurs trouveront, dans les notes relatives aux tableaux parues dans la livraison de décembre 1982 et dans les numéros précédents de la Revue, une description des répercussions que les révisions apportées en 1967 à la Loi sur les banques ont eues sur les données.

• *Dépôts à vue*. Les effets du secteur privé en cours de compensation (estimations) ont été déduits du montant des dépôts. • *Les avoirs liquides en dollars canadiens* comprennent les avoirs en billets de la Banque du Canada et les dépôts tenus à cette institution, les bons du Trésor et obligations du gouvernement canadien et l'ensemble des prêts à vue et des autres prêts à court terme. À partir de novembre 1981, les bons du Trésor figurent à leur valeur amortie et non plus à leur valeur nominale. • *Les avoirs de seconde liquidité en dollars canadiens* comprennent essentiellement les prêts, les prêts hypothécaires et les titres autres que ceux du gouvernement canadien. • *L'ensemble des prêts* ne comprend pas les catégories spéciales suivantes : prêts au jour le jour, prêts à vue, prêts hypothécaires à l'habitation et prêts destinés à financer l'achat d'obligations d'épargne du Canada. • *Les prêts généraux* comprennent les prêts aux entreprises, les prêts aux particuliers et les prêts aux agriculteurs, aux institutions religieuses et aux établissements d'enseignement, de soins de santé et de bienfaisance, aux négociants en grains et aux sociétés de financement ou de prêt à la consommation. Ils ne comprennent pas les prêts aux provinces, aux municipalités, ni les prêts destinés à financer l'achat d'obligations d'épargne du Canada.

Les données figurant au tableau sont les moyennes des jours où les banques peuvent effectuer des opérations au compte de réserve de la période indiquée, sauf que, pour les pièces de monnaie et les billets de la Banque du Canada et les dépôts sujets aux réserves, il s'agit, à compter de février 1981, de la moyenne de quatre mercredis consécutifs dont le dernier correspond au deuxième mercredi du mois précédent. Jusqu'en février 1981, ces données étaient des moyennes des quatre mercredis précédant immédiatement l'avant-dernier mercredi du mois précédent. Ces séries remontent à juillet 1954. Le 10 novembre 1969, la Banque d'Économie de Québec, jusque-là banque d'épargne, est devenue banque à charte sous le nom de Banque Populaire. Cette dernière a été absorbée par La Banque Provinciale en août 1970. En juin 1977, l'Unité Banque du Canada a été absorbée par La Banque Provinciale et en novembre 1979 La Banque Provinciale du Canada a fusionné avec la Banque Canadienne Nationale pour former la Banque Nationale du Canada. La Banque Continentale du Canada a commencé ses opérations le 4 juin 1979 avec le statut de filiale en propriété exclusive de la IAC Ltée; les deux institutions ont fusionné le 1^{er} novembre 1981. La Citibanque Canada et trois filiales canadiennes de la société mère, Citibank N.A., ont fusionné le 1^{er} novembre 1982.

La Loi sur les banques de 1980 accorde aux institutions financières canadiennes affiliées à des banques étrangères la possibilité d'obtenir le statut de banques canadiennes et permet à d'autres banques étrangères de s'établir au Canada. Au 31 octobre 1984, 58 banques étrangères avaient reçu leurs lettres patentes en conformité avec les nouvelles dispositions de la Loi.

• Depuis février 1981, les *dépôts sujets aux réserves* sont la moyenne des quatre mercredis consécutifs dont le dernier correspond au deuxième mercredi du mois précédent. Conformément à l'article 208 de la Loi sur les banques, ces dépôts comprennent les dépôts à vue en dollars canadiens sujets aux réserves, les dépôts à préavis en dollars canadiens sujets aux réserves, les dépôts en monnaies étrangères tenus au nom de résidents et sujets aux réserves et tiennent compte des ajustements apportés aux montants des dépôts sujets aux réserves déclarés précédemment. • Les banques à charte doivent maintenir leurs *réserves-encaisse* sous forme de dépôts à la Banque du Canada et de billets de la Banque du Canada; depuis février 1981, elles doivent également maintenir des réserves sous forme de pièces de monnaie d'une valeur nominale de 2 dollars ou moins et ayant cours conformément à la Loi sur la monnaie. Le chiffre des dépôts à la Banque du Canada correspond à la moyenne des dépôts journaliers au cours de chaque période de réserve, et conformément à la Loi, celui des billets de la Banque du Canada et des pièces de monnaie à la moyenne des avoirs détenus par les banques les quatre mercredis consécutifs dont le dernier est le deuxième du mois précédent. La Loi sur les banques de 1980 permet à certaines banques à charte de garder leurs réserves primaires dans d'autres banques à charte avec l'autorisation de la Banque du Canada. La banque à charte qui reçoit de tels dépôts est à son tour tenue de garder à la Banque du Canada des dépôts d'un montant équivalent, en plus du pourcentage de son passif-dépôts qu'elle doit maintenir à la Banque. • *Les coefficients obligatoires des réserves-encaisse* sont fixés par la Loi sur les banques. De février 1968 à janvier 1981, ils étaient de 12 % pour les dépôts à vue en dollars canadiens et de

other deposit amounts as determined by its own statutory deposit liabilities. • The *required cash reserve ratios* are prescribed by the Bank Act. From February 1968 to January 1981, the required ratios were 12 per cent for Canadian dollar demand deposits and 4 per cent for Canadian dollar notice deposits. As of 1 February 1981 the required ratios were 12 per cent for reservable Canadian dollar demand deposits, 2 per cent for reservable Canadian dollar notice deposits plus 2 per cent for the amount by which a bank's reservable Canadian dollar notice deposits exceed \$500 million, and 3 per cent for reservable foreign currency deposits. Beginning 1 March 1981, and for each of the next seven succeeding six month periods, the required rate on Canadian dollar demand deposits was decreased by 1/4 of one per cent, while that on the amount by which a bank's reservable Canadian dollar notice deposits exceed \$500 million was decreased by 1/8 of one per cent until by September 1984 the required ratios reached 10 per cent and 1 per cent respectively. Effective January 1969 the chartered banks have been required to maintain this minimum cash reserve ratio on a half-monthly rather than a monthly basis. The averaging periods are (1) the business days up to and including the 15th of the month, and (2) all other business days of the month.

• *Adjustments for previous periods* incorporate revisions to data already reported and used in determining a previous month's required primary and secondary reserves. The appropriate cash and secondary ratios are applied to these revised data and the required primary and secondary reserves for the month in which the revisions are reported are increased or decreased accordingly. • *Cumulative excess cash reserves* show the dollar figure of the weighted sum of daily excess reserves for the averaging period. See article in the September 1983 issue of the Review for a fuller description of the weighting system. • *Secondary reserves* comprise holdings of treasury bills at par value and day-to-day loans to investment dealers plus any cash reserves that are in excess of the minimum requirement. The Bank of Canada is empowered under Section 18(2) of the Bank of Canada Act to establish a secondary reserve ratio requirement within the range of 0 per cent to 12 per cent of deposit liabilities. The requirement was introduced in March 1968 replacing a voluntary agreement under which the chartered banks had maintained secondary reserves equal to 7 per cent of their Canadian dollar deposit liabilities. The chartered banks are required to maintain this minimum secondary reserve ratio on a monthly basis. The requirement has been set as follows: 6 per cent in March 1968, 7 per cent in April 1968, 8 per cent in June 1969, 9 per cent in July 1970, 8 1/2 per cent in December 1971, 8 per cent in January 1972, 7 per cent in December 1974, 6 per cent in January 1975, 5 1/2 per cent in March 1975, 5 per cent in February 1977 and 4 per cent in December 1981.

C11

Source: Bank of Canada

Data comprise total foreign currency assets and liabilities of the chartered banks, whether booked in Canada or abroad. The figures include all gold transactions. Published data are available from January 1954. Additional information on foreign currency assets and liabilities booked in Canada can be found in Tables C12 and C13. On 4 June 1979 the Continental Bank of Canada began operations, initially as a wholly owned subsidiary of IAC Ltd.; the two institutions merged on 1 November 1981. Citibank Canada amalgamated with three Canadian subsidiaries of its parent company, Citibank N.A., effective 1 November 1982.

Users are referred to the notes to the tables in the December 1982 and earlier issues of this Review for a description of the impact on the data of the 1967 Bank Act revisions.

• *Assets* do not include bank premises abroad. • *Call loans* comprise day, call and short loans to investment dealers and stock-brokers in foreign currencies. • *Other assets* include gold coin and bullion, foreign notes and coin, and foreign currency items in transit (float). The last item is frequently a net liability.

4 % pour les dépôts à préavis en dollars canadiens. Depuis le 1^{er} février 1981, les réserves-encaisse que doit maintenir chacune des banques étaient de 12 % des dépôts à vue en dollars canadiens sujets aux réserves, plus 2 % des dépôts à préavis en dollars canadiens sujets aux réserves, plus 2 % de la différence positive entre ces dépôts à préavis en monnaie canadienne et 500 millions de dollars et 3 % des dépôts en monnaies étrangères sujets aux réserves. À partir du 1^{er} mars 1981 et pendant chacune des sept périodes de 6 mois suivantes, le taux applicable aux dépôts à vue en dollars canadiens a été réduit à intervalles réguliers de 1/4 %, tandis que le taux applicable à la différence positive entre le montant des dépôts à préavis en dollars canadiens sujets aux réserves et 500 millions a été réduit régulièrement de 1/8 %. En septembre 1984, les taux s'établissaient respectivement à 10 % et 1 %. Depuis janvier 1969, la moyenne des réserves-encaisse doit se calculer sur une quinzaine et non plus sur un mois. Les périodes de réserve sont maintenant les jours ouvrables 1) du 1^{er} au 15 du mois et 2) du 16 à la fin du mois.

• *Les ajustements aux périodes antérieures* comprennent les révisions aux données déjà communiquées à la Banque et utilisées dans le calcul des réserves-encaisse et des réserves secondaires du mois précédent. Lorsqu'on applique les taux appropriés des réserves-encaisse et des réserves secondaires à ces données révisées, les réserves-encaisse et les réserves secondaires du mois sur lequel portent les révisions augmentent ou diminuent en conséquence. • *Le montant cumulé des excédents journaliers des réserves-encaisse* représente la somme pondérée des excédents journaliers des réserves-encaisse depuis le début de la période de réserve. On trouvera dans l'article publié dans la Revue en septembre 1983 une description assez détaillée de la méthode de pondération. • *Les réserves secondaires* comprennent les bons du Trésor (valeur nominale) et les prêts au jour le jour aux courtiers en valeurs mobilières, plus tout excédent des réserves-encaisse sur le minimum requis. Aux termes du paragraphe 18(2) de la Loi sur la Banque du Canada, la Banque a le pouvoir d'établir un coefficient minimal des réserves secondaires, compris entre 0 et 12 % du passif-dépôts. En mars 1968, elle a effectivement fixé un minimum qui remplaçait celui que les banques avaient maintenu volontairement jusque-là et qui était d'au moins 7 % de leur passif-dépôts en dollars canadiens. Depuis, les banques à charte sont tenues de maintenir des réserves secondaires, dont la moyenne mensuelle ne peut être inférieure à un certain coefficient qui a été fixé à 6 % en mars 1968, puis modifié de la façon suivante : 7 % en avril 1968, 8 % en juin 1969, 9 % en juillet 1970, 8 1/2 % en décembre 1971, 8 % en janvier 1972, 7 % en décembre 1974, 6 % en janvier 1975, 5 1/2 % en mars 1975, 5 % en février 1977 et 4 % en décembre 1981.

C11

Source : Banque du Canada

Ces séries englobent tous les avoirs et engagements des banques à charte en monnaies étrangères au Canada et à l'étranger, ainsi que toutes les opérations sur l'or. Ces séries remontent à janvier 1954. On trouvera aux Tableaux C12 et C13 des renseignements supplémentaires sur tous les avoirs et engagements en monnaies étrangères comptabilisés au Canada. La Banque Continentale du Canada a commencé ses opérations le 4 juin 1979 avec le statut de filiale en propriété exclusive de la IAC Ltée; les deux institutions ont fusionné le 1^{er} novembre 1981. La Citibanque Canada et trois filiales canadiennes de la société mère, Citibank N.A., ont fusionné le 1^{er} novembre 1982.

Les utilisateurs trouveront, dans les notes relatives aux tableaux parues dans la livraison de décembre 1982 et dans les numéros précédents de la Revue, une description des répercussions que les révisions apportées en 1967 à la Loi sur les banques ont eues sur les données.

• Aucun poste de l'actif dans ce tableau ne tient compte des immeubles des banques à l'étranger. • *Les prêts à vue* comprennent les prêts en monnaies étrangères au jour le jour, à vue ou à court terme aux courtiers en valeurs mobilières et aux agents de change. • *Les autres avoirs* comprennent les pièces et lingots d'or, les pièces de monnaie et billets étrangers ainsi que le solde net des effets en monnaies étrangères en cours de compensation, lequel est souvent négatif.

C12-C13

Source: Bank of Canada

Data cover foreign currency assets and liabilities carried on the books of head offices and branches in Canada. The figures exclude all gold transactions. Back data for the series are available from December 1965. A limited amount of comparable information is available from September 1954. Foreign currency assets and liabilities have been classified by bank and other customers and by country of residence of bank customers. In this classification, foreign banks include the foreign agencies and branches of the Canadian chartered banks. All foreign notes and coin held by chartered banks in Canada are included with U.S. dollar claims on U.S. banks, although a small part of these are holdings of other foreign currencies. Foreign-pay securities issued by Canadian borrowers are included in the assets. On 4 June 1979 the Continental Bank of Canada began operations, initially as a wholly owned subsidiary of IAC Ltd.; the two institutions merged on 1 November 1981. Citibank Canada amalgamated with three Canadian subsidiaries of its parent company, Citibank N.A., effective 1 November 1982.

Following the 1967 revision of the Bank Act, the chartered banks began recording as at the end of each financial year, accumulated appropriations for losses on the liability side of the balance sheet rather than on the asset side as deductions from loans and other assets. This change affected the series shown from 31 October 1967. Commencing with 30 September 1970, assets and liabilities with residents of Puerto Rico and the U.S. Virgin Islands are included with residents of the United States instead of with residents of all other countries. In June 1973 a change was made in the classification by country of residence. The two groupings, *Other sterling area* and *Continental Europe*, were discontinued and new groupings, *Other EEC countries* and *Other OECD countries*, were introduced. The data for these two groups are reported quarterly rather than monthly. Because of these modifications, the data shown under *All other countries* are not comparable to the previous series shown under the same heading, and are reported quarterly. Beginning in June 1978, accrued interest and net debit/credit items in transit are excluded from the data, and the data are reported gross of specific provisions for losses.

• *Other OECD countries* includes the Bank for International Settlements. • *All other countries* includes the International Bank for Reconstruction and Development. • A breakdown of *other* assets into securities and loans is available upon request.

D1

Source: Statistics Canada

Quarterly statements of the estimated assets and liabilities of trust companies and of mortgage loan companies are published by Statistics Canada in "Financial Institutions." The quarterly balance sheet statements give estimates for the entire industry group as it existed in the quarter under consideration. Because of changes in the structure of the industry group due to mergers, consolidations, spin-offs, reclassification of companies into or out of the group, etc., the data are not always strictly comparable and should be used with caution when examining changes over time. Quarterly data on the movement of funds, also published in the Statistics Canada bulletin "Financial Institutions", provide a more accurate yardstick for measuring changes over time within the industry. Breaks in series resulting from changes in definitions or a reclassification of items are explained in the following notes.

In Table D1, the data are consolidated and include all trust companies incorporated under the Trust Companies Act of Canada and corresponding provincial acts, all mortgage loan companies incorporated under the Dominion Loan Act and other companies that raise funds from the public primarily for mortgage lending. Privately financed mortgage companies are not included. The amounts shown are at book value. Since the data in Table D1 include any recent revisions to the figures, they may not at times fully correspond with the series published by Statistics Canada.

In the third quarter of 1969, a change was made in the classification of short-term assets of trust companies denominated in foreign currency. Previously, part of these assets had been included with term and notice deposits at chartered banks. They were then included with

C12 et C13

Source : Banque du Canada

Ces données ne comprennent que les avoirs et engagements en monnaies étrangères des sièges ou des succursales canadiennes des banques à charte; toutes les opérations sur l'or en sont exclues. Ces séries remontent à décembre 1965. Des données partielles comparables sont cependant disponibles à partir de septembre 1954. Les avoirs et engagements en monnaies étrangères des banques à charte sont répartis en deux catégories — banques et autres clients — puis suivant le pays de résidence des clients. Cette classification assimile aux banques étrangères les succursales et agences des banques canadiennes à l'étranger. Les monnaies étrangères (billets et pièces) détenues au Canada par les banques à charte sont assimilées à une créance sur les banques américaines, bien qu'elles comprennent, dans une faible proportion cependant, des monnaies d'autres pays. Les titres libellés en monnaies étrangères émis par des emprunteurs canadiens sont également recensés comme avoirs en monnaies étrangères. La Banque Continentale du Canada a commencé ses opérations le 4 juin 1979 avec le statut de filiale en propriété exclusive de la IAC Ltée; les deux institutions ont fusionné le 1^{er} novembre 1981. La Citibanque Canada et trois filiales canadiennes de la société mère, Citibank N.A., ont fusionné le 1^{er} novembre 1982.

Après la révision de la Loi sur les banques en 1967, les banques à charte ont commencé à porter à un compte spécial, au passif de leur bilan annuel, le montant cumulé des provisions pour pertes, alors qu'auparavant elles défalquaient ces provisions de l'encours des prêts et d'autres postes de l'actif. Ce changement a influencé les données produites à partir du 31 octobre 1967. Depuis le 30 septembre 1970, les résidents de Porto-Rico et des Îles Vierges américaines sont considérés aux fins de ce tableau comme résidents des États-Unis, alors qu'auparavant ils figuraient à la rubrique *Tous autres pays*. La ventilation par pays de résidence des clients a été modifiée en juin 1973; les rubriques *Autres pays de la zone sterling* et *Europe continentale* ont été supprimées tandis que deux rubriques intitulées *Autres pays de la CEE* et *Autres pays de l'OCDE*, dont les données sont trimestrielles et non pas mensuelles, ont été ajoutées au tableau. En raison de ces modifications, les statistiques concernant *Tous autres pays*, désormais trimestrielles, ne sont plus comparables à celles qui figuraient antérieurement sous la même rubrique. Depuis juin 1978, les intérêts courus et le montant net des effets en cours de compensation sont exclus des données et les provisions spécifiques pour pertes ne sont pas déduites des montants déclarés.

• La rubrique *Autres pays de l'OCDE* comprend notamment la Banque des Règlements Internationaux. • *Tous autres pays*. Comprend la Banque Internationale pour la Reconstruction et le Développement. • On peut obtenir sur demande une ventilation, selon les titres et les prêts, des avoirs mentionnés dans les colonnes *Autres*.

D1

Source : Statistique Canada

Statistique Canada publie dans sa revue «Institutions financières» des estimations trimestrielles portant sur les avoirs et les engagements des sociétés de fiducie ou de prêt hypothécaire. Les situations trimestrielles sont des estimations pour l'ensemble des établissements existant aux dates indiquées. Par suite des modifications des institutions couvertes par ce tableau — modifications consécutives notamment aux fusions, consolidations et dédoublements d'entreprises ainsi qu'à l'addition ou à l'élimination d'établissements — les différentes séries ne sont pas toujours strictement comparables et il convient d'être prudent lorsqu'on étudie l'évolution à long terme de ces données. Les données trimestrielles sur les mouvements de fonds, qu'on trouvera également dans le bulletin «Institutions financières» de Statistique Canada, constituent un instrument de mesure plus précis pour évaluer les changements survenus au cours des années. Les modifications apportées de temps à autre aux définitions et au regroupement de certaines rubriques ont entraîné des ruptures dans certaines séries; on trouvera à ce sujet des explications dans les notes ci-dessous.

Le Tableau D1 contient des données consolidées couvrant les sociétés de fiducie constituées en vertu de la Loi sur les sociétés de fiducie et des lois provinciales analogues, les sociétés de prêt hypothécaire constituées en vertu de la Loi fédérale sur les sociétés de prêt, ainsi que les autres sociétés qui recueillent des fonds auprès du public en vue d'effectuer des prêts hypothécaires. Les sociétés de prêt hypothécaire financées à titre privé n'entrent pas dans ces statistiques. Les avoirs figurent ici à leur valeur comptable. Vu que les données du Tableau D1 sont révisées périodiquement pour tenir compte des modifications les plus récentes aux séries, il est possible qu'elles ne soient pas toujours identiques à celles de Statistique Canada.

Au troisième trimestre de 1969, une modification a été apportée à la classification des avoirs à court terme en monnaies étrangères des sociétés de fiducie. Une partie de ces avoirs, qui avait été jusque-là classée avec les

demand deposits and foreign securities. As a result, earlier data for the following series are not strictly comparable: cash and demand deposits, term and notice deposits at chartered banks, and foreign securities. There was also a change in the coverage of the data for mortgage companies in the fourth quarter of 1970 that resulted in a break in a number of series.

A number of changes in the treatment of certain items beginning in the fourth quarter of 1972 have resulted in a break in the continuity of certain series. Prior to that time, provincial and municipal treasury bills and short-term notes were included with provincial and municipal bonds; personal loans were included with collateral loans and the maturity split for term deposits and guaranteed investment certificates one year and over was 1-6 years and over 6 years. Foreign currency deposits were all included with cash and demand deposits; swapped deposits are now shown separately while the remaining foreign currency term deposits are included with chartered bank term and notice deposits. Debentures issued under trust indenture were included with term deposits and debentures; mortgage company notes included only notes with an original maturity of less than one year while those of one year or more were included with term deposits and debentures; accounts payable and accruals were included with other liabilities. In addition investments in and advances to subsidiary companies outside Canada, were included in foreign securities; they are now included in investment in affiliated companies. Beginning January 1977, non-chequable savings deposits include some tax-sheltered deposits previously classified elsewhere.

• *Cash and demand deposits* are composed of cash on hand and demand deposits in Canadian and foreign currencies. • *Provincial and municipal bonds* include guaranteed bonds. • *Corporate bonds* include other investments in Canada. • *Collateral loans* include only such loans to investment dealers. • *Other assets* include shares in corporations outside Canada, other collateral loans, lease contracts, accounts receivable and accruals, fixed assets, real estate held for sale and other miscellaneous assets.

• *Bank loans* include loans from Canadian chartered banks in Canadian dollars and foreign currencies, and loans from other banks. • *Promissory notes* comprise those notes typically distributed through an investment dealer or chartered bank, other notes and loans payable, and subordinated notes. Amounts owing to parent, subsidiary and affiliated companies are not included. • *Other promissory notes* include promissory notes with a maturity of more than one year plus other notes of the trust and mortgage loan companies.

• *Other liabilities* include deferred income and accumulated deferred income taxes since the first quarter of 1969. • *Shareholders' equity* includes paid in capital, contributed surplus, investment reserves, reserve fund and retained earnings.

D2–D3

Source: Bank of Canada

Data in Table D2 are obtained by subtracting data for the chartered bank mortgage loan subsidiaries from Bank of Canada estimates of total industry figures. Total industry data for the quarter-end months are based on the Statistics Canada quarterly survey of trust and mortgage loan companies as shown in Table D1 and include any recent revisions to the figures. The intra-quarter months are estimated from the quarter-end values on the basis of a survey by the Bank of Canada covering companies that represent a significant percentage of the trust and mortgage loan industry.

Data in Table D3 originate from the monthly survey by the Bank of Canada and, to the best of our knowledge, cover all mortgage loan companies associated with the chartered banks. These data are netted from the total industry data to obtain estimates for trust and mortgage loan companies excluding the subsidiaries of chartered banks shown in Table D2.

For quarter-end months, the sum of the data shown in Tables D2 and D3 should correspond with the quarterly figures shown in Table D1.

dépôts bancaires à terme ou à préavis, a été groupée avec les dépôts à vue et les titres en monnaies étrangères. On comprend donc que les données antérieures et les données postérieures à cette modification ne soient pas strictement comparables pour les postes suivants : encaisse et dépôts à vue, dépôts à terme ou à préavis dans des banques à charte, titres étrangers. Par la suite, au dernier trimestre de 1970, il s'est produit une nouvelle rupture dans certaines séries du Tableau D1, en raison d'un élargissement de l'échantillon des sociétés de prêt hypothécaire étudiées.

D'autres modifications apportées à partir du dernier trimestre de 1972 à la ventilation de certains postes se sont traduites par une rupture dans les séries en cause. Jusque-là, les bons du Trésor et les billets à court terme des administrations provinciales et municipales étaient classés avec les obligations des provinces et des municipalités; les prêts personnels étaient groupés avec les prêts sur nantissement, et la ventilation d'après l'échéance des dépôts à terme et des certificats de placement garantis d'un an ou plus comportait deux catégories : 1 à 6 ans et 6 ans ou plus. La rubrique *Encaisse et dépôts à vue* comprenait les dépôts en monnaies étrangères; désormais, les dépôts-swaps sont groupés séparément, tandis que les autres dépôts à terme en monnaies étrangères sont classés avec les dépôts à terme et les dépôts à préavis dans les banques à charte. Les débentures émises en vertu d'un certificat de fiducie étaient classées avec les dépôts à terme et les débentures. Les billets des sociétés de prêt hypothécaire ne comprenaient que les billets dont l'échéance à l'émission était de moins d'un an, ceux d'un an ou plus étant groupés avec les dépôts à terme et les débentures; les créiteurs et le passif couru étaient classés avec les autres éléments du passif. En outre, les placements dans les filiales à l'étranger et les avances consenties à ces dernières, qui étaient classés à la rubrique *Titres en monnaies étrangères*, sont maintenant groupés avec les placements dans les sociétés affiliées. Depuis janvier 1977, les dépôts d'épargne non transférables par chèque comprennent certains dépôts bénéficiant d'un traitement fiscal privilégié qui étaient classés ailleurs auparavant.

• La rubrique *Encaisse et dépôts à vue* comprend les espèces et les dépôts à vue en dollars canadiens ou en monnaies étrangères. • Les *obligations des provinces et des municipalités* comprennent les obligations émises sous la garantie de celles-ci. • Le poste *Obligations des sociétés* comprend aussi d'autres placements effectués au Canada. • *Prêts sur nantissement*. Cette rubrique comprend exclusivement le crédit octroyé aux courtiers en valeurs mobilières contre nantissement de titres. • Les *autres éléments de l'actif* comprennent les actions de sociétés constituées à l'étranger, les autres prêts sur nantissement, les baux financiers, les débiteurs et l'actif couru, les immobilisations, les immeubles destinés à être vendus et d'autres avoirs.

• Les *emprunts bancaires* comprennent les emprunts en dollars canadiens ou en monnaies étrangères auprès des banques à charte canadiennes ou auprès d'autres banques. • Les *billets à ordre* comprennent les billets placés habituellement par l'entremise d'un courtier en valeurs mobilières ou d'une banque à charte, certains autres billets et prêts ainsi que les billets subalternes. Les sommes dues aux maisons mères, aux filiales et aux sociétés affiliées n'entrent pas dans cette catégorie. • Les *autres billets à ordre* comprennent les billets à ordre à plus d'un an et les autres billets émis par des sociétés de fiducie ou de prêt hypothécaire. • Les *autres éléments du passif* comprennent, depuis le premier trimestre de 1969, les revenus différés et le montant cumulé des impôts différés sur le revenu. • *L'avoir propre des actionnaires* comprend le capital versé, le surplus d'apport, les réserves pour dépréciation du portefeuille-titres, le fonds de prévoyance et les bénéfices non répartis.

D2 et D3

Source : Banque du Canada

Pour obtenir les données du Tableau D2, on a déduit des estimations faites par la Banque du Canada pour l'ensemble du secteur les données relatives aux filiales hypothécaires des banques à charte. Les données de l'ensemble des sociétés de prêt hypothécaire pour le dernier mois de chaque trimestre sont établies à partir des résultats – reproduits au Tableau D1 – d'une enquête trimestrielle de Statistique Canada sur les sociétés de fiducie ou de prêt hypothécaire et tiennent compte de toutes les révisions récentes aux séries concernées. Les chiffres des autres mois sont des estimations obtenues à partir des données de fin de trimestre; ils sont corrigés à l'aide des données provenant d'une enquête menée par la Banque du Canada auprès d'un échantillon très représentatif du secteur des sociétés de fiducie ou de prêt hypothécaire.

Les données du Tableau D3 proviennent de l'enquête mensuelle de la Banque du Canada et couvrent toutes les sociétés de prêt hypothécaire liées aux banques à charte que nous avons pu recenser. En déduisant ces données de celles de l'ensemble du secteur, on obtient les estimations reproduites au Tableau D2, qui porte sur les sociétés de fiducie ou de prêt hypothécaire autres que les filiales des banques à charte.

Les sommes des données de fin de trimestre reproduites aux Tableaux D2 et D3 devraient correspondre aux chiffres trimestriels du Tableau D1.

• *Cash and liquid assets* include cash and demand deposits, treasury bills, term and notice deposits at banks and other institutions, short-term paper, collateral loans and foreign securities.

D4

Source: Statistics Canada

Data are drawn from the Statistics Canada publications "Business Financial Statistics" and "Financial Institutions." The quarterly balance sheet statements give estimates for the entire industry group as it existed in the quarter under consideration. Because of changes in the structure of the industry group due to mergers, consolidations, spin-offs, reclassification of companies into or out of the group, etc., the data are not always strictly comparable and should be used with caution when examining changes over time. Movement of funds data are not published for credit unions. Breaks in series resulting from changes in definitions or a reclassification of items are explained in the following notes.

Local credit unions and caisses populaires include all credit unions or caisses populaires chartered by provinces to carry on credit activities within the province. The data do not include central credit unions (leagues and other organizations that act as a central body in performing services for local credit unions). Statistics for centrals can be found in the Statistics Canada publication "Financial Institutions." In the table, *other assets* include financial investment not included elsewhere, interest, fixed assets after deduction of accumulated depreciation and stabilization fund deposits.

D5

Source: Bank of Canada

La Banque Populaire (previously a savings bank, La Banque d'Économie de Québec) commenced operations as a chartered bank on 10 November 1969 and its figures have been excluded from this table since that date. From November 1981, data in this table consolidate all wholly and majority owned subsidiaries of Quebec savings banks.

• *Cash* consists of Bank of Canada notes plus deposits with the Bank of Canada and with chartered banks. Deposits in foreign currencies with chartered banks are not included. Beginning November 1981, interest-bearing deposits with chartered banks are shown separately. • *Canadian securities* include guaranteed issues by all levels of government.

• *All other assets* include bank premises, gold, coin and other foreign currency, deposits with banks not included elsewhere, cheques and other items in transit (net), and other assets.

• *Non-personal deposits* consist largely of non-personal fixed term deposits. Also included are provincial government deposits, other non-personal deposits and foreign currency deposits. • *All other liabilities* include shareholders' equity (capital, appropriations for contingencies, contributed surplus, general reserve and retained earnings) and other liabilities. Beginning November 1981, all other liabilities also include minority interests in subsidiaries and debentures and other long-term debt.

• Le poste *Encaisse et avoirs liquides* comprend l'encaisse et les dépôts à vue, les bons du Trésor, les dépôts à terme ou à préavis dans les banques et autres institutions financières, le papier à court terme, les prêts sur nantissement et les titres en monnaies étrangères.

D4

Source: Statistique Canada

Ces données sont tirées des publications suivantes de Statistique Canada: «Business Financial Statistics» et «Institutions financières». Les situations trimestrielles sont des estimations pour l'ensemble des établissements existant aux dates indiquées. Par suite des modifications des institutions couvertes par ce tableau — modifications consécutives notamment aux fusions, consolidations et dédoublements d'entreprises ainsi qu'à l'addition ou à l'élimination d'établissements — les différentes séries ne sont pas toujours strictement comparables et il convient d'être prudent lorsqu'on étudie l'évolution à long terme de ces données. À noter toutefois que, dans le cas des caisses populaires et credit unions, les données concernant les mouvements de fonds ne sont pas disponibles. Les modifications apportées de temps à autre aux définitions et au regroupement de certaines rubriques ont entraîné des ruptures dans certaines séries; on trouvera à ce sujet des explications dans les notes ci-dessous.

Les caisses populaires et credit unions locales comprennent tous les établissements généralement désignés sous ce nom et constitués en vertu d'une loi provinciale pour faire des opérations de crédit à l'intérieur d'une province. Les données ne comprennent pas les chiffres des centrales (fédérations ou autres organismes qui, en qualité de centrales, fournissent des services aux institutions locales). On trouvera dans le bulletin «Institutions financières» de Statistique Canada des données relatives aux centrales. Le poste *Autres éléments de l'actif* comprend certains investissements financiers qui ne figurent pas sous d'autres rubriques, les intérêts, les immobilisations moins leurs amortissements, et les dépôts au titre des fonds de stabilisation.

D5

Source: Banque du Canada

La Banque d'Économie de Québec, jusque-là banque d'épargne, est devenue banque à charte le 10 novembre 1969, sous le nom de Banque Populaire. Les données la concernant ne figurent donc plus à ce tableau depuis cette date. Depuis novembre 1981, toutes les données des filiales dont les banques d'épargne du Québec détiennent la majorité ou l'intégralité des actions sont consolidées à ce tableau.

• Le poste *Encaisse et dépôts* comprend les billets de la Banque du Canada, les dépôts à la Banque du Canada et les dépôts en dollars canadiens dans les banques à charte. Depuis novembre 1981, les dépôts bancaires productifs d'intérêt sont groupés séparément. • Les *titres canadiens* comprennent, selon le cas, les titres garantis par le gouvernement canadien, par les provinces ou par les municipalités. • Les *autres éléments de l'actif* comprennent les immobilisations, les avoirs en or, la monnaie métallique et les monnaies étrangères, les dépôts auprès d'autres banques sauf ceux qui figurent à une autre rubrique, le solde net des chèques et autres effets en cours de compensation et divers autres éléments de l'actif.

• Les *dépôts autres que ceux des particuliers* comprennent surtout des dépôts à terme fixe. Ils comprennent aussi des dépôts des gouvernements provinciaux et des dépôts en devises étrangères. • Les *autres éléments du passif* comprennent l'avoir propre (capital versé, provisions pour éventualités, surplus d'apport, réserve générale et bénéfices non répartis) et divers autres éléments du passif. Depuis novembre 1981, les autres éléments de l'actif comprennent aussi toute participation minoritaire au capital des filiales, des débentures et autres dettes à long terme.

D6–D7

Sources: Statistics Canada, Bank of Canada

The data cover financial corporations that finance goods and services purchased at the factory or at wholesale or retail level, and lend money to persons on the security of promissory notes and chattel mortgages. Included in this latter category are the companies operating under the provisions of the Small Loans Act. The data are at book value. Quarterly data in Table D6 are drawn from the Statistics Canada publication "Financial Institutions" which gives estimates for the entire industry group as it existed in the quarter under consideration. Because of changes in the structure of the industry group due to mergers, consolidations, spin-offs, reclassification of companies into or out of the group, etc., the data are not always strictly comparable and should be used with caution when examining changes over time. Quarterly data on the movement of funds, also published in the Statistics Canada bulletin "Financial Institutions", provide a more accurate yardstick for measuring changes over time within the industry. Breaks in series resulting from changes in definitions or a reclassification of items are explained in the following notes.

The breakdown of accounts and notes receivable shown in this table is not available prior to the first quarter of 1969. A less detailed breakdown of receivables prior to that time can be found in the Statistics Canada publications "Business Financial Statistics: Selected Balance Sheets" and "Financial Institutions". In the first quarter of 1970, outstanding loans associated with the financing of passenger cars used for commercial purposes were reclassified from consumer to industrial and commercial goods. As a result, the earlier data on retail sales financing are not strictly comparable. Data shown for the fourth quarter of 1971 are not strictly comparable with data shown for earlier periods because of the winding up of a bankrupt company. A change in the method of accounting for investments in subsidiaries and in the classification of investments was made in the first quarter of 1973 and earlier data for the series preferred and common shares and investments in subsidiary and affiliated companies are not strictly comparable. On 4 June 1979 the Continental Bank of Canada began operations, initially as a wholly owned subsidiary of IAC Ltd.; the two institutions merged on 1 November 1981.

Prior to the first quarter of 1973, wholly owned finance company subsidiaries of merchandisers and manufacturers other than automobile companies are not included in the data. Since then, the definition of the industry has been expanded to include these subsidiaries.

The data may at times differ from the quarterly figures published in Statistics Canada "Financial Institutions" because of timing differences in incorporating revisions.

The monthly data in Table D7 are estimated from the Statistics Canada quarter-end values on the basis of a survey by the Bank of Canada, and are available only from 1974.

- *Cash and deposits* are composed of cash on hand and demand and term deposits in Canadian and foreign currencies.
- *Business financing* includes commercial loans, capital and dealer loans and mortgage loans on commercial and industrial properties.
- *Personal loans* include loans subject to the Small Loans Act and other personal loans.
- *Other receivables* include property, equipment and vehicles held for sale including reposessions, foreign receivables and other receivables not included elsewhere. Beginning with the first quarter of 1973 all reported unearned finance charges are written off against receivables.

- *Government of Canada securities* include treasury bills and direct and guaranteed bonds.
- *Provincial and municipal securities* include short-term bills and notes and long-term bonds.
- *Other assets* include land, buildings and equipment, unamortized debt discount, and other assets not included elsewhere.

- *Accounts payable* include interest and income taxes payable.
- *Other current liabilities* include dealers' credit balances.
- *Other liabilities* include unearned income and other deferred credits, accumulated deferred income taxes, pensions, trusts or earmarked funds and interest of minority shareholders.
- *Shareholders' equity* includes share capital, contributed surplus and retained earnings.

- On Table D7, *cash and deposits, investments and advances, bank loans and long-term debt* include both Canadian dollar and foreign currency items. Also, on Table D7, *total receivables* are shown net of bad or doubtful accounts.

D6 et D7

Sources : Statistique Canada, Banque du Canada

Ces données concernent les sociétés financières qui financent l'achat de biens et de services chez les fabricants, les grossistes et les détaillants, ou qui octroient aux particuliers des prêts sur billet à ordre ou des prêts garantis par des biens meubles. Les sociétés régies par la Loi sur les petits prêts personnels sont comprises dans cette dernière catégorie. Les avoirs figurent à leur valeur comptable. Les données trimestrielles du Tableau D6 sont tirées de la publication de Statistique Canada intitulée « Institutions financières », qui fournit des estimations pour l'ensemble des établissements existant aux dates indiquées. Par suite des modifications des institutions couvertes par ce tableau — modifications consécutives, notamment aux fusions, consolidations et dédoublements d'entreprises ainsi qu'à l'addition ou à l'élimination d'établissements — les différentes séries ne sont pas toujours strictement comparables et il convient d'être prudent lorsqu'on étudie l'évolution à long terme de ces données. Les données trimestrielles sur les mouvements de fonds, qu'on trouvera également dans le bulletin « Institutions financières » de Statistique Canada, constituent un instrument de mesure plus précis pour évaluer les changements survenus au cours des années. Les modifications apportées de temps à autre aux définitions et au regroupement de certaines rubriques ont entraîné des ruptures dans certaines séries; on trouvera à ce sujet des explications dans les notes ci-dessous.

La ventilation des comptes et effets à recevoir n'est pas disponible pour la période antérieure à 1969; néanmoins, on peut en trouver une analyse moins détaillée dans les publications de Statistique Canada intitulées : « Business Financial Statistics: Selected Balance Sheets » et « Institutions financières ». À compter du premier trimestre de 1970, l'encours des prêts pour l'achat de voitures particulières à usage commercial figure dans la colonne *Biens utilisés par les entreprises* et non dans celle des *Biens de consommation*. En conséquence, depuis 1970, les chiffres de ces deux colonnes ne sont pas strictement comparables à ceux des périodes précédentes. Les chiffres du dernier trimestre de 1971 ne sont pas rigoureusement comparables à ceux des trimestres précédents, par suite de la liquidation d'une société en faillite. La méthode de comptabilisation des investissements dans les filiales et la classification des investissements ayant été modifiées au premier trimestre de 1973, les données relatives aux actions privilégiées ou ordinaires ainsi qu'aux investissements dans les filiales ou les sociétés affiliées ne sont plus, à partir de cette date, strictement comparables à celles de la période antérieure. La Banque Continentale du Canada a commencé ses opérations le 4 juin 1979 avec le statut de filiale en propriété exclusive de la IAC Ltée; les deux institutions ont fusionné le 1^{er} novembre 1981.

Avant le premier trimestre de 1973, les données ne comprennent pas les opérations des sociétés de financement filiales en propriété exclusive de grandes entreprises de distribution ou d'entreprises manufacturières autres que les constructeurs de véhicules automobiles. Depuis lors, la définition utilisée a été élargie de façon à inclure ces filiales.

Les données peuvent parfois différer des chiffres trimestriels publiés dans le bulletin « Institutions financières » de Statistique Canada, les révisions n'étant pas incorporées au même moment.

Les données mensuelles au Tableau D7 sont des estimations fondées sur les chiffres de fin de trimestre de Statistique Canada et établies à partir d'une enquête de la Banque du Canada. Ces données remontent à 1974 seulement.

- Le poste *Encaisse et dépôts* comprend les espèces et les dépôts à vue ou à terme en monnaie canadienne et en monnaies étrangères.
- Le *financement des entreprises* comprend les prêts commerciaux, les prêts en vue d'immobilisations et les prêts aux concessionnaires ainsi que les prêts hypothécaires sur des propriétés commerciales ou industrielles.
- Les *prêts personnels* comprennent les prêts régis par la Loi sur les petits prêts personnels et les autres prêts personnels.
- Les *autres sommes à recevoir* comprennent les immeubles, l'équipement et les véhicules (y compris les reprises) lorsque ces avoirs sont destinés à être vendus, les créances sur l'étranger et les créances qui ne figurent pas à une autre rubrique. À partir du premier trimestre de 1973, tous les revenus escomptés par les sociétés au titre de leurs opérations de financement sont déduits des sommes à recevoir.
- Les *titres du gouvernement canadien* comprennent les bons du Trésor et les obligations émises ou garanties par le gouvernement.
- Les *titres des provinces et des municipalités* comprennent les billets à court terme et les obligations à long terme.
- Les *autres éléments de l'actif* comprennent les terrains, les immeubles et l'équipement, les escomptes consentis et non amortis sur les prix d'émission des titres et divers éléments de l'actif qui ne figurent pas à une autre rubrique.

- Les *comptes à payer* comprennent l'impôt sur le revenu et les intérêts à payer.
- Les *autres engagements à court terme* comprennent les soldes créditeurs aux comptes des marchands emprunteurs.
- Les *autres éléments du passif* comprennent les revenus imputables aux exercices suivants et les autres crédits différés, le montant cumulé des impôts différés sur le revenu, les fonds des caisses de retraite, les fonds en fiducie ou affectés à un emploi particulier et l'avoir des actionnaires minoritaires.
- L'*avoir propre des actionnaires* comprend le capital versé, le surplus d'apport et les bénéfices non distribués.

Source: Canadian Life and Health Insurance Association

Data are based on Canadian dollar transactions of 16 companies whose net premium income in Canada in 1970 was 80 per cent of the total for all companies registered under the federal insurance acts. Prior to June 1965, the data related to 12 companies having 74 per cent of net premium income in 1964.

• *Cash* consists of certificates of deposit and balances held in the Canadian offices of the life insurance companies or in banks in Canada, and guaranteed investment certificates issued by trust companies. Prior to 1966, securities held under buy-back or dealer loan arrangements were also included; since then these securities have been included within the relevant security categories.

• *Provincial and municipal securities* include guaranteed issues. • *Corporate and other bonds* include bonds payable only or optionally in Canadian dollars issued by Canadian corporations and institutions. Bonds of foreign incorporated companies and institutions and foreign governments payable in Canadian dollars only, are also included. Prior to 1963, the data include transactions in short-term paper. • Net investments in *sales finance and consumer loan company* paper are included with other paper from 1963 to 1965. • *Other commercial paper* consists of paper of finance company subsidiaries of merchandisers and of manufacturers other than automobile companies.

• Investment in *mortgage loans and sales agreements* represents the net of gross disbursements and gross receipts. The gross figures for mortgage transactions are shown in the last two columns of the table. • The *balancing item* represents mainly Canadian dollars available for insurance operations.

D9

Source: Investment Dealers Association of Canada

Weekly data are available only from 30 November 1977. The inventory positions are reported as at the close of business each Wednesday. The securities are classified on the basis of their term to maturity at time of issue. The inventory figures include member dealers' long positions (i.e., free inventory, securities held under repurchase agreements and securities sold with dealer call features) at par value on a trade date basis. Borrowed securities, securities held under sell-back arrangements and repurchase agreements sold to maturity are excluded. Short positions are netted against long positions. On 4 June 1979 the Continental Bank of Canada began operations, initially as a wholly owned subsidiary of IAC Ltd.; the two institutions merged on 1 November 1981.

• *Sales finance company and other commercial paper* includes sales finance and consumer loan company paper and other commercial paper; *trust and mortgage loan company obligations* include guaranteed investment certificates and notes. • *Canadian notes 1-5 years* include chartered bank deposit receipts and bearer term notes, provincial direct and guaranteed notes, municipal direct and guaranteed notes, Canadian commercial and finance company paper, trust and mortgage loan company obligations. • *Bonds* exclude issues denominated in U.S. dollars or other foreign currency as well as euro-Canadian dollar bond issues.

• Au Tableau D7, les postes *Encaisse et dépôts*, *Portefeuille-titres et avances*, *Emprunts bancaires et Engagements à long terme* comprennent les effets libellés en dollars canadiens ou en monnaies étrangères. De plus, l'ensemble des sommes à recevoir est obtenu par déduction des créances douteuses ou irrécouvrables.

D8

Source : L'Association canadienne des compagnies d'assurances de personnes

Ces données englobent les opérations en dollars canadiens de seize compagnies, qui ont touché 80 % des primes nettes encaissées au Canada en 1970 par l'ensemble des compagnies inscrites au Registre fédéral des compagnies d'assurance-vie. Avant juin 1965, les données n'englobaient que douze compagnies, qui avaient encaissé 74 % des primes nettes en 1964.

• L'*encaisse* comprend les certificats de dépôt et les encaisses détenus par les bureaux canadiens des compagnies d'assurance-vie et les dépôts en banque au Canada ainsi que les certificats de placement garantis émis par les sociétés de fiducie. Avant 1966, les titres pris en pension ou en couverture d'avances à des courtiers en valeurs figuraient à cette rubrique; depuis, ils figurent à leurs rubriques respectives. • Les *titres des provinces et des municipalités* comprennent les titres garantis par elles. • Les *obligations de sociétés ou d'autres emprunteurs* comprennent les obligations émises par les sociétés et institutions canadiennes et payables, exclusivement ou au choix du porteur, en dollars canadiens. Elles comprennent également les obligations des sociétés, institutions et gouvernements étrangers qui ne sont payables qu'en dollars canadiens et, avant 1963, le papier à court terme. • De 1963 à 1965, le papier à court terme des *sociétés de financement ou de prêt à la consommation* était compris avec celui des autres sociétés. • Le *papier à court terme des autres sociétés* comprend les effets émis par les sociétés de financement filiales d'entreprises de distribution et de manufacturiers autres que les constructeurs d'automobiles.

• Les *prêts hypothécaires et contrats de vente* représentent la différence entre les décaissements bruts et les encaissements bruts. Les chiffres bruts des opérations hypothécaires sont reproduits dans les deux dernières colonnes du tableau. • Les *autres sources* sont essentiellement le produit net des opérations d'assurance au Canada.

D9

Source : Association canadienne des courtiers en valeurs mobilières

Les statistiques hebdomadaires ne sont disponibles qu'à partir du 30 novembre 1977. Les chiffres déclarés pour les stocks de titres sont ceux des mercredis à la clôture des opérations; les titres ont été répartis suivant leur échéance à l'émission. Les données indiquées représentent la position en compte des courtiers affiliés à l'Association, les titres étant inscrits à leur valeur nominale et selon les dates de transaction. (La position en compte comprend les stocks disponibles, les titres en pension et les titres vendus avec clause de rachat par le courtier.) En sont exclus les titres empruntés, les titres acquis avec clause de revente et les titres cédés avec clause de rachat vendus à l'échéance. En outre, les positions à découvert sont déduites des positions en compte. La Banque Continentale du Canada a commencé ses opérations le 4 juin 1979 avec le statut de filiale en propriété exclusive de la IAC Ltée; les deux institutions ont fusionné le 1^{er} novembre 1981.

• *Papier des sociétés de financement et d'autres sociétés*. Comprend aussi bien le papier des sociétés de financement ou de prêt à la consommation que celui des autres entreprises. Les *créances sur les sociétés de fiducie ou de prêt hypothécaire* comprennent les certificats de placement garantis et les billets. • *Billets canadiens 1 à 5 ans*. Comprend les bons de caisse et les billets à terme au porteur émis par les banques à charte, les billets émis ou garantis par les provinces, les billets émis ou garantis par les municipalités, le papier commercial canadien, le papier des sociétés de financement et les créances sur les sociétés de fiducie ou de prêt hypothécaire. • *Obligations*. En sont exclues les émissions libellées en dollars É.-U. ou en toute autre devise, de même que les obligations en euro-dollars canadiens.

D10

Source: Statistics Canada

Data are drawn from the Statistics Canada publications “Business Financial Statistics” and “Financial Institutions.” The quarterly balance sheet statements give estimates for the entire industry group as it existed in the quarter under consideration. Because of changes in the structure of the industry group due to mergers, consolidations, spin-offs, reclassification of companies into or out of the group, etc., the data are not always strictly comparable and should be used with caution when examining changes over time. Quarterly data on the movement of funds, also published in the Statistics Canada bulletin “Financial Institutions”, provide a more accurate yardstick for measuring changes over time within the industry. Breaks in series resulting from changes in definitions or a reclassification of items are explained in the following notes.

Investment funds are here defined as firms that invest in a portfolio of various types of securities, sell shares or units to the public at a price fixed in relationship to net asset value, and redeem any shares held at net asset value. The data do not include funds set up to operate pension plans, special non-resident owned funds, investment clubs and other investment funds, the shares of which are not available to the general public. In the table, the investment portfolio of the group is shown at cost and at market value. Prior to the first quarter of 1969, investments in, and advances to, subsidiary and affiliated companies are included in investments in Canadian and foreign common shares, and bank and other term deposits are included in short-term paper. Since the fourth quarter of 1971 additional investment funds have been included; the assets and liabilities of these funds totalled almost \$255 million at that time. Prior to 1973, foreign currency swapped deposits were included in cash and demand deposits; since 1973 they are included in holdings of chartered bank term deposits.

- *Cash and demand deposits* are composed of cash on hand and demand deposits in Canadian and foreign currencies.
- *Investment in Canadian preferred and common shares* includes investment in investment fund shares.
- *Other assets* include accrued interest and dividends receivable, amounts due from brokers, and other assets not included elsewhere.
- *Bank loans* include other short-term loans and notes payable.
- *Accounts payable* include income tax liability, amounts due to brokers and other payables.
- *Other liabilities* include long-term debt.

Data are drawn from the Statistics Canada publications “Business Financial Statistics” and “Financial Institutions.” The quarterly balance sheet statements give estimates for the entire industry group as it existed in the quarter under consideration. Because of changes in the structure of the industry group due to mergers, consolidations, spin-offs, reclassification of companies into or out of the group, etc., the data are not always strictly comparable and should be used with caution when examining changes over time. Quarterly data on the movement of funds, also published in the Statistics Canada bulletin “Financial Institutions”, provide a more accurate yardstick for measuring changes over time within the industry. Breaks in series resulting from changes in definitions or a reclassification of items are explained in the following notes.

The data are based mainly on the group of closed-end funds listed in the Financial Post Survey of Investment Funds. Prior to the fourth quarter of 1968, investments in subsidiary and affiliated companies are included in holdings of Canadian common shares, and prior to the first quarter of 1969 bank and other term deposits are included in short-term paper. A change in the method of accounting for investments in subsidiaries and in the classification of investments was made in the first quarter of 1973 and earlier data for the series preferred and common shares and investments in subsidiary and affiliated companies are not strictly comparable. A reclassification of a company out of the industry in the second quarter of 1976 caused a large change in the data on investments in subsidiary companies, and hence data prior to second quarter 1976 are not strictly comparable to data after that date.

Ces données sont tirées des publications suivantes de Statistique Canada : « Business Financial Statistics » et « Institutions financières ». Les situations trimestrielles sont des estimations pour l'ensemble des établissements existant aux dates indiquées. Par suite des modifications des institutions couvertes par ce tableau — modifications consécutives notamment aux fusions, consolidations et dédoublements d'entreprises ainsi qu'à l'addition ou à l'élimination d'établissements — les différentes séries ne sont pas toujours strictement comparables et il convient d'être prudent lorsqu'on étudie l'évolution à long terme de ces données. Les données trimestrielles sur les mouvements de fonds, qu'on trouvera également dans le bulletin « Institutions financières » de Statistique Canada, constituent un instrument de mesure plus précis pour évaluer les changements survenus au cours des années. Les modifications apportées de temps à autre aux définitions et au regroupement de certaines rubriques ont entraîné des ruptures dans certaines séries; on trouvera à ce sujet des explications dans les notes ci-dessous.

Les sociétés de placement sont des sociétés qui placent leurs fonds dans des valeurs mobilières de différentes catégories, vendent et rachètent leurs propres actions ou parts à un prix qui est fonction de la valeur de l'actif net par action ou part. Les données ne comprennent pas les fonds liés à des régimes de retraite, les sociétés spéciales appartenant à des non-résidents, les clubs d'investissement et autres sociétés de placement dont les actions ne sont pas placées dans le public. Le tableau indique le coût d'acquisition et la valeur boursière du portefeuille. Avant le premier trimestre de 1969, les placements dans les filiales ou les sociétés affiliées, y compris les avances qui leur sont consenties, figuraient au portefeuille des actions ordinaires canadiennes et étrangères, tandis que les dépôts à terme dans les banques et les autres institutions étaient ajoutés au papier à court terme. Un certain nombre de sociétés de placement a été ajouté à l'échantillon du Tableau D10 à partir du dernier trimestre de 1971: leurs bilans totalisaient environ 255 millions de dollars. Avant 1973, les dépôts-swaps en devises étaient compris au poste Encaisse et dépôts à vue; depuis 1973, ils sont groupés avec les dépôts à terme dans les banques à charte.

- Le poste *Encaisse et dépôts à vue* comprend les espèces et les dépôts à vue en dollars canadiens ou en monnaies étrangères.
- Les *actions privilégiées ou ordinaires canadiennes* comprennent les actions des sociétés de placement.
- Les *autres éléments de l'actif* comprennent les intérêts et dividendes échus ou courus, les créances sur les agents de change et divers avoirs qui ne figurent pas à d'autres postes.
- Les *emprunts bancaires* comprennent les autres emprunts à court terme et les effets à payer.
- Les *créanciers* comprennent le passif au titre de l'impôt sur le revenu, les sommes dues aux agents de change et les autres créanciers.
- Les *autres éléments du passif* comprennent le passif à long terme.

D11

Source : Statistique Canada

Ces données sont tirées des publications suivantes de Statistique Canada : « Business Financial Statistics » et « Institutions financières ». Les situations trimestrielles sont des estimations pour l'ensemble des établissements existant aux dates indiquées. Par suite des modifications des institutions couvertes par ces tableaux — modifications consécutives notamment aux fusions, consolidations et dédoublements d'entreprises ainsi qu'à l'addition ou à l'élimination d'établissements — les différentes séries ne sont pas toujours strictement comparables et il convient d'être prudent lorsqu'on étudie l'évolution à long terme de ces données. Les données trimestrielles sur les mouvements de fonds, qu'on trouvera également dans le bulletin « Institutions financières » de Statistique Canada, constituent un instrument de mesure plus précis pour évaluer les changements survenus au cours des années. Les modifications apportées de temps à autre aux définitions et au regroupement de certaines rubriques ont entraîné des ruptures dans certaines séries; on trouvera à ce sujet des explications dans les notes ci-dessous.

Ces données concernent essentiellement l'ensemble des sociétés d'investissement à capital fixe qui figurent au « Survey of Investment Funds » du « Financial Post ». Avant le dernier trimestre de 1968, les placements dans les filiales ou les sociétés affiliées figuraient au portefeuille d'actions ordinaires canadiennes, tandis que les dépôts à terme dans les banques et les autres institutions étaient, jusqu'au premier trimestre de 1969, assimilés au papier à court terme. La méthode de comptabilisation des placements dans les filiales et la classification des investissements ayant été modifiées au premier trimestre de 1973, les données relatives aux actions privilégiées ou ordinaires ainsi qu'aux placements dans les filiales ou les sociétés affiliées ne sont plus, à partir de cette date, strictement comparables à celles de la période antérieure. Au deuxième trimestre de 1976, la reclassification d'une société comprise jusque-là dans ce secteur s'est traduite par une modification considérable des données

- *Cash and demand deposits* are composed of cash on hand and demand deposits in Canadian and foreign currencies. Swapped deposits are also included.
- *Corporate bonds and debentures* include, from the beginning of 1973, the item "Other investments in Canada" which is shown separately in the Statistics Canada publication.
- *Investment in Canadian preferred and common shares* includes investment in investment fund shares.
- *Other assets* comprise accrued interest and dividends receivable, amounts due from brokers and other current assets; land, buildings, furniture and leasehold improvements; and other assets not included elsewhere.
- *Other liabilities* include short-term loans and notes payable.

D12

Source: Federal Business Development Bank

The Federal Business Development Bank (FBDB) is a Crown corporation which reports to Parliament through the Minister of State for Small Businesses. It commenced operations on 2 October 1975. Under the terms of the Act establishing the FBDB, the operations of the Industrial Development Bank (IDB) were transferred on that date to the FBDB and the IDB ceased operations. Data in the table prior to October 1975 thus refer to the IDB. Although the new bank operates under somewhat broader terms of reference, the series for the FBDB are comparable to the earlier series for the IDB. The fiscal year-end, however, has been changed from 30 September to 31 March; the figures for 1976, therefore, cover only six months of operations from 30 September 1975 to 31 March 1976.

Commencing 1 October 1971 the allowance for doubtful accounts (now called Provision for future losses) was moved from the liability side of the balance sheet under "Capital" to the asset side of the balance sheet as a negative number against loan and investment assets. This produces some distortion in comparison with earlier years.

- *Net authorizations* represent the amount authorized during the period less cancellations and reductions.
- *Loans outstanding* do not necessarily equal the difference between disbursements and repayments because of financial year-end accounting adjustments.

E1

Source: Bank of Canada

Currency and chartered bank deposits have been combined in this table to show alternative measures of the monetary aggregates. All the series are net of float. Government of Canada deposits with the chartered banks are excluded from all the series. The data relate to averages of Wednesdays and to Wednesdays except for the series on coin held outside banks, which up to December 1976 relates to the end-of-month figure for the previous month. Since then, the Mint has supplied data on a four-week-ending basis and a month-end figure is estimated using a weighted average technique.

The monetary aggregates M1, M2, M3 and total Canadian dollar privately held bank deposits incorporate adjustments to historical data to take account of a number of discontinuities in November 1981 caused mainly by the changes associated with the 1980 Bank Act revision. These adjustments are described in the article in the Bank of Canada Review, March 1983. Data for M1 and for currency and total Canadian dollar privately held bank deposits of residents are available on a weekly basis from January 1953, for M1A from January 1968, for M2 from January 1968 and for M3 from January 1970. The seasonally adjusted M1 is the sum of seasonally adjusted currency and seasonally adjusted demand deposits. Other aggregates are seasonally adjusted as the sum of components. In all cases, the seasonal adjustment is by means of the X-11 variant of the U.S. Bureau of the Census Method II Seasonal Adjustment Program, which employs a ratio to moving average technique. Since the seasonal adjustment is recalculated when an additional 12 months data become available, the series are subject to annual revisions. Mail strikes in 1974, 1975, 1978 and 1981 caused distortions in the demand deposit series and clearly affected the seasonal

relatives aux placements dans les filiales; il en résulte que les données antérieures au deuxième trimestre de 1976 ne sont pas strictement comparables à celles de la période suivante.

- Le poste *Encaisse et dépôts à vue* comprend les espèces et les dépôts à vue en dollars canadiens ou en monnaies étrangères, ainsi que les dépôts-swaps.
- Les *obligations et débetures des sociétés* comprennent à partir du début de 1973 le poste «Autres placements au Canada», qui figure séparément dans la publication de Statistique Canada.
- Les *actions privilégiées ou ordinaires canadiennes* comprennent les actions de sociétés de placement.
- Les *autres éléments de l'actif* comprennent les intérêts et les dividendes échus ou courus, les créances sur les agents de change, les terrains, les immeubles, l'équipement ainsi que les améliorations locatives et divers éléments de l'actif qui ne figurent pas à d'autres postes.
- Les *autres éléments du passif* comprennent les emprunts à court terme et les effets à payer.

D12

Source : Banque fédérale de développement

La Banque fédérale de développement (BFD) est une société de la Couronne qui rend compte au Parlement, par l'entremise du ministre d'État aux petites entreprises, de la conduite des ses affaires. Elle a commencé ses opérations le 2 octobre 1975. En vertu de la loi créant la BFD, cette institution a repris à cette date l'actif et le passif de la BEI (Banque d'expansion industrielle), qui a alors cessé d'exister. Les données antérieures à octobre 1975 sont donc celles de la BEI. Même si la nouvelle banque fonctionne dans un cadre un peu plus vaste, les séries de la BFD sont comparables à celles que publiait la BEI. Toutefois, l'exercice financier de la BFD se termine le 31 mars au lieu du 30 septembre, de sorte que les données de 1976 ne couvrent que la période de six mois comprise entre le 30 septembre 1975 et le 31 mars 1976.

Depuis le 1^{er} octobre 1971, les provisions pour créances douteuses (désignées désormais par l'expression «Provisions pour pertes éventuelles»), qui figuraient jusqu'alors au passif du bilan, à la rubrique «Capital», sont défalquées des avoirs sous forme de prêts et de placements. En raison de cette modification, les données ne sont plus strictement comparables avec celles qui ont été produites précédemment.

- Les *crédits autorisés (montants nets)* représentent les montants autorisés au cours de la période moins les annulations et les réductions.
- L'*encours des prêts* ne représente pas toujours exactement la différence entre les avances et les remboursements, en raison des régularisations comptables en fin d'exercice.

E1

Source : Banque du Canada

Dans ce tableau, on a groupé la monnaie et les dépôts dans les banques à charte afin de montrer différentes définitions des agrégats monétaires. Dans chacune des colonnes du tableau, le montant des effets en cours de compensation et celui des dépôts du gouvernement canadien dans les banques à charte ont été déduits des données. Ces statistiques sont les moyennes mensuelles des mercredis ou les chiffres du mercredi, sauf pour la monnaie métallique hors banques où les données retenues sont, jusqu'en décembre 1976, celles de la fin du mois précédent. Depuis, la Monnaie royale canadienne fournit des données portant sur quatre semaines, lesquelles sont converties en données de fin de mois à l'aide de la technique de la moyenne pondérée.

Les données des agrégats monétaires M1, M2 et M3 et de l'ensemble des dépôts bancaires en dollars canadiens du secteur privé ont été ajustées par rapport aux données rétrospectives pour tenir compte des nombreuses ruptures survenues en 1981 par suite surtout des changements qui ont découlé de la révision de 1980 de la Loi sur les banques. On trouvera une description de ces ajustements dans la livraison de mars 1983 de la Revue de la Banque du Canada. Les données hebdomadaires des agrégats M1 et *Monnaie plus ensemble des dépôts bancaires en dollars canadiens du public* remontent à janvier 1953, celles de M1A à janvier 1968, celles de M2 à janvier 1968 et celles de M3, à janvier 1970. Les données désaisonnalisées de M1 sont la somme des données désaisonnalisées de la monnaie et des données désaisonnalisées des dépôts à vue. Les autres agrégats sont désaisonnalisés une fois effectuée la somme de leur composantes. Dans tous les cas, les données ont été désaisonnalisées à l'aide de la Méthode II, variante X-11 du programme de désaisonnalisation du Bureau de recensement des États-Unis, basée sur l'évolution des moyennes mobiles. Les facteurs de désaisonnalisation étant recalculés chaque fois qu'on dispose de données complètes pour une nouvelle période de douze mois, ces séries sont révisées chaque année. Les grèves des services postaux en 1974, 1975, 1978 et 1981 ont provoqué des perturbations au niveau des statistiques des dépôts à vue et influencé visiblement les facteurs de

adjustment factors for the relevant months. The X-11 'strike option' was used to adjust for these distortions in April and May 1974, November and December 1975, November 1978 and July 1981. (See the note in the May 1977 Review for a discussion of the methodology of these adjustments.) Furthermore, the series for currency and demand deposits, and hence M1, and M1A, are adjusted for the influence of the dates of Wednesdays before the standard X-11 technique is used. (See the note in the March 1979 Review for a discussion of the adjustment for the effects of the dates of Wednesdays.)

La Banque Populaire (previously a savings bank, La Banque d'Économie de Québec) commenced operations as a chartered bank in November 1969. In August 1970, La Banque Populaire merged with La Banque Provinciale du Canada. In June 1977 the Unity Bank of Canada amalgamated with La Banque Provinciale du Canada and in November 1979 La Banque Provinciale du Canada merged with La Banque Canadienne Nationale to become the National Bank of Canada. On 4 June 1979 the Continental Bank of Canada began operations, initially as a wholly owned subsidiary of IAC Ltd.; these two institutions merged on 1 November 1981. Citibank Canada amalgamated with three Canadian subsidiaries of its parent company, Citibank N.A., effective 1 November 1982.

- *Currency outside banks* comprises Bank of Canada notes and coin in circulation. Holdings of notes are calculated by subtracting the amount held by the chartered banks from the total amount of notes outstanding. The amount of coin in circulation outside banks is obtained by subtracting coin held by the chartered banks and the Bank of Canada from the total amount outstanding as reported by the Royal Canadian Mint.
- *Demand deposits*, which include current accounts, in each of the series are Canadian dollar deposits at chartered banks, net of estimated private sector float.
- M1A includes M1 plus daily interest chequable deposits plus non-personal notice deposits.
- M2 includes in addition to M1A other notice deposits plus personal fixed term deposits.
- M3 includes in addition to M2 non-personal fixed term deposits plus foreign currency deposits of residents booked in Canada.
- *Currency plus total Canadian dollar privately held bank deposits* corresponds to the series previously defined as currency and privately held deposits. It differs from M3 by the exclusion of foreign currency deposits of Canadian residents booked at chartered banks in Canada.

- *Credit measures*. All series are average of Wednesdays or average of month-ends, and are shown unadjusted and seasonally adjusted except for other business credit which shows no stable seasonality.
- *Short-term business credit* comprises: business loans, leasing receivables and non-residential mortgages at chartered banks, sales finance and consumer loan companies and financial institutions affiliated with foreign banks; outstanding commercial paper of non-financial businesses; bankers' acceptances; foreign currency loans to residents, excluding Government of Canada, at chartered banks in Canada; and all foreign currency business financing supplied by financial institutions affiliated with foreign banks.

- *Other business credit* includes outstanding bonds and shares of non-financial businesses.
- *Consumer credit* includes estimated amounts of consumer credit outstanding at chartered banks, sales finance and consumer loan companies, trust and mortgage loan companies, life insurance companies, department stores and Quebec savings banks.
- *Mortgage credit* data are estimated amounts of residential mortgage loans at chartered banks, trust and mortgage loan companies, sales finance and consumer loan companies, life insurance companies and Quebec savings banks.

E2

Sources: Bank of Canada, Statistics Canada, Department of Insurance

The table shows estimated amounts of consumer credit outstanding on the books of selected lenders. The data relate mainly to credit extended to individuals, but also include unidentifiable amounts of credit extended for non-consumer purposes. Credit extended through the use of all-purpose credit cards is included with the balances of the selected lender responsible for their issuance. The data do not represent total consumer indebtedness since they do not include credit on the books of: furniture, TV and appliance stores; other retail

désaisonnalisation applicables aux données des mois concernés. L'«option grève» du programme X-11 a servi à tenir compte de ces perturbations en avril et mai 1974, en novembre et décembre 1975, en novembre 1978 et en juillet 1981. (Voir l'article publié dans la Revue de mai 1977 sur la méthode utilisée pour effectuer les ajustements nécessaires.) De plus, toutes les séries relatives à la monnaie et aux dépôts à vue, c'est-à-dire M1 et M1A, sont corrigées afin de tenir compte de l'échelonnement des mercredis avant d'être désaisonnalisées à l'aide de la méthode X-16. (Voir l'article publié dans la Revue de mars 1979 sur la façon de tenir compte de l'échelonnement des mercredis.)

En novembre 1969, la Banque d'Économie de Québec, jusque-là banque d'épargne, est devenue banque à charte sous le nom de Banque Populaire. La Banque Populaire a été absorbée par La Banque Provinciale en août 1970. En juin 1977, L'Unité Banque du Canada a été absorbée par La Banque Provinciale et en novembre 1979 La Banque Provinciale du Canada a fusionné avec la Banque Canadienne Nationale pour former la Banque Nationale du Canada. La Banque Continentale du Canada a commencé ses opérations le 4 juin 1979 avec le statut de filiale en propriété exclusive de la IAC Ltée; les deux institutions ont fusionné le 1^{er} novembre 1981. La Citibank Canada et trois filiales canadiennes de la société mère, Citibank N.A., ont fusionné le 1^{er} novembre 1982.

- Le poste *Monnaie hors banques* comprend les billets de la Banque du Canada et la monnaie métallique en circulation. Pour obtenir le montant des billets détenus par le public, on soustrait de l'encours des billets le montant détenu par les banques à charte. Le montant de la monnaie métallique hors banques s'obtient en soustrayant le montant détenu par les banques à charte et par la Banque du Canada de l'encours global des pièces, chiffre qu'on trouve dans les relevés de la Monnaie royale canadienne.
- *Dépôts à vue*. Les données de cette rubrique, qui comprend les comptes courants, correspondent dans chacune des séries aux dépôts en dollars canadiens dans les banques à charte, déduction faite du solde des effets du secteur privé en cours de compensation.
- M1A comprend, outre les composantes de M1, les dépôts à intérêt quotidien transférables par chèques et les dépôts à préavis autres que ceux des particuliers.
- M2 comprend, en plus des composantes de M1A, les autres dépôts à préavis et les dépôts à terme fixe des particuliers.
- M3 comprend, outre les composantes de M2, les dépôts à terme fixe autres que ceux des particuliers et les dépôts en monnaies étrangères comptabilisés au Canada au nom des résidents.
- *Monnaie plus ensemble des dépôts bancaires en dollars canadiens du public*. Cette série correspond à celle qui était présentée jusqu'ici sous la rubrique Monnaie et dépôts détenus par le public. Elle comprend les mêmes éléments que M3, sauf que les dépôts bancaires en monnaies étrangères tenus au Canada au nom des résidents en sont exclus.

- *Mesures du crédit*. Toutes les séries de ce tableau sont des moyennes de données des mercredis ou de fin de mois et comprennent des données non désaisonnalisées et désaisonnalisées, exception faite des autres prêts aux entreprises, qui ne subissent pas de grandes variations saisonnières.
- *Les crédits à court terme aux entreprises* comprennent les prêts aux entreprises, les créances résultant de baux financiers et les prêts hypothécaires sur immeubles non résidentiels octroyés par les banques à charte, les sociétés de financement ou de prêt à la consommation et des institutions financières affiliées à des banques étrangères; l'encours du papier commercial des entreprises non financières; les acceptations bancaires; les prêts en devises étrangères consentis aux résidents (gouvernement canadien exclu) par les banques à charte au Canada; tous les prêts en devises étrangères qui sont consentis à des entreprises par des institutions financières affiliées à des banques étrangères.
- *Les autres crédits aux entreprises* comprennent l'encours des obligations et actions des entreprises non financières.
- *Le crédit à la consommation* comprend les chiffres estimatifs de l'encours du crédit à la consommation octroyé par les banques à charte, les sociétés de financement ou de prêt à la consommation, les sociétés de fiducie ou de prêt hypothécaire, les compagnies d'assurance-vie, les grands magasins et les banques d'épargne du Québec.
- Les données du *crédit hypothécaire* sont des estimations des prêts hypothécaires à l'habitation accordés par les banques à charte, les sociétés de fiducie ou de prêt hypothécaire, les sociétés de financement ou de prêt à la consommation, les compagnies d'assurance-vie et les banques d'épargne du Québec.

E2

Sources : Banque du Canada, Statistique Canada, Département des assurances

Les données contenues dans ce tableau sont des estimations de l'encours du crédit à la consommation distribué par les principales catégories de prêteurs. Elles concernent essentiellement le crédit accordé aux particuliers, mais comprennent également un montant indéterminé de crédits utilisés par eux à des fins autres que la consommation. Le crédit octroyé sur des cartes de crédit générales figure à l'encours global du crédit déclaré par les établissements qui ont émis ces cartes. Ces chiffres ne représentent pas l'endettement total des consommateurs puisqu'ils ne tiennent pas compte du crédit octroyé par les magasins spécialisés dans la vente de

outlets; motor vehicle dealers; public utilities; other credit card issuers not elsewhere included in the data; and credit card accounts of oil companies. Data on consumer credit on the books of these lenders are available until December 1978 in the Statistics Canada publication "Consumer Credit" (61-004). In addition, data on fully secured loans, long-term indebtedness (such as residential mortgage and home improvement loans), loans between individuals or balances on bills owed to professional practitioners, clubs, hospitals or other personal service establishments are not included. On 4 June 1979 the Continental Bank of Canada began operations, initially as a wholly owned subsidiary of IAC Ltd.; the two institutions merged on 1 November 1981.

- *Chartered bank total personal loans* include all personal loans other than home improvement loans and loans fully secured by marketable bonds and stocks. Additional information can be found in Table C8.
- *Data for sales finance and consumer loan companies* include the conditional sales agreements held by these companies in connection with the instalment financing of consumer goods, personal cash loans made by these companies under the Small Loans Act, and personal cash loans not covered by the Small Loans Act. Data prior to January 1974 are obtained from Statistics Canada publication "Consumer Credit" (61-004) and are not strictly comparable to data since January 1974 because of different estimation techniques. Since January 1970 the data exclude outstanding loans for the financing of passenger cars used for commercial purposes, and since January 1971 the amounts shown are net of unearned interest and finance charges. The data exclude consumer receivables outstanding on the books of wholly owned sales finance company subsidiaries of department stores.

- *Life insurance company policy loans* for dates other than year-end are estimated on the basis of loans made by 16 companies. The data do not include provincially incorporated life insurance companies.
- *Quebec savings banks unsecured personal loans* include all personal loans other than loans fully secured by marketable bonds and stocks. The seasonally adjusted totals include data for Quebec savings banks on an unadjusted basis since no significant seasonality is present. La Banque Populaire (previously a savings bank, La Banque d'Économie de Québec) commenced operations as a chartered bank on 10 November 1969 and its figures have been included with the chartered banks until August 1970 when it merged with La Banque Provinciale du Canada.
- *Department stores* data represent consumer credit outstanding on the books of department stores as published in Statistics Canada's "Department Store Sales and Stocks" (63-002).
- *Data for trust and mortgage loan companies* are not available prior to December 1972.
- The seasonally adjusted total of *foregoing* is the sum of seasonally adjusted component series and therefore differs from the seasonally adjusted consumer credit aggregate appearing in Table E1, which is obtained by adjusting the sum of the component series.
- Data for consumer credit on the books of *credit unions and caisses populaires* are available on a quarterly basis beginning in 1967. Prior to 1967 data were available on an annual basis and quarterly estimates for the period 1956 to 1967 were made using a straight-line interpolation of the year-end data.

E3

Sources : Bank of Canada, Statistics Canada, Canadian Life and Health Insurance Association

The table shows estimated amounts of residential mortgages outstanding at major private lenders. Data on Cansim are available back to 1969.

- Data for *chartered banks* are on an average of Wednesdays basis, and include mortgages held by the bank mortgage loan subsidiaries. The figures for the period prior to November 1981 will therefore differ from those appearing in Table C1, which did not consolidate the mortgage loan subsidiaries. (See March 1983 Bank of Canada Review for a description of the adjustments to consolidate the data prior to November 1981).
- Data for *trust and mortgage loan companies* exclude bank mortgage subsidiaries and are estimated from Statistics Canada end-of-quarter data and a

meubles, de téléviseurs et d'appareils ménagers; par les autres détaillants; par les concessionnaires d'automobiles; par les entreprises de services d'utilité publique, par les sociétés émettrices de cartes de crédit non mentionnées sous d'autres rubriques ni du crédit octroyé par les compagnies pétrolières aux titulaires de leurs cartes de crédit. Les données relatives au crédit à la consommation consenti par ces prêteurs figurent dans «Crédit à la consommation» (publication n° 61-004 de Statistique Canada); elles ne sont pas disponibles pour la période postérieure à décembre 1978. De plus, on ne dispose pas de données sur les prêts entièrement garantis, les dettes à long terme (tels les prêts hypothécaires à l'habitation et les prêts pour amélioration des maisons), les prêts entre particuliers et les dettes envers les membres des professions libérales, les clubs, les hôpitaux et d'autres établissements qui dispensent des services aux ménages. La Banque Continentale du Canada a commencé ses opérations le 4 juin 1979 avec le statut de filiale en propriété exclusive de la IAC Ltée; les deux institutions ont fusionné le 1^{er} novembre 1981.

- *L'ensemble des prêts bancaires personnels* comprend tous les prêts personnels, à l'exclusion des prêts pour l'amélioration des maisons et des prêts entièrement garantis par des obligations ou des actions négociables. On trouvera au Tableau C7 d'autres renseignements à ce sujet.
- Les données relatives aux *sociétés de financement ou de prêt à la consommation* comprennent les ventes à tempérament de biens de consommation couvertes par des contrats de vente conditionnelle escomptés par ces sociétés, les prêts personnels en espèces consentis par les sociétés régies par la Loi sur les petits prêts et les prêts personnels en espèces non régis par la Loi sur les petits prêts. Les données antérieures à janvier 1974 sont tirées de «Crédit à la consommation» (publication n° 61-004 de Statistique Canada) et diffèrent quelque peu de celles de la période postérieure du fait qu'on a adopté en janvier 1974 de nouvelles techniques d'estimation. Depuis janvier 1970, les montants indiqués ne comprennent plus les prêts octroyés en vue de l'achat de voitures particulières destinées à des fins commerciales; depuis janvier 1971, le montant des intérêts non courus et des commissions de financement n'est pas compris dans le chiffre de l'encours indiqué. Les données ne comprennent pas l'encours des comptes-clients des sociétés de financement qui sont des filiales en propriété exclusive des grands magasins.

- Les *prêts sur polices des compagnies d'assurance-vie*, sauf en fin d'année, sont des estimations basées sur les chiffres déclarés par seize compagnies. Ces données ne tiennent pas compte des compagnies d'assurance-vie constituées en vertu d'une loi provinciale. Les *prêts personnels non garantis* octroyés par les banques d'épargne du Québec comprennent tous les prêts qui ne sont pas entièrement garantis par des actions ou des obligations négociables. Ces prêts ont été incorporés dans les totaux des séries désaisonnalisées sans avoir été eux-mêmes désaisonnalisés, les facteurs saisonniers ne jouant que très marginalement dans leur cas. Le 10 novembre 1969, la Banque d'Économie de Québec, jusque-là banque d'épargne, est devenue banque à charte sous le nom de Banque Populaire. Les données relatives à cet établissement ont figuré avec celles des banques à charte jusqu'au moment où, en août 1970, ce dernier a fusionné avec La Banque Provinciale du Canada. Les données relatives aux grands magasins comprennent l'encours du crédit à la consommation accordé par ces derniers et qui figure dans «Ventes et stocks des grands magasins» (publication n° 63-002 de Statistique Canada).
- Les données relatives aux sociétés de fiducie ou de prêt hypothécaire ne sont disponibles qu'à partir de décembre 1972.

- Pour obtenir les données désaisonnalisées de *l'ensemble des postes précédents*, on a fait la somme des composantes désaisonnalisées de cette série, de sorte que les chiffres diffèrent des données désaisonnalisées des agrégats du crédit à la consommation (Tableau E1) qui, elles, sont obtenues par correction directe de la somme des composantes non désaisonnalisées.
- Les statistiques du crédit à la consommation accordé par les *caisses populaires et credit unions* sont publiées sous forme de données trimestrielles depuis 1967. Jusqu'en 1967, elles existaient sous forme de données annuelles et les estimations trimestrielles de la période 1956-1967 étaient obtenues par interpolation linéaire à partir des données de fin d'année.

E3

Sources : Banque du Canada, Statistique Canada, Association canadienne des compagnies d'assurance de personnes

Les statistiques contenues dans ce tableau sont des estimations de l'encours du crédit hypothécaire à l'habitation accordé par les principaux prêteurs du secteur privé; ces données remontent à 1969.

- Les chiffres des *banques à charte* sont des moyennes calculées à partir des relevés des mercredis et couvrent, en plus des opérations des banques, les prêts hypothécaires accordés par les filiales spécialisées dans le crédit hypothécaire. Les chiffres de la période antérieure à novembre 1981 diffèrent de ceux du Tableau C1, car, avant cette date, les données des sociétés de prêt hypothécaire filiales des banques à charte n'étaient pas consolidées avec celles de ces dernières. (On trouvera dans le numéro de mars 1983 de la Revue de la Banque du Canada une explication des corrections apportées aux données de la période antérieure à novembre 1981.)
- Les données concernant

monthly survey of major companies by the Bank of Canada. • Data for *life insurance companies* include life branches, accident and sickness branches, and segregated funds. Residential mortgage holdings for dates other than year-end are estimated from a monthly survey of 16 major companies (see Table D8). • Since June 1973, data for *sales finance and consumer loan companies* are derived from Statistics Canada end-of-quarter data and a monthly survey by the Bank of Canada. Prior to June 1973, monthly values were calculated by interpolating the quarterly Statistics Canada figures. • *Total of foregoing* on an unadjusted basis is comparable to the residential mortgage credit aggregate published in Table E1 of the Review. The seasonally adjusted figure is the sum of seasonally adjusted chartered bank, trust and mortgage loan company and life insurance data and unadjusted data for sales finance and consumer loan companies and Quebec savings banks. It therefore differs from the seasonally adjusted mortgage credit aggregate appearing in Table E1, for which the seasonal adjustment procedure is applied to the sum of the component series. • *Credit unions and caisses populaires* data are as at end of quarter and include holdings of both locals and centrals. • End-of-quarter data for *pension funds* include both residential and non-residential mortgages. • Data for *other financial institutions* are as at end of quarter and include real estate investment trusts (for which data are only available since December 1972), and estimates of residential mortgage holdings of investment funds and property and casualty insurance companies. • The seasonally adjusted figure for *total* residential mortgage holdings represents the sum of the seasonally adjusted components and those unadjusted components where no stable seasonality exists.

F1

Sources: Bank of Canada, Canada Mortgage and Housing Corporation, Board of Governors of the Federal Reserve System

Data are from the above sources unless indicated otherwise in the table. Historical series, available for the Canadian rates shown, can be obtained on request.

- The *Bank Rate* is the minimum rate at which the Bank of Canada makes short-term advances to the chartered banks or to savings banks governed by the Quebec Savings Bank Act, and after 1 December 1980 to all members of the Canadian Payments Association. Typically the Bank Rate is administered directly by the Bank of Canada and is changed from time to time. However, during the period from 1 November 1956 to 24 June 1962 and the period beginning 13 March 1980 the Bank Rate was set at 1/4 of 1 per cent above the weekly average tender rate on 91-day treasury bills. Data for the Bank Rate are shown as at Wednesday, and for the periods when the Bank Rate was tied to the treasury bill rate are based on the average rate of the previous week's 91-day treasury bill tender. • *Government of Canada security yields* refer to direct debt payable in Canadian dollars, excluding extendible issues and Canada Savings Bonds. Three-month and six-month treasury bill yields are averages of rates at the Thursday tender following the Wednesday date shown. Weekly data including that for one-year bills issued at regular two-week intervals are given in Table F2. The rate of return for each series of unmatured Canada Savings Bonds is set out in the Bank of Canada publication "Summary of Government of Canada Direct and Guaranteed Securities and Loans."
- The *McLeod Young Weir bond yields* relate to the last Wednesday of the month; prior to July 1981 they were based on prices on the Thursday following the last Wednesday of the month. These series are available from 1977. The series previously published in the Review, long-term yields for 10 provincial, 10 municipal and 10 industrial bonds, are still available on Cansim from 1948 to date. The long-term averages cover bonds with a remaining term to maturity of 15 years or more, and the bonds comprising the mid-term average have a remaining term of 5-15 years. The composition of the bond portfolio for each series is available on request from McLeod Young Weir Limited. • The rate for *overnight money*

les *sociétés de fiducie ou de prêt hypothécaire* ne comprennent pas celles des sociétés de prêt hypothécaire filiales des banques à charte; elles sont estimées à partir des données de fin de trimestre de Statistique Canada et des résultats d'une enquête mensuelle menée auprès des grandes sociétés par la Banque du Canada.

- *Compagnies d'assurance-vie*. Ce poste comprend les données sur les branches vie, accidents et maladie ainsi que celles des fonds réservés. Les prêts hypothécaires à l'habitation aux dates autres que les fins d'année sont des estimations provenant d'enquêtes mensuelles menées auprès de 16 grandes sociétés (voir Tableau D8).
- Depuis juin 1973, les données relatives aux *sociétés de financement ou de prêt à la consommation* sont dérivées des données de fin de trimestre de Statistique Canada et d'enquêtes menées chaque mois par la Banque du Canada. Auparavant, les données mensuelles étaient calculées par interpolation à partir des données trimestrielles de Statistique Canada. • Les données non désaisonnalisées de l'ensemble des postes précédents sont comparables à celles du crédit hypothécaire à l'habitation publiées au Tableau E1 de la Revue. Les chiffres désaisonnalisés sont obtenus par addition, d'une part, des données désaisonnalisées des banques à charte, des sociétés de fiducie ou de prêt hypothécaire et des compagnies d'assurance-vie et, d'autre part, des données non désaisonnalisées des sociétés de financement ou de prêt à la consommation et des banques d'épargne du Québec. Ils diffèrent donc des chiffres désaisonnalisés du Tableau E1 relatifs au crédit hypothécaire, qui proviennent, eux, de la désaisonnalisation de la somme des composantes. • Les données des *credit unions et des caisses populaires* sont calculées en fin de trimestre et comprennent les portefeuilles des institutions locales et des centrales. • Les données de fin de trimestre des *caisses de retraite* comprennent tant les prêts hypothécaires à l'habitation que les autres prêts hypothécaires. • Les données relatives aux *autres institutions financières* sont calculées en fin de trimestre et comprennent les données des sociétés fiduciaires de placement immobilier (qui remontent à décembre 1972 seulement) et les chiffres estimatifs des prêts hypothécaires à l'habitation des sociétés fiduciaires de placement et des compagnies d'assurance contre des risques divers et d'assurance des biens. • Les chiffres désaisonnalisés des prêts hypothécaires à l'habitation (rubrique *Total*) sont obtenus par addition des chiffres désaisonnalisés des composantes sujettes à des variations saisonnières notables et des chiffres non désaisonnalisés des composantes qui enregistrent peu de variations saisonnières.

Sauf indication contraire, ces données proviennent des sources ci-dessus. En ce qui concerne les taux canadiens, on peut obtenir sur demande les données antérieures se rapportant aux effets indiqués.

- Le *taux officiel d'escompte* est le taux minimal auquel la Banque du Canada consentait jusqu'au 1^{er} décembre 1980 des avances à court terme aux banques à charte ou aux banques d'épargne régies par la Loi sur les banques d'épargne du Québec et consent depuis cette date des avances aux membres de l'Association canadienne des paiements. En règle générale, le taux d'escompte est administré directement par la Banque du Canada et modifié de temps à autre. Cependant, du 1^{er} novembre 1956 au 24 juin 1962, ce taux était de 1/4 % plus élevé que le taux moyen des bons du Trésor à 91 jours vendus à la dernière adjudication hebdomadaire. Ce mode d'établissement du taux officiel d'escompte a été remis en vigueur le 13 mars 1980. Les données relatives au taux d'escompte sont arrêtées au mercredi; lorsque le taux officiel d'escompte est lié au taux des bons du Trésor, ces données sont basées sur le taux moyen des bons du Trésor à l'adjudication de la semaine précédente.
- *Rendement moyen des titres du gouvernement canadien*. Seuls sont considérés ici les titres libellés en dollars canadiens émis par le gouvernement; les émissions à échéance prorogeable et les obligations d'épargne du Canada sont exclues du calcul. Le taux de rendement des bons du Trésor à 3 et à 6 mois est égal à la moyenne des taux auxquels les bons sont adjugés le lendemain du mercredi indiqué. Les données hebdomadaires, notamment celles de bons à 1 an émis à des intervalles de deux semaines, figurent au Tableau F2. On trouvera les taux de rendement des diverses émissions d'obligations d'épargne du Canada non échues dans la publication de la Banque du Canada intitulée : «Résumé des titres et emprunts émis ou garantis par le gouvernement du Canada».
- Le *rendement moyen d'autres types d'obligations* publié par McLeod Young Weir est calculé à partir des cours du dernier mercredi du mois; avant juillet 1981, il était calculé à partir des cours du jeudi suivant le dernier mercredi du mois. Ces séries remontent à 1977. On trouvera au fichier Cansim les statistiques du taux de rendement moyen des obligations à long terme pour la période allant de 1948 à ce jour. Ces données, qui étaient publiées auparavant dans la Revue, portaient sur les taux de rendement de 10 provinciales, 10 municipales et 10 industrielles. Le taux de rendement moyen des obligations à long terme se rapporte aux obligations dont le terme à courir est de 15 ans ou plus, tandis que celui des obligations à moyen terme concerne les obligations dont le terme à courir se situe entre 5 et 15 ans. La maison McLeod Young Weir Limited fournit

market financing is the Bank of Canada estimate for the week ending with the Wednesday indicated for the seven-day average rate at which investment dealers were able to arrange most of their overnight financing of money market inventory, excluding chartered bank day-to-day loans and purchase and resale agreements with the Bank of Canada. • *Prime corporate paper*. The rate shown is the Bank of Canada's best estimate of operative market trading levels on the date indicated for major borrowers' paper.

• Rates on *bankers' acceptances* are mid-market rates for typical quotes on the Wednesday date shown. • *Chartered bank rates for 30- and 90-day deposit receipts* since December 1974 are based on actual rates of large transactions at the major chartered banks for the last Wednesday of the month. Between June 1972 and December 1974, the rates shown were those prevailing under the Winnipeg Agreement. • Rates on *5-year personal fixed term deposits* are the most typical of those offered by the major chartered banks. • The *chartered banks' rate on prime business loans* is the interest rate charged to the most credit-worthy borrowers. The rate shown is of the last Wednesday of the month; when there are differences in the rate charged by individual banks, the most typical rate or rates are taken. Since May 1973 the chartered banks from time to time have had in effect a lower base rate for small business loans under authorizations of \$200,000 or less. The rate shown in the table applies to large business loans.

• *Trust company rates* on five-year guaranteed investment certificates are averages of the rates quoted by a number of large trust companies. • *Chartered bank 1-year and 5-year mortgage rates* are typical rates charged by banks on residential mortgages.

• *United States rates*. For comparability with Canadian rates, the U.S. 3-month Treasury bill rate, the commercial paper rate and the certificate of deposit rate have been adjusted to a 365-day true yield basis from a 360-day discount basis. Treasury bill yields are averages of rates at the Monday tender nearest the Wednesday date shown. *Federal Reserve discount rate*. From time to time the Federal Reserve Board also imposes a surcharge on frequent use by the banks of the Federal Reserve's borrowing facilities. The *rate on federal funds* refers to transactions in Federal Reserve funds, i.e., the borrowing or lending of 'excess' reserves on deposit with Federal Reserve banks. The rate shown is published by the Federal Reserve Bank of New York and is a transactions-weighted average for the week ending Wednesday. Yields on *five-year Government bonds* are adjusted to constant maturity by the U.S. Treasury, based on daily closing bid prices. *Moody's corporate industrial bond average* includes 38 bonds; the yields shown are averages as at the last Wednesday of the month. The rates shown for *commercial paper* are for 30- and 90-day dealer-placed prime commercial paper as at the last Wednesday of the month, supplied by the Federal Reserve Bank of New York. The *prime rate* shown is the typical rate as of the last Wednesday of the month.

• *Euro-U.S. dollar deposit rates* in London are the closing offer side rates for the Wednesday dates shown. • The *forward premium or discount (-) on the U.S. dollar in Canada* is the annual interest rate equivalent of the spread between the spot and forward exchange rates for U.S. dollars in Canada computed on the basis of mid-market closing quotations for the Wednesday dates shown.

sur demande, pour chacune des séries, la liste des obligations retenues pour le calcul des taux de rendement.

• *Taux des avances à un jour*. Ces taux sont une moyenne estimative pour la semaine se terminant à la date indiquée, calculée par la Banque du Canada, des taux auxquels les courtiers en valeurs mobilières ont pu obtenir la plupart des avances à un jour nécessaires au financement de leurs stocks de titres à court terme. En sont exclus les prêts au jour le jour octroyés par les banques à charte et les prises en pension de la Banque du Canada.

• *Papier de premier choix des sociétés*. Les données représentent la meilleure estimation des taux effectivement pratiqués sur le marché, aux dates indiquées, par les principaux emprunteurs.

• Le taux d'intérêt des *acceptations bancaires* est la moyenne des taux acheteur et vendeur les plus représentatifs le mercredi en question. • Depuis décembre 1974, les taux d'intérêt des *bons de caisse à 30 et à 90 jours* des banques à charte reposent sur les taux auxquels s'effectuent dans de grandes banques à charte de grosses opérations le dernier mercredi du mois. De juin 1972 à décembre 1974 figurent les taux déterminés dans le cadre de l'accord de Winnipeg. • Les taux des *dépôts à 5 ans des particuliers* sont les taux les plus représentatifs offerts par les principales banques à charte. • Le *taux de base appliqué par les banques aux prêts aux entreprises* est le taux applicable aux entreprises dont le crédit est de tout premier ordre. Le chiffre indiqué correspond au taux appliqué au dernier mercredi du mois; lorsque les banques ne pratiquent pas toutes le même taux, on retient les plus représentatifs. Le taux indiqué au tableau est celui des prêts aux grosses entreprises. Depuis mai 1973, les banques à charte ont, dans le cadre de crédits autorisés de 200 000 dollars ou moins, effectué de temps à autre des prêts aux petites entreprises à un taux de base moins élevé.

• Le taux des certificats de placement garantis à 5 ans des *sociétés de fiducie* est la moyenne des taux affichés par un échantillon très représentatif des plus importantes sociétés de fiducie. • Les *taux des prêts hypothécaires à 1 an et à 5 ans des banques* sont les taux auxquels la plupart de ces institutions accordent des prêts hypothécaires à l'habitation.

• *Taux d'intérêt aux États-Unis*. Afin de les rendre comparables aux taux canadiens, les taux américains des bons du Trésor à 3 mois, du papier commercial et des certificats de dépôt ont été ramenés de la base «360 jours/valeur escomptée» à la base canadienne «365 jours/valeur nominale». Le taux de rendement des bons du Trésor est la moyenne des taux à l'adjudication du lundi précédant le mercredi indiqué. *Taux d'escompte de la Réserve fédérale*. De temps à autre, le Conseil de la Réserve fédérale impose aussi un droit supplémentaire sur l'utilisation fréquente des facilités de crédit de la Réserve fédérale par les banques. Le *taux des «federal funds»* est celui qui est appliqué aux opérations sur «federal funds», c'est-à-dire aux prêts ou aux emprunts d'excédents de réserve auprès d'une banque fédérale de réserve. Le taux indiqué, qui est publié par la Banque fédérale de réserve de New York, est la moyenne hebdomadaire pondérée des taux applicables aux opérations de la semaine se terminant le mercredi. Le *taux de rendement des obligations à 5 ans du gouvernement fédéral* est calculé par le Trésor américain en fonction d'une échéance constante et basé sur les cours acheteurs de clôture en fin de journée. L'indice de Moody du *rendement moyen des obligations industrielles* porte sur 38 titres; le rendement indiqué est la moyenne des données du dernier mercredi du mois. Le taux indiqué pour le *papier commercial* est celui du papier de premier choix à échéance de 30 et de 90 jours placé par des courtiers, au dernier mercredi du mois; ces données sont publiées par la Banque fédérale de réserve de New York. Les taux de base indiqués sont les taux les plus représentatifs appliqués au dernier mercredi du mois.

• Le *taux des dépôts en euro-dollars américains à Londres* correspond à la moyenne des taux offerts à la clôture des opérations le mercredi indiqué. • Le *report ou déport (-) sur le dollar É.-U. à 90 jours* est l'écart converti en taux d'intérêt par an, entre le cours au comptant et le cours à terme du dollar É.-U. au Canada à la clôture le mercredi indiqué, les cours retenus étant la moyenne des cours acheteur et vendeur.

F2

Source: Bank of Canada

Data are available from July 1954 on a weekly basis. For information on chartered bank cash reserves see Table C10.

• The *Bank Rate* is the minimum rate at which the Bank of Canada makes short-term advances to the chartered banks or to savings banks governed by the Quebec Savings Bank Act, and after 1 December 1980 to all members of the Canadian Payments Association. Typically the Bank Rate is administered directly by the Bank of Canada and is changed from time to time. However, during the period from 1 November 1956 to 24 June 1962 and the period beginning 13 March 1980 the Bank Rate was set at 1/4 of 1 per cent above the weekly average tender rate of 91-day treasury bills. Data for the Bank Rate are shown as at Wednesday, and for the periods when the Bank Rate was tied to the treasury bill rate are based on the average rate of the previous week's 91-day treasury bill tender. • *Advances to members of the Canadian Payments Association* are short-term loans made by the central bank to these institutions. The weekly average is calculated on the basis of outstanding advances for each business day. • *Purchase and resale agreements* (PRA) are arrangements under which the Bank of Canada provides short-term accommodations as a lender of last resort to investment dealers who are money market 'jobbers'. When unable to find the necessary financing, these dealers can, as a last resort, arrange to sell securities to the Bank of Canada with an agreement to repurchase them. Effective 13 March 1980, the rate at which the Bank of Canada will enter into purchase and resale agreements is the Bank Rate. From 12 May 1974 to 12 March 1980, the PRA rate was 1/4 of 1 per cent per annum above the average rate on 91-day treasury bills at the latest weekly tender, subject to a minimum of Bank Rate minus 3/4 of 1 per cent and a maximum of Bank Rate plus 1/2 of 1 per cent; prior to 12 May 1974, the maximum PRA rate was Bank Rate. In the event the Bank of Canada were to purchase Government of Canada securities from investment dealers or banks under resale arrangements other than the normal PRA, the rate of interest would be determined by the Bank of Canada and would reflect the particular circumstances.

• *Day-to-day loans* are made by the chartered banks to money market 'jobbers' within the limits of their PRA facility with the Bank of Canada. Prior to December 1980 collateral for these loans consisted of short-term Government of Canada direct and guaranteed bonds, treasury bills and bankers' acceptances. Since December 1980, bankers' acceptances are no longer eligible collateral. In the first series, day-to-day loan rates are shown as the closing rate on Wednesday and in the second series as weekly averages of the daily closing rates.

• *Treasury bills* of three-month and six-month maturity are sold by tender at weekly auctions, normally held on Thursdays. From time to time prior to 4 August 1977, there were special issues of treasury bills with maturities of more than six months and less than one year. From August 1977 to July 1983, one-year treasury bills were auctioned at four-week intervals and since July 1983 at two-week intervals. Bids may be submitted by the Bank of Canada, the chartered banks and investment dealers who are primary distributors of Government of Canada securities. Treasury bills are sold at a discount and the yields are calculated as the amount of the discount from par relative to the amount paid, on the basis of a 365-day year. The weekly treasury bill tender rate is a weighted average of the yields on successful bids.

Sources: Bank of Canada, Statistics Canada, Royal Commission on Banking and Finance

Treasury bills and other short-term paper comprise instruments with an original term of one year or less. The data do not include bills and notes placed with parent or affiliated companies. Corporate data exclude notes placed directly with chartered banks. Short-term loans from Canadian and foreign banks are not included in the statistics.

• *Sales finance and consumer loan company paper* includes notes issued by wholly owned finance company subsidiaries of all manufacturers and merchandisers. Data on *sales finance and other commercial paper* are based on a survey by the Bank of Canada covering companies known to have issued short-term paper; it is estimated that a high proportion of all

F2

Source : Banque du Canada

Ces données sont recueillies hebdomadairement depuis juillet 1954. On trouvera au Tableau C10 les données relatives aux réserves-encaisse des banques à charte.

• *Le taux officiel d'escompte* est le taux minimal auquel la Banque du Canada consentait jusqu'au 1^{er} décembre 1980 des avances à court terme aux banques à charte ou aux banques d'épargne régies par la Loi sur les banques d'épargne du Québec et consent depuis cette date des avances aux membres de l'Association canadienne des paiements. En règle générale, le taux d'escompte est administré directement par la Banque du Canada et modifié de temps à autre. Cependant, du 1^{er} novembre 1956 au 24 juin 1962, ce taux était de 1/4 % plus élevé que le taux moyen des bons du Trésor à 91 jours vendus à la dernière adjudication hebdomadaire. Ce mode d'établissement du taux officiel d'escompte a été remis en vigueur le 13 mars 1980. Les données relatives au taux d'escompte sont arrêtées au mercredi; lorsque le taux officiel d'escompte est lié au taux des bons du Trésor, ces données sont basées sur le taux moyen des bons du Trésor à l'adjudication de la semaine précédente.

• *Les avances aux membres de l'Association canadienne des paiements* sont des prêts à court terme consentis par la banque centrale à ces institutions. La moyenne hebdomadaire est celle des encours de tous les jours ouvrables de la semaine. • *Les prises en pension* sont des facilités de crédit à court terme que la Banque du Canada, à titre de prêteur de dernier ressort, accorde aux courtiers en valeurs mobilières agréés comme agents du marché monétaire. Lorsque ces courtiers ne peuvent obtenir ailleurs le financement dont ils ont besoin, ils peuvent, en dernier recours, céder des titres à la Banque du Canada à condition de s'engager à les reprendre par la suite. Depuis le 13 mars 1980, le taux d'intérêt auquel la Banque du Canada effectue les prises en pension est égal au taux officiel d'escompte. Du 12 mai 1974 u 12 mars 1980, le taux applicable aux pensions était de 1/4 % plus élevé que le taux moyen des bons du Trésor à 3 mois vendus à la dernière adjudication hebdomadaire, sous réserve toutefois d'un minimum égal au taux officiel d'escompte diminué de 3/4 de 1 % et d'un maximum égal au taux officiel d'escompte augmenté de 1/2 %. Jusqu'au 12 mai 1974, le taux maximum était égal au taux d'escompte. Si la Banque du Canada devait acheter des courtiers en valeurs mobilières ou des banques des titres du gouvernement du Canada dans le cadre d'opérations assorties de clauses de rachat mais différentes des prises en pension normales, elle déterminerait le taux d'intérêt et le ferait en fonction des circonstances.

• *Les prêts au jour le jour* sont des prêts que les banques à charte octroient aux agents agréés du marché monétaire dans le cadre des crédits de pension ouverts à ceux-ci par la Banque du Canada. Avant décembre 1980, ces prêts étaient gagés par des obligations à court terme émises par le gouvernement canadien ou sous sa garantie, par des bons du Trésor ou par des acceptations bancaires. Depuis décembre 1980, les acceptations bancaires ne peuvent plus être acceptées en garantie de prêts au jour le jour. La première série retrace l'évolution des taux des prêts au jour le jour à la clôture le mercredi; la seconde série, la moyenne hebdomadaire des taux de clôture journaliers. • *Des bons du Trésor* à 3 et à 6 mois sont vendus par adjudication chaque semaine, normalement le jeudi. Il y a eu de temps à autre, antérieurement au 4 août 1977, des émissions spéciales de bons du Trésor dont l'échéance variait de plus de six mois à moins d'un an. Du mois d'août 1977 au mois de juillet 1983, il y a eu, toutes les quatre semaines, une adjudication de bons du Trésor à un an. Depuis juillet 1983, l'adjudication de ces titres se fait toutes les deux semaines. La Banque du Canada, les banques à charte et les courtiers en valeurs mobilières agréés comme distributeurs initiaux de titres du gouvernement canadien peuvent seuls participer comme soumissionnaires à ces séances. Les bons du Trésor s'achètent à un prix inférieur à leur valeur nominale et leur taux de rendement est donné par le rapport, mis sur une base de 365 jours, entre l'escompte et le prix d'achat. Le taux d'adjudication des bons du Trésor est égal à la moyenne pondérée des taux de rendement des soumissions acceptées.

F3

Sources : Banque du Canada, Statistique Canada, Commission royale d'enquête sur le système bancaire et financier

Les bons du Trésor et autres effets à court terme n'englobent que les instruments dont l'échéance initiale ne dépasse pas un an. Les données ne comprennent pas les bons ni les billets placés auprès de sociétés mères ou affiliées, ni, dans le cas des sociétés, les billets négociés directement avec des banques à charte. Les emprunts à court terme auprès de banques canadiennes et étrangères ne sont pas compris dans les données.

• *Le papier des sociétés de financement ou de prêt à la consommation* comprend les billets émis par les sociétés de financement filiales en propriété exclusive des entreprises manufacturières et des grandes entreprises de distribution. Les données relatives aux postes *Papier des sociétés de financement* et *Autres effets de*

paper issued is covered by this survey. As a result of changes in the coverage due to the entry of new participants in the survey, mergers and the elimination of some companies going into receivership, a break in the series occurs at December 1968. On 4 June 1979 the Continental Bank of Canada began operations, initially as a wholly owned subsidiary of IAC Ltd.; the two institutions merged on 1 November 1981. Citibank Canada amalgamated with three Canadian subsidiaries of its parent company, Citibank N.A., effective 1 November 1982.

• *Bankers' acceptances* figures refer to the amount outstanding as at the last Wednesday of the period. • *Total treasury bills and other short-term paper of provincial governments and their enterprises and municipal governments* exclude bills and notes placed with own government accounts. The treasury bills and notes issued are very largely payable in Canadian dollars; however, the statistics include some short-term notes payable in foreign currencies. Since November 1981, these data include bills and paper of provincial governments and their enterprises sold directly to chartered banks.

F4

Sources: Toronto Stock Exchange, Montreal Stock Exchange, New York Stock Exchange, Standard and Poor's Corporation, Dow Jones

More detailed information on the composition of the common stock price indexes shown in the table can be obtained from the primary sources of the data. The number of stocks in each index is shown in parenthesis.

• The *indexes of the Toronto Stock Exchange, and Standard and Poor's* are weighted indexes of selected groups of stocks. The indexes of the *Montreal Exchange* were redesigned in May 1984; they are equally weighted geometric averages of selected groups of stocks. The Montreal and Canadian Stock Exchanges amalgamated as at 1 January 1974. Prior to this time the series include data from both stock exchanges. • The *Dow Jones industrial average* is a simple dollar average of 30 selected industrial stocks adjusted for stock splits, stock dividends, and the substitutions of stocks in the average. • The *value of shares traded* is the total dollar value of all transactions recorded on the exchange during the month.

• The *volume of shares traded* is the total number of shares transacted on the exchange during the month.

• *Customers' debit balances* are amounts owed to brokers by customers under margin agreements. The method of compiling the New York Stock Exchange series was altered in May 1970 and as a result, earlier data are not strictly comparable. • *Customers' free credit balances* represent the total of uncommitted funds that customers have left in accounts with brokers. Such funds represent cash or securities and are subject to withdrawal by the customer on demand. • *Loans to brokers by U.S. commercial banks* are loans made by weekly reporting member banks to brokers and dealers for purchasing or carrying securities (other than U.S. Government securities).

• The *stock dividend yield* is calculated by taking the indicated dividend to be paid per share of stock over the coming 12 months and dividing it by the current price of the stock.

• The *price/earnings ratio* is calculated by dividing the current market price of a stock by the company's earnings per share in its latest fiscal year.

Source: Bank of Canada

Data shown are subject to revision. These series cover all public issues and most private placements with an original term to maturity of more than one year. The data for all levels of government include guaranteed issues. Data on the net amount of Canadian dollar bond issues placed abroad by provincial-municipal governments, financial corporations and non-financial corporations are available on a semi-annual basis from 1974 and may be

commerce ont été recueillies par la Banque du Canada au moyen d'enquêtes auprès des sociétés qui, à sa connaissance, avaient émis du papier à court terme. Il y a tout lieu de croire qu'une très forte proportion de ce papier a été recensée par ces enquêtes. En raison d'une extension du recensement à d'autres sociétés ou par suite de fusions ou de liquidations de sociétés, ces séries ont subi une modification en décembre 1968. La Banque Continentale du Canada a commencé ses opérations le 4 juin 1979 avec le statut de filiale en propriété exclusive de la IAC Ltée; les deux institutions ont fusionné le 1^{er} novembre 1981. La Citibanque Canada et trois filiales canadiennes de la société mère, Citibank N.A., ont fusionné le 1^{er} novembre 1982. • *Acceptations bancaires*. Les chiffres retenus sont ceux de l'encours le dernier mercredi de la période indiquée.

• *Les bons du Trésor et autres effets à court terme émis par les provinces et leurs entreprises et par les municipalités* ne comprennent pas les bons du Trésor et les billets achetés par les comptes des gouvernements intéressés. Les bons du Trésor et les billets sont, dans la grande majorité des cas, libellés en dollars canadiens, mais les statistiques englobent également un certain montant de billets à court terme libellés en monnaies étrangères. Depuis novembre 1981, elles comprennent aussi les bons et le papier émis par les provinces et leurs entreprises qui sont directement vendus aux banques à charte.

Sources : Bourse de Toronto, Bourse de Montréal, Bourse de New York, Standard & Poor's Corporation, Dow Jones

On pourra obtenir des renseignements complémentaires concernant les composantes des indices des cours des actions ordinaires en s'adressant aux institutions auxquelles sont attribués ces indices. Le nombre de titres retenus pour chaque indice est indiqué entre parenthèses.

• *Les indices de la Bourse de Toronto et de Standard & Poor* sont des indices pondérés, basés sur des échantillons représentatifs d'actions. Les indices de la *Bourse de Montréal* ont été révisés en mai 1984; ce sont des indices à moyenne géométrique non pondérée des cours de certains groupes d'actions. La Bourse de Montréal et la Bourse canadienne ont fusionné le 1^{er} janvier 1974. Les statistiques antérieures sont tirées de données relatives aux deux Bourses. • *L'indice Dow Jones des industrielles* est une moyenne arithmétique des cours d'un échantillon de 30 actions industrielles, sauf qu'il a été tenu compte au cours des années des fractionnements d'actions, des dividendes versés en actions et des substitutions de titres dans l'échantillon.

• *La valeur des actions négociées* représente le montant total en dollars de toutes les ventes effectuées au cours du mois à la Bourse désignée. • *Le volume des actions négociées* représente le nombre des actions vendues au cours du mois à la Bourse désignée.

• *Les soldes débiteurs des clients* représentent les sommes dues aux agents de change par leurs clients dans le cas d'opérations sur marge. En ce qui concerne la Bourse de New York, la méthode de calcul a été modifiée en mai 1970 et les données postérieures ne sont donc pas strictement comparables à celles des périodes précédentes. • *Les soldes créditeurs libres des clients* représentent l'ensemble des fonds non engagés que les clients ont laissés à la disposition des agents de change. Ces fonds peuvent être soit des sommes d'argent, soit des titres et doivent être restitués aux clients sur simple demande. • *Les prêts consentis aux agents de change par les banques commerciales des États-Unis* sont les prêts consentis aux agents de change — pour financer leurs achats ou leurs portefeuilles-titres (titres du gouvernement américain non compris) — par les banques tenues de faire des déclarations hebdomadaires de ces opérations.

• *Le rendement sous forme de dividendes* d'une action à une date donnée est calculé en divisant le dividende prévu par action au cours des 12 mois suivants par le cours de l'action. • *Le taux de capitalisation des bénéfices* d'une action est calculé en divisant le cours de l'action à la date indiquée par les bénéfices réalisés par action au cours du dernier exercice de la société.

Ces données sont sujettes à révision. Elles englobent toutes les émissions publiques à échéance initiale de plus d'un an et la plupart des émissions du même genre placées à titre privé. Les emprunts des gouvernements canadien, des provinces et des municipalités comprennent les obligations émises sous garantie de ces derniers. Les intéressés peuvent se procurer au département des Études monétaires et financières de la Banque du Canada les données relatives aux émissions nettes d'obligations en dollars canadiens placées à l'étranger par les

obtained upon request to the Department of Monetary and Financial Analysis.

Government of Canada issues payable in foreign currencies have been converted into Canadian dollars at the following rates: from 30 September 1950 to 3 May 1962 $\text{us\$1.00} = \1.00 , thereafter $\text{us\$1.00} = \1.081 ; from 30 September 1950 to 3 May 1962 $\text{£1} = \$2.800$, from 3 May 1962 to 18 November 1967 $\text{£1} = \$3.027$, thereafter $\text{£1} = \$2.595$; prior to 26 October 1969 $\text{DM} = \$2.70$, thereafter $\text{DM} = \$2.95$; from 15 May 1968 to 24 June 1970 $1 \text{ lira} = \$0.00173$. Since 31 December 1971 Government of Canada issues payable in foreign currency have been converted into Canadian dollars at the noon spot rate of the day of delivery. All other issues payable in foreign currencies have been converted into Canadian dollars at the average noon market rate for the month. In the case of optional-pay issues, the option most favourable to the lender has been used. Data on gross new issues, retirements and net new issues of Government of Canada securities and provincial and corporate bonds are available quarterly from 1935; data on gross new bond issues placed in foreign markets, total and in the United States, are available from 1960.

- *Provincial bonds* include issues purchased by provincial accounts and with Quebec Pension Plan funds. Retirements of provincial bonds do not include payments into sinking funds.
- *Municipal bonds* do not include issues guaranteed by the provinces (already included in provincial bonds) and issues sold directly to provinces and their agencies, which are shown in Table F9. Retirements of municipal bonds do not include payments into sinking funds. The quarterly data for municipal retirements are estimated by pro-rating annual estimates and including partial data for large municipalities when available.
- *Corporate bonds* include all issues of Canadian corporations with the exception of finance company and commercial paper with an original term to maturity of one year or less and issues sold to a parent company, whether this parent is incorporated in Canada or abroad.

- *New preferred and common stock issues* are shown at offering prices, and retirements at the actual amount paid by the corporation. Pursuant to section 91 of the Canadian and British Insurance Companies Act, common stock retirements do not include purchases by life insurance companies of their own stock. Common stock retirements in 1961 and 1964 reflect the distribution by British Columbia Power Corporation to shareholders of funds received from the Province of British Columbia in payment for the common and preferred shares of British Columbia Electric Company Limited; the data reflect in 1963 the purchase by Quebec Hydro of privately owned hydro-electric companies and, in 1972 the purchase by the Nova Scotia Power Commission of Nova Scotia Light and Power Company Limited.
- *Financial corporations* (Table F11) include the finance company subsidiaries of automobile companies; to the end of 1972, all other subsidiary companies engaged in financing the parent companies' sales are classified with the parent company; from 1973 they are classified as financial.

- *Transactions of other institutions and foreign debtors* comprise issues of Canadian religious and other institutions and issues placed in Canada by foreign debtors. New issues of foreign debtors amounted to \$20 million in 1961, \$5 million in 1964, \$25 million in the first quarter and \$7 million in the fourth quarter of 1965, \$20 million in 1966, \$20 million in 1967, \$15 million in 1968, \$25 million in 1971, \$20 million in 1972 and \$20 million in 1975. Foreign debtor issues have been retired throughout the period covered. In Table F7, the small amount of security issues of institutions placed abroad has been included in the total.
- Figures for *short-term sales finance and consumer loan company paper* are based on a Bank of Canada survey (see Table F3) covering companies known to account for a very large share of the industry; these issues are classified according to currency of payment. The series from March 1965 on are not comparable with those in Table D6. On 4 June 1979 the Continental Bank of Canada began operations, initially as a wholly owned subsidiary of IAC Ltd.; the two institutions merged on 1 November 1981.

provinces, les municipalités, les sociétés financières et non financières. Il s'agit là de statistiques semestrielles remontant à 1974.

La valeur nominale des émissions du gouvernement canadien libellées en monnaies étrangères a été convertie en dollars canadiens aux cours suivants : du 30 septembre 1950 au 3 mai 1962, $\text{S\$. -u. 1} = \1 ; par la suite $\text{S\$. -u. 1} = \1.081 ; du 30 septembre 1950 au 3 mai 1962, $\text{£1} = \$2.800$; du 3 mai 1962 au 18 novembre 1967, $\text{£1} = \$3.027$; par la suite $\text{£1} = \$2.595$; avant le 26 octobre 1969, $\text{DM1} = \$0.270$; par la suite $\text{DM1} = \$0.295$; du 15 mai 1968 au 24 juin 1970, $\text{Lit1} = \$0.00173$. Depuis le 31 décembre 1971, cette conversion s'effectue au cours du comptant à midi le jour de la livraison. Pour toutes les autres émissions libellées en monnaies étrangères, on utilise comme taux de conversion la moyenne mensuelle des cours du change à midi. Dans le cas des titres libellés à la fois en dollars canadiens et en une autre devise, l'option la plus favorable aux prêteurs a été retenue. Les statistiques relatives aux opérations suivantes sont disponibles sur une base trimestrielle à partir de 1935 : émissions brutes, rachats et émissions nettes de titres du gouvernement canadien ainsi que d'obligations des provinces et des sociétés. Les statistiques des émissions brutes d'obligations placées sur les marchés étrangers, à savoir le montant global et le montant de la tranche placée aux États-Unis, remontent à 1960.

- Les *obligations des provinces* comprennent les titres achetés par une province ou avec des fonds provenant du Régime des rentes du Québec. Les dotations aux fonds d'amortissement ne sont pas assimilées à des amortissements.
- Les *obligations des municipalités* ne comprennent ni les titres émis sous la garantie d'une province, ceux-ci étant recensés comme obligations provinciales, ni les titres vendus directement aux provinces ou à leurs agences, lesquels sont recensés au Tableau F9. Les dotations aux fonds d'amortissement ne sont pas assimilées à des amortissements. Les données trimestrielles concernant les amortissements des titres des municipalités sont des estimations obtenues en divisant par 4 le montant des amortissements prévus pour l'année entière, sauf que des données plus précises existent parfois pour certaines grosses municipalités.
- Les *obligations des sociétés* englobent toutes les émissions de sociétés canadiennes, à l'exclusion toutefois du papier émis par les sociétés de financement et du papier commercial dont l'échéance à l'émission ne dépasse pas un an, ainsi que les émissions vendues à la société mère, que cette dernière soit constituée au Canada ou à l'étranger.

- Les *émissions d'actions ordinaires ou privilégiées* figurent au prix d'émission et les *rachats* au prix effectivement payé par la société intéressée. Les rachats d'actions ordinaires ne comprennent pas le rachat de ses propres actions effectué par une compagnie d'assurance-vie en vertu de l'article 91 de la Loi sur les compagnies d'assurance-vie canadiennes et britanniques. Ont été considérés comme des achats d'actions, en 1961 et en 1964, la distribution par la British Columbia Power Corporation à ses actionnaires des fonds qu'elle avait reçus de la province de la Colombie-Britannique en paiement des actions ordinaires et privilégiées de la British Columbia Electric Co. Ltd., en 1963, l'achat par l'Hydro-Québec d'entreprises hydro-électriques du secteur privé et, en 1972, l'achat par la Nova Scotia Power Commission de la Nova Scotia Light and Power Company Limited.
- Les *sociétés financières* (Tableau F11) comprennent les sociétés de financement filiales des constructeurs de véhicules automobiles; jusqu'à la fin de 1972, les statistiques relatives à toutes les autres filiales qui ont pour objet de financer les ventes des sociétés mères sont comprises dans celles des sociétés mères; à partir de 1973, ces filiales sont considérées comme entreprises financières.

- Les *opérations des autres institutions et emprunteurs étrangers* comprennent les émissions d'institutions canadiennes (religieuses ou autres) et les émissions placées au Canada par des emprunteurs étrangers. Ces dernières ont atteint 20 millions de dollars en 1961, 5 millions en 1964, 32 millions en 1965 (soit 25 millions au premier trimestre et 7 millions au quatrième), 20 millions en 1966, 20 millions en 1967, 15 millions en 1968, 25 millions en 1971, 20 millions en 1972 et 20 millions en 1975. Dans le cas des emprunteurs étrangers, il y a eu des remboursements tout au cours des années indiquées. Le faible montant des émissions de titres émis par les institutions et placés à l'étranger a été incorporé à la rubrique *Total* du Tableau F7.
- Les chiffres concernant le *papier à court terme des sociétés de financement ou de prêt à la consommation* proviennent d'une enquête menée par la Banque du Canada auprès de sociétés qui sont réputées représenter une très grande part du marché (voir le Tableau F3); ces émissions sont ventilées selon la monnaie dans laquelle les titres sont libellés. À partir de mars 1965, ces chiffres ne sont pas comparables à ceux du Tableau D6. La Banque Continentale du Canada a commencé ses opérations le 4 juin 1979 avec le statut de filiale en propriété exclusive de la IAC Ltée; les deux institutions ont fusionné le 1^{er} novembre 1981.

G1–G2

Source: Bank of Canada

Treasury bills, Canada Savings Bonds and other non-market issues are not included in the data. The guaranteed issues comprise two issues of the Canadian National Railways (5 3/4% January 1, 1985 and 5% October 1, 1987). Unless an earlier call date is given in the notes at the end of the table, issues are non-callable. Issues payable in foreign currencies have been converted into Canadian dollars at the closing spot rate as at the last business day of the calendar quarter. Information on treasury bill issues can be found in Table F2. For the totals of Government of Canada direct and guaranteed debt outstanding at month-ends, see Table G5. Complete details of loans outstanding are published annually in "Summary of Government of Canada Direct and Guaranteed Securities and Loans."

G3–G6

Source: Bank of Canada

Government of Canada issues payable in foreign currencies have been converted into Canadian dollars at the following rates: prior to 3 May 1962 U.S. \$1.00 = \$1.00, thereafter U.S. \$1.00 = \$1.081; prior to 3 May 1962 £1 = \$2.800, from 3 May 1962 to 18 November 1967 £1 = \$3.027, thereafter £1 = \$2.595; from 24 May 1968 to 26 October 1969 1 DM = \$.270, thereafter 1 DM = \$.295; from 15 May 1968 to 24 June 1970 1 lira = \$.00173. Since 31 December 1971 issues payable in foreign currencies have been converted into Canadian dollars at the closing spot rate as at the last business day of the calendar quarter. Holdings are shown at par value where available, in other cases at book value.

- *General public holdings* (Table G3) are obtained as a residual. The general public includes other central banks, investment dealers, other non-bank financial institutions and other resident and non-resident holders. A more detailed breakdown of the general public's holdings is shown in Table G4.
- *Government of Canada accounts* (Tables G3 and G4) include the Securities Investment Account, Purchase Fund, and the Unemployment Insurance Fund as well as pension funds of federal Crown corporations and government agencies. Holdings of Canada Savings Bonds being purchased on the payroll plan by Government employees are excluded; these are included with general public holdings.
- *Total loans, and drawings under standby facilities* comprise drawings outstanding on the standby credit facilities with Canadian banks and with foreign banks, as well as term loans arranged with foreign banks and other financial institutions.
- *Total securities and loans outstanding* differ from the total of *unmatured direct debt* and *unmatured guaranteed debt* by the amount of matured securities outstanding.
- *Non-marketable bonds* payable in Canadian dollars (Table G3) include unmaturing Canada Savings Bonds and other non-market securities.
- The holdings of all *life insurance companies* are available only at year end. The quarterly distribution is estimated from monthly data on investment transactions by sixteen major life insurance companies.
- *Local credit union holdings* of Government of Canada securities only are shown prior to 1967 (Table G4).
- Holdings of non-financial corporations, provincial and municipal governments in Table G4 are obtained from the financial flow accounts published by Statistics Canada.
- *Other non-market securities* (Table G5) are held by the Unemployment Insurance Fund and since March 1966, by the Canada Pension Plan. On 31 December 1971, the special non-marketable securities owned by the Unemployment Insurance Commission were redeemed and the amount transferred to the Unemployment Insurance Account in the accounts of the Government of Canada, in accordance with the Unemployment Insurance Act, 1971.

Source : Banque du Canada

Ces tableaux ne tiennent pas compte des bons du Trésor, des obligations d'épargne du Canada ni des autres titres non négociables. Les obligations garanties par le gouvernement canadien comprennent deux émissions du Canadien National (5 3/4 %, 1^{er} janvier 1985 et 5 %, 1^{er} octobre 1987). En règle générale, les titres ne peuvent être rachetés par anticipation; les exceptions sont indiquées au bas du Tableau. La valeur nominale des titres libellés en devises étrangères a été convertie en dollars canadiens au cours du comptant à la clôture le dernier jour ouvrable de mars, de juin, de septembre ou de décembre, selon le cas. On trouvera au Tableau F2 les renseignements relatifs aux bons du Trésor. Le Tableau G5 donne l'encours, en fin de mois, des titres émis ou garantis par le gouvernement canadien. On trouvera dans la brochure «Résumé des titres et emprunts émis ou garantis par le gouvernement du Canada», que la Banque publie annuellement, une description détaillée de tous les emprunts en cours.

G3 à G6

Source : Banque du Canada

La valeur nominale des titres payables en devises a été convertie en dollars canadiens aux taux suivants : avant le 3 mai 1962, \$É.-U. 1 = \$1; par la suite, \$É.-U. 1 = \$1.081; avant le 3 mai 1962, £1 = \$2.800; du 3 mai 1962 au 18 novembre 1967, £1 = \$3.027; par la suite, £1 = \$2.595. Du 24 mai 1968 au 26 octobre 1969, DM1 = \$0.270; par la suite, DM1 = \$0.295; du 15 mai 1968 au 24 juin 1970, Lit1 = \$0.00173. Depuis le 31 décembre 1971, cette conversion s'effectue au cours du comptant à la clôture le dernier jour ouvrable de mars, de juin, de septembre ou de décembre, selon le cas. Les titres figurent à leur valeur nominale, lorsqu'elle est connue, à leur valeur comptable, dans le cas contraire.

- Le montant des titres détenus par le *public* (Tableau G3) a été obtenu en déduisant de l'encours global le montant des autres portefeuilles. Figurent dans cette catégorie les autres banques centrales, les courtiers en valeurs mobilières, les établissements financiers non bancaires et les autres détenteurs au Canada ou à l'étranger. Une ventilation plus complète des titres détenus par le public figure au Tableau G4.
- Le poste *Comptes du gouvernement canadien* (Tableaux G3 et G4) comprend les portefeuilles de la Caisse de placements, du Fonds de rachat, de la Caisse d'assurance-chômage ainsi que ceux des caisses de retraite des sociétés de la Couronne et des organismes du gouvernement canadien. En sont exclues les obligations d'épargne du Canada qu'achètent par le Mode d'épargne sur le salaire les fonctionnaires fédéraux; ces obligations font partie des portefeuilles du public.
- Le poste *Emprunts plus tirages sur lignes de crédit* comprend l'encours des tirages effectués sur les lignes de crédit ouvertes par les banques canadiennes et des banques étrangères ainsi que des emprunts à terme obtenus des banques étrangères et d'autres institutions financières.
- Il y a entre l'ensemble de l'encours des titres et des emprunts d'une part et, d'autre part, le montant total de la dette contractée par le gouvernement et de la dette garantie par le gouvernement une différence égale au montant des titres échus et non encaissés.
- Les titres non négociables libellés en dollars canadiens (Tableau G3) comprennent les obligations d'épargne du Canada et d'autres titres non échus.
- Les données concernant les portefeuilles de l'ensemble des *compagnies d'assurance-vie* ne sont disponibles qu'en fin d'année et les répartitions trimestrielles sont des estimations basées sur les opérations de placement d'après les déclarations mensuelles de seize importantes compagnies d'assurance-vie.
- Jusqu'à 1967, les données concernant les *credit unions locales* ne comprenaient que les portefeuilles de titres du gouvernement canadien (Tableau G4).
- Les données relatives aux titres détenus par les sociétés non financières, les provinces et les municipalités (Tableau G4) sont tirées des comptes des flux financiers publiés par Statistique Canada.
- Les détenteurs des autres titres non négociables (Tableau G5) sont la Caisse d'assurance-chômage et, depuis mars 1966, le Régime de pensions du Canada. Le 31 décembre 1971, conformément aux dispositions de la Loi de 1971 sur l'assurance-chômage, les titres spéciaux non négociables appartenant à la Commission d'assurance-chômage ont été rachetés et le produit en a été crédité au Compte d'assurance-chômage ouvert dans les comptes du gouvernement canadien.

Prices are closing mid-market prices for the dates shown. Market yields are expressed in per cent per annum to maturity if at a discount, and to earliest call date if at a premium. For information on issues callable before maturity see Tables G1 and G2 and notes. Data on the amounts outstanding for each issue can be found in Table G2. Treasury bill yields can be found in Table F2. • The *long-term average yield* is an average of all direct Government of Canada issues due or callable in over 10 years excluding perpetuals.

Data are compiled from the annual and quarterly publications of Statistics Canada "National Income and Expenditure Accounts", Catalogue 13-001.

H5

Source: Statistics Canada

Data are obtained from the Statistics Canada monthly publication "Indexes of Gross Domestic Product by Industry", Catalogue 61-005 and are generally compiled according to the 1970 Standard Industrial Classification. The industry groups—mines, quarries and oil wells, manufacturing, and utilities—are the component parts of the index of industrial production.

• *Non-commercial industries* include highway and bridge maintenance, water systems, hospitals, welfare organizations, religious organizations, private households, education and related services, public administration and defence. All other industries are considered commercial. The 1971 percentage weights for the series shown are as follows: Total excluding agriculture 96.76; Total goods producing industries 37.29; Forestry, fishing and trapping 0.98; Mines, quarries and oil wells 3.78; Manufacturing 22.87 (Durables 11.58; Non-durables 11.29); Construction 7.02; Electric power, gas and water 2.64; Service producing industries 59.48; Transportation, storage and communication 9.48; Trade 11.78; Finance, insurance and real estate 11.52; Community, business and personal services 19.31; Public administration and defence 7.39; Commercial industries 78.44; Non-commercial industries 18.32.

Ces données sont tirées des publications annuelles et trimestrielles de Statistique Canada intitulées «Comptes nationaux des revenus et des dépenses», n° de catalogue 13-001.

H5

Source: Statistique Canada

Ces données sont tirées de la publication mensuelle de Statistique Canada intitulée «Indice du produit intérieur brut par industrie», n° de catalogue 61-005, et sont généralement établies d'après la Classification des activités économiques de 1970. L'indice de la production industrielle englobe les secteurs suivants: mines, carrières et puits de pétrole, fabrication et services d'utilité publique.

• Les *entreprises non commerciales* comprennent: l'entretien des ponts et chaussées, l'adduction d'eau, les hôpitaux, les organismes de bienfaisance, les institutions religieuses, les ménages, l'enseignement et les services connexes, l'administration publique et la défense nationale. Toutes les autres entreprises sont considérées comme des entreprises commerciales. La pondération de 1971, en pourcentage, est la suivante: Total, agriculture non comprise: 96.76; Ensemble des industries productrices de biens: 37.29; Exploitation forestière, pêche et piégeage: 0.98; Mines, carrières et puits de pétrole: 3.78; Industries manufacturières: 22.87 (Biens durables: 11.58; Biens non durables: 11.29); Construction: 7.02; Électricité, gaz et eau: 2.64; Services: 59.48; Transports, entreposage et communications: 9.48; Commerce: 11.78; Finance, assurance et immobilier: 11.52; Services aux collectivités, aux entreprises et aux ménages: 19.31; Administration publique et défense nationale: 7.39; Entreprises commerciales: 78.44; Entreprises non commerciales: 18.32.

H6

Source: Bank of Canada

Capacity utilization rates are obtained by dividing the potential capital-output ratio by the actual ratio. The potential ratio is estimated by linear interpolation between troughs of the actual capital-output ratio and by linear extrapolation of the most recent trend line. The methodology is discussed in "Measuring capacity utilization: A technical note," Bank of Canada Review, May 1980. Users are referred to this article and to pages 12-15 of the 1979 Annual Report of the Bank of Canada for a discussion on how to evaluate and interpret these capacity utilization rates. Copies of the article and the Annual Report are available on request from the Public Information Division, Secretary's Department, Bank of Canada, Ottawa K1A 0G9. The output measures are those published in "Indexes of Gross Domestic Product by Industry", Catalogue 61-213 and 61-005, by Statistics Canada. Real mid-year net stocks, as published in "Fixed Capital Flows and Stocks", Statistics Canada Catalogue 13-211, are used to measure the capital stock. The capital stock data are indexed and interpolated linearly to produce quarterly estimates.

• *Non-farm goods producing industries* consist of manufacturing, electric power, gas, water, and other utilities, mining, and construction. • *Energy* includes electric power and gas utilities, pipelines, petroleum and coal products industries, and petroleum and natural gas mining.

H7-H8

Sources: Statistics Canada, Department of National Defence

Data are mainly from Statistics Canada; figures for the armed forces, however, are obtained from the Department of National Defence. Estimates of the civilian labour force, employment and unemployment are based on a sample survey of households and are therefore subject to sampling error, which is relatively larger, the smaller the component. Residents of the Yukon and the Northwest Territories, members of the armed forces, persons living on Indian reserves and inmates of institutions are not surveyed. Beginning with the March 1976 issue of the Review the data are based on the revised labour force survey which was introduced in 1975 and which ran concurrently with the old survey for one year. Data prior to January 1975 have been constructed on the basis of the relationship between comparable series in the old and new surveys during the overlap year.

H9

Source: Statistics Canada

Data are compiled from the Statistics Canada publication "Employment, Earnings and Hours", Catalogue 72-002. The "all units" estimates of employment are produced from surveys of establishments. They are compiled according to the 1970 Standard Industrial Classification.

• *Goods producing industries* do not include electric power, gas and water utilities. These are grouped with Transportation, communications and other utilities. • *Commercial services* include health services other than hospitals, recreational services, services to business management, personal services other than private households, and miscellaneous services. • *Non-commercial services* include hospitals, education and related services, and welfare organizations. Religious organizations and private households are excluded. • *Public administration* covers only civilian employees. Armed forces personnel are excluded.

H6

Source: Banque du Canada

Les taux d'utilisation des capacités ont été obtenus en divisant le coefficient potentiel de capital par le coefficient réel. Le coefficient potentiel est évalué au moyen d'interpolations linéaires entre les creux de la courbe du coefficient réel et par une extrapolation linéaire dans l'évolution récente de cette courbe. Cette méthodologie est exposée dans l'article intitulé « Les méthodes d'estimation des taux d'utilisation des capacités », publié dans la livraison de mai 1980 de la Revue de la Banque du Canada. Les utilisateurs sont priés de se référer à cet article et aux pages 12 à 15 du Rapport annuel de la Banque du Canada pour 1979, où ils trouveront une analyse de la façon dont il faut évaluer et interpréter ces taux d'utilisation des capacités. On pourra se procurer des exemplaires de cet article et du Rapport annuel en s'adressant à la Section de l'information, Secrétariat, Banque du Canada, Ottawa K1A 0G9. Les données sur la production sont tirées de la publication de Statistique Canada intitulée « Indices du produit intérieur brut par industrie », n^{os} de catalogue 61-213 et 61-005. Les données sur les stocks nets en milieu d'année, qui figurent dans la publication de Statistique Canada intitulée « Flux et stocks de capital fixe », n^o de catalogue 13-211, ont servi à mesurer le stock de capital. Les données relatives au stock de capital sont exprimées sous forme d'indices, à partir desquels les estimations trimestrielles sont produites par interpolation linéaire.

• *Les industries productrices de biens non agricoles* comprennent les entreprises manufacturières, l'adduction d'eau, la distribution de gaz ou d'électricité et les autres services d'utilité publique ainsi que les mines et la construction. • *Le poste Énergie* comprend la distribution de gaz ou d'électricité, le transport par pipeline, la fabrication de produits pétroliers et charbonniers ainsi que l'exploitation des gisements de pétrole et de gaz naturel.

H7 et H8

Sources: Statistique Canada, ministère de la Défense nationale

Ces données proviennent essentiellement de Statistique Canada; toutefois, les chiffres concernant les Forces armées ont été fournis par le ministère de la Défense nationale. Les estimations de la population active civile, tant pour les personnes ayant un emploi que pour les chômeurs, sont basées sur un échantillon de ménages et sont par conséquent sujettes à des erreurs d'échantillonnage, qui sont d'autant plus fortes que la composante est moins importante. Ces enquêtes ne couvrent pas les résidents du Yukon et des Territoires du Nord-Ouest, les membres des Forces armées, les personnes vivant dans les réserves indiennes ni les personnes dans les « institutions ». À partir de la livraison de mars 1976, les statistiques publiées dans la Revue proviennent de l'enquête sur la population active adoptée en 1975 et qui pendant un an a été menée parallèlement à l'ancienne. Les données antérieures à janvier 1975 ont été obtenues à partir du rapport entre les séries comparables de l'ancienne et de la nouvelle enquête au cours de l'année de transition.

H9

Source: Statistique Canada

Ces données sont tirées de la publication de Statistique Canada intitulée « Emploi, gains et durée du travail », n^o de catalogue 72-002. Les estimations globales de l'emploi sont basées sur des données tirées d'enquêtes sur les établissements. Elles sont établies d'après la Classification des activités économiques de 1970.

• *Les industries productrices de biens* ne comprennent pas la distribution d'électricité, de gaz et d'eau. Ces services sont groupés sous la rubrique des transports, communications et autres services d'utilité publique. • *Les services commerciaux* comprennent les services de santé autres que les soins prodigués dans les hôpitaux, les loisirs, les services liés à la gestion des entreprises, les services aux ménages autres que le service domestique ainsi que divers autres services. • *Les services non commerciaux* comprennent les soins prodigués dans les hôpitaux, l'enseignement et les services connexes ainsi que les services fournis par les organismes de bienfaisance. Les institutions religieuses et les ménages en sont exclus. • *Le poste Administration publique* ne concerne que les employés de la Fonction publique. Il ne tient pas compte du personnel des Forces armées.

H10

Source: Canada Mortgage and Housing Corporation

Data refer to new residential construction. A survey of residential construction activity is conducted monthly in urban centres of 10,000 population and over. All other areas are surveyed quarterly. Prior to 1962 the definition of urban areas covered centres of 5,000 and over. From 1962 to 1971 urban areas included in the survey are based on the 1966 census, beginning in January 1972 on the 1971 census, beginning in 1977 on the 1976 census. Data on mortgage loan approvals are given on a gross basis, i.e., they do not take account of cancellations and alterations after initial approval.

• *Housing units under construction* are shown as at the end of the period. • Data on all *newly completed and unoccupied* housing units are based on a survey carried out in metropolitan and major urban centres; since January 1981, all newly completed dwellings are surveyed until they are occupied or sold. Until December 1978, newly completed and unoccupied row and apartment dwellings were surveyed for six months following completion, at which time any units still unoccupied were dropped from the survey. From January 1979 to June 1979 an additional month was added to the survey each month so that over the period June 1979 to December 1980, such dwellings were surveyed for 12 months following completion.

• *Approved lenders* are lenders approved on an individual company basis for making NHA insured loans. The majority of "approved lenders" are chartered banks and life insurance, trust and mortgage loan companies. A small number of pension funds, whose activity forms a small proportion of the total, are also approved lenders. • *Loan approvals by private lending institutions* refer to "approved lenders" for NHA loans and to "lending institutions", i.e., the chartered banks, trust, mortgage loan and life companies, the Quebec savings banks, and mutual benefit and fraternal societies, for conventional loans. The NHA activity of "approved lenders" may, for most purposes, be taken as equivalent to the NHA activity of the group of "lending institutions". (See Table H11 for the dollar value of mortgage loan approvals by lending institutions.)

• Monthly data on *seasonally adjusted housing starts* include an estimate for housing starts in centres of under 10,000 population and rural areas based on the quarterly survey.

H11

Source: Canada Mortgage and Housing Corporation

Data on mortgage loan approvals are given on a gross basis, i.e., they do not take account of cancellations and alterations after initial approval.

• *Mortgage loan approvals on new and existing residential construction* include both NHA loans and conventional loans, but exclude NHA approvals for hostel beds. • *CMHC* loan approvals include those under Section 58 of the National Housing Act and special programs for low income groups. • *Loan and other companies* include mutual benefit and fraternal societies and the Quebec savings banks. • *NHA secondary mortgage market sales and purchases* are initial transactions only.

H12

Source: Statistics Canada

Data are obtained from the Statistics Canada publication "The Consumer Price Index", Catalogue 62-001. Beginning in October 1978 the weights used in constructing the index were based on 1974 consumer expenditure patterns, replacing the 1967 weights used from May 1973. At the same time, the classification of the commodities was updated and certain aggregates were recalculated, generally back to 1971. From April 1982 the weights used in constructing the index are based on the 1978 consumer expenditure patterns. In February 1983, with the release of the January 1983 consumer price index, the time base was changed

Source : Société canadienne d'hypothèques et de logement

Ces données concernant la construction de nouveaux logements sont basées sur des enquêtes mensuelles dans les centres urbains de 10 000 habitants ou plus et sur des enquêtes trimestrielles aux autres endroits. Avant 1962, la définition des centres urbains englobait les agglomérations de 5 000 habitants ou plus. Les centres urbains ont été déterminés de 1962 à 1971 d'après les données démographiques du recensement de 1966, à partir de janvier 1972 d'après celles du recensement de 1971 et à partir de janvier 1977 d'après celles du recensement de 1976. Les données concernant les approbations de prêts hypothécaires sont brutes, c'est-à-dire qu'il n'est pas tenu compte des annulations ou modifications postérieures à la date de l'approbation initiale.

• Le nombre de *logements en construction* est le nombre en fin de période. • Les données de l'ensemble des logements nouvellement construits et encore inoccupés proviennent d'une enquête menée dans les agglomérations métropolitaines et dans les principaux centres urbains. Depuis janvier 1981, tous les logements nouvellement construits continuent d'être dénombrés jusqu'à ce qu'ils soient occupés ou vendus. Jusqu'en décembre 1978, les logements en rangée et les immeubles d'habitation nouvellement construits et inoccupés ne comprenaient que les logements terminés au cours des six mois précédents, et l'enquête ne tenait plus compte des logements encore inoccupés au terme de cette période. De janvier 1979 à juin 1979, cette période a été chaque mois augmentée d'un mois de sorte que, au mois de juin 1979, les logements en question étaient encore dénombrés douze mois après avoir été terminés.

• Les *prêteurs agréés* sont des établissements expressément autorisés à consentir des prêts assurés en vertu de la LNH. Ce sont essentiellement les banques à charte, les sociétés de fiducie, les sociétés de prêt hypothécaire et les compagnies d'assurance-vie, auxquelles viennent s'ajouter quelques caisses de retraite, dont les opérations ne représentent toutefois qu'une faible proportion de l'ensemble de ces prêts. • Les *prêts hypothécaires approuvés par les établissements du secteur privé* englobent les prêts LNH consentis par les prêteurs agréés et les prêts ordinaires consentis par l'ensemble des établissements prêteurs, c'est-à-dire par les banques à charte, les sociétés de fiducie, les sociétés de prêt hypothécaire, les compagnies d'assurance-vie, les banques d'épargne du Québec et les associations fraternelles ou de secours mutuel. L'activité des prêteurs agréés en matière de prêts LNH peut être considérée comme équivalant à celle des établissements prêteurs dans ce domaine. (On trouvera au Tableau H11 la valeur en dollars des prêts hypothécaires approuvés par les établissements prêteurs.)

• Les données mensuelles désaisonnalisées concernant les *mises en chantier* comprennent, dans le cas des centres dont la population est inférieure à 10 000 habitants et pour les régions rurales, des estimations basées sur des enquêtes trimestrielles.

Les données concernant les approbations de prêts hypothécaires sont brutes, c'est-à-dire qu'il n'est pas tenu compte des annulations ou modifications postérieures à la date de l'approbation initiale.

• Les approbations de prêts hypothécaires sur des *logements neufs* ou des *logements existants* comprennent les prêts LNH et les prêts hypothécaires ordinaires, mais ne concernent pas les approbations de prêts LNH relatives aux places de foyer. • Les approbations de prêts de la *SCHL* comprennent tous les prêts en vertu de l'article 58 de la Loi nationale sur l'habitation (LNH) et des programmes spéciaux à l'intention des personnes à faibles revenus. • Les *sociétés de prêt et autres sociétés* comprennent, entre autres, les associations fraternelles ou de secours mutuel et les banques d'épargne du Québec. • Les *achats ou ventes de créances hypothécaires LNH* ne tiennent compte que de la première opération dans chaque cas.

H12

Source : Statistique Canada

Ces données sont tirées de la publication de Statistique Canada intitulée «L'indice des prix à la consommation», n° de catalogue 62-001. En octobre 1978, la pondération d'après la structure des dépenses en 1967, qui était utilisée depuis mai 1973, a été remplacée par une autre fondée sur la structure des dépenses en 1974. En octobre également, la classification des produits couverts par l'indice a été mise à jour et certaines composantes ont été recalculées, dans la plupart des cas, à partir de 1971. À partir d'avril 1982, les pondérations utilisées dans le calcul de l'indice reposent sur la répartition des dépenses de consommation en 1978. En février 1983, après la publication des données de l'indice des prix à la consommation pour janvier 1983, l'ancienne

in a purely arithmetic operation from 1971 to 1981 = 100. Further information on these revisions, as well as on the concepts and methodology, may be obtained from Statistics Canada publications.

Effective October 1978, Statistics Canada discontinued publication of all previous seasonally adjusted growth rates. The percentage changes shown in Column 15 of Table A1 prior to October 1978, therefore, are the discontinued growth rates and those beginning in October 1978 are the rates published by Statistics Canada in Catalogue 62-001.

H13

Sources: Statistics Canada, Labour Canada

Data are compiled mainly from Statistics Canada publications. The series on wage settlements are published by the Department of Labour, except for settlements in manufacturing prior to 1965 which are based on tabulations by the Bank of Canada.

- The *aggregate industry selling price index* represents a gross-weighted aggregation of selling price indexes for 99 manufacturing industries.
- The *raw materials price index* measures the change in price of raw materials purchased by Canadian industry.
- Data on *wage settlements* represent the average annual percentage increase in base rates over the term of the agreement in settlements negotiated during the period shown by bargaining units covering 500 or more employees. Contracts with COLA clauses are excluded. Coverage extends to all industries but prior to 1983 the construction industry was excluded. The average is obtained by weighting individual settlements by the number of employees affected. Prior to 1967, the series are based on the simple annual average of the total increase over the life of the contract; from 1967 on, the increases are compounded annually.
- *Average hourly earnings* are compiled from the Statistics Canada publication "Employment, Earnings and Hours", Catalogue 72-002. The earnings estimates are produced from a survey of establishments. The data cover hourly rated wage-earners and reflect gross payments before deductions are made for taxes, unemployment insurance, etc. The data include over-time pay, vacation pay, cost-of-living allowances, etc.
- *Average weekly earnings* are also drawn from Catalogue 72-002. The data cover wage-earners and salaried employees and are obtained by dividing total payrolls by the number of employees.
- Indexes of *labour income, wages and salaries* and of *profits per unit of output* have been calculated by the Bank of Canada from Statistics Canada data. Labour income per unit of output is obtained by dividing total labour income plus military pay and allowances less wages and salaries in agriculture by non-farm gross domestic product. Non-farm commercial wages and salaries per unit of output is obtained by dividing total wages and salaries less wages and salaries in agriculture, public administration and non-commercial services by commercial non-farm gross domestic product. Manufacturing wages and salaries per unit of output is obtained by dividing manufacturing wages and salaries by gross manufacturing output. Non-farm commercial profits per unit output is obtained by dividing GNP corporate profits by commercial non-farm gross domestic product.

H14

Sources: Statistics Canada, Labour Canada

Data are compiled mainly from Statistics Canada. The number of man-days lost through labour disputes, however, are obtained from the Department of Labour. The series shown represent various economic indicators that have not been included in other tables.

- The *index of industrial production* includes mines, quarries and oil wells, manufacturing, and electric power, gas and water utilities.
- The *manufacturers' inventories, shipments and orders* figures are monthly projections of annual census of manufacturing data based on returns from a representative sample of manufacturing establishments. The figures are subject to revision when census benchmark data become available. Unfilled orders

année de base, soit 1971, a été remplacée par 1981; les opérations effectuées ont été purement arithmétiques. On trouvera dans les publications de Statistique Canada de plus amples renseignements sur ces révisions ainsi que sur les concepts et la méthodologie utilisés.

Depuis octobre 1978, Statistique Canada ne publie plus de taux désaisonnalisés d'augmentation des prix. Les taux de variation reproduits à la colonne 15 du Tableau A1 pour les périodes antérieures à octobre 1978 sont donc des chiffres que Statistique Canada a cessé de publier. Les données de la période commençant en octobre 1978 sont extraites de la publication n° 62-001 de Statistique Canada.

H13

Sources : Statistique Canada, Travail Canada

Ces données sont tirées principalement de différentes publications de Statistique Canada. Toutefois, les séries relatives aux accords salariaux sont fournies par le ministère du Travail depuis 1965, sauf les séries relatives aux accords dans les industries manufacturières antérieurement à 1965, qui ont été dérivées de données recueillies par la Banque du Canada.

- L'*indice des prix de vente dans l'industrie* représente une moyenne des prix de vente de 99 industries manufacturières, après pondération brute.
- L'*indice des prix des matières premières* enregistre la variation des prix des matières premières achetées par les industries canadiennes.
- Les données relatives aux *accords salariaux* représentent les taux annuels moyens d'augmentation des salaires de base pendant la durée des accords. La moyenne retenue est celle qui ressort des accords négociés pour le compte de groupes d'au moins 500 employés, au cours de la période indiquée. Les accords assortis de clauses de vie chère ne sont pas compris dans les données. Depuis 1983, ces séries comprennent tous les secteurs. Auparavant, le secteur de la construction était exclu. Les moyennes ont été obtenues par pondération des augmentations par le nombre d'employés intéressés dans chaque cas. Avant 1967, ces séries étaient élaborées à partir de simples moyennes actuelles des augmentations prévues sur la durée des conventions; depuis 1967, on utilise des moyennes actuarielles.
- Les données relatives aux *gains horaires moyens* sont compilées à partir de la publication de Statistique Canada «Emploi, gains et durée du travail», n° de catalogue 72-002. Les estimations des gains sont produites à partir d'une enquête sur les établissements. Elles se limitent aux employés rémunérés à l'heure et elles sont brutes, c'est-à-dire avant les retenues fiscales, l'assurance-chômage, etc. Elles comprennent notamment les heures supplémentaires, les gratifications de vacances, les indemnités de vie chère.
- Les *gains hebdomadaires moyens* sont également tirés du n° de catalogue 72-002. Les données portent sur les salariés et les employés; on les obtient en divisant la masse salariale par le nombre d'employés.
- Les indices du *revenu du travail* et des *bénéfices par unité produite* ont été calculés par la Banque du Canada à partir des données de Statistique Canada. Les gains des ouvriers par unité produite sont calculés de la façon suivante : à l'ensemble des gains des employés, on ajoute la solde et les allocations des militaires, puis on soustrait les salaires et traitements des agriculteurs; on divise le résultat ainsi obtenu par le produit intérieur brut, secteur agricole exclu. Les salaires et traitements par unité produite dans les entreprises non agricoles sont calculés en divisant l'ensemble des salaires et traitements moins les salaires et traitements versés aux employés dans l'agriculture, l'administration publique et les services non commerciaux par la production brute du secteur. Les salaires et traitements par unité produite des ouvriers dans les industries manufacturières sont calculés en divisant les salaires et les traitements payés dans ces industries par la production brute de celles-ci. Les bénéfices par unité produite des entreprises commerciales, agriculture exclue, sont calculés en divisant le montant global des bénéfices de ces entreprises, qui figure dans le PNB, par leur production brute.

H14

Sources : Statistique Canada, Travail Canada

Ces données proviennent surtout de Statistique Canada. Toutefois, le nombre de journées-hommes perdues par suite de conflits du travail provient du ministère du Travail. Ces séries se rapportent à divers indicateurs économiques qui n'ont pas été inclus dans d'autres tableaux.

- L'*indice de la production industrielle* concerne les mines, les carrières et les puits de pétrole; la production manufacturière; l'électricité, le gaz et l'eau fournis par des services d'utilité publique.
- Les *stocks, expéditions et carnets de commandes des fabricants* sont des projections mensuelles, faites à partir de données extraites des déclarations d'un groupe représentatif d'entreprises lors des recensements annuels des entreprises manufacturières. Ces estimations sont sujettes à révision, dans la mesure où les recensements fournissent des données de

represent the value of orders received but not shipped at the end of the period. Owned inventories exclude inventories financed by progress payments.

- *Average hours worked per week in manufacturing* are based on reports for the last pay period of the month from firms with establishments having 20 or more employees. The data cover hourly rated wage-earners; the averages are obtained by dividing total weekly man-hours by the total number of wage-earners.
- *Man-days lost through labour disputes* are based on estimates of the number of man-days lost directly as a result of strikes or lockouts. Workers indirectly affected, such as those laid off as a result of a work stoppage, are not included.
- *Total labour income* consists of compensation paid to employees as wages and salaries or as supplementary labour income.
- *Farm cash income* consists of gross cash receipts by farmers from the sale of agricultural products, including any subsidies and supplementary payments. Newfoundland is not included.
- *Retail trade* figures refer to aggregate sales by retail outlets; direct sales to consumers that bypass the retail outlet are not included. In the table, sales by new and used car dealers have been subtracted from total retail sales.
- *Total passenger car sales* include the sales of cars manufactured overseas and imported fully assembled. North American models are defined to include all cars, including "foreign" cars, assembled on this continent.
- Data on *building permits* cover the value of permits issued for industrial and commercial buildings and are based on reports by all municipalities issuing permits.

I1

Source: Bank of Canada

- *U.S. dollar exchange rates* refer to rates prevailing on the interbank market in Canada; on 5 March 1973 the form of quotation was changed from fractions to decimals.
- Prior to 1 January 1980 the U.S. dollar noon rate of exchange was based on rates prevailing in the interbank market at noon, Ottawa time. Thereafter, it is a weighted average, based on consideration of both volume of business and rates in the market in a short period just before and after noon.
- The *3-month forward spread* is the premium or discount (–) relative to spot rates on the forward portion of swap transactions.
- *Other currencies exchange rates* are based on nominal quotations in terms of U.S. dollars, converted into Canadian dollars at noon, Ottawa time. Monthly averages of noon exchange rates are also available on the Cansim system for the 90-day forward U.S. dollar (B3401), and the spot Belgian franc (B3402), Danish krone (B3403), Italian lira (B3406), Netherlands guilder (B3408), Norwegian krone (B3409) and Swedish krona (B3410).
- *SDR* Prior to July 1974 the U.S. dollar value of the Special Drawing Right (SDR) was based on the par value of the dollar; from 1 January 1970 1 SDR = U.S.\$1.00; from 18 December 1971 1 SDR = U.S.\$1.08571; and from 12 February 1973 1 SDR = U.S.\$1.20635. Beginning 1 July 1974 the SDR was valued on the basis of a weighted average of the market values of 16 major currencies. Effective 1 January 1981 the number of currencies included in the calculation was reduced to five.
- The *Canadian dollar index against G-10 countries* is a weighted geometric average of the exchange value of the Canadian dollar against major foreign currencies. For more detail on the currencies, weights and methodology, see the article published in the September 1984 issue of the Review.

Daily and weekly average series of the exchange rates that are on the Cansim system may be obtained from Data Control, Research Department, Bank of Canada, Ottawa.

base plus précises. Les commandes en carnet représentent la valeur des commandes reçues, mais non expédiées à la fin de la période. Ne sont pas compris dans les stocks des fabricants ceux dont le financement est assuré en cours de fabrication par des acomptes.

- *Les moyennes hebdomadaires des heures de travail dans les industries manufacturières* sont celles des employés rémunérés à l'heure, d'après les déclarations des établissements employant 20 salariés ou plus lors de la dernière paie du mois; ces moyennes sont obtenues en divisant la somme des heures de travail fournies au cours de la semaine par le nombre de salariés.
- *Les journées-hommes perdues par suite de conflits du travail* sont des estimations du nombre de journées-hommes perdues en conséquence directe de grèves ou de lock-out. En sont exclus les chiffres relatifs aux travailleurs touchés indirectement, par exemple les ouvriers mis à pied par suite d'arrêts du travail.
- *Le revenu total du travail* comprend les rémunérations versées aux employés à titre de traitements ou de salaires et les revenus supplémentaires liés à leur emploi.
- *Le revenu en espèces des agriculteurs* comprend les recettes brutes en espèces tirées par les agriculteurs de la vente de produits agricoles, ainsi que les subventions et les paiements complémentaires; le poste ne comprend pas les données relatives à Terre-Neuve.
- *Le commerce de détail* comprend l'ensemble des ventes des détaillants; les ventes faites directement aux consommateurs sans l'entremise de détaillants sont exclues. Ont été soustraites de l'ensemble des ventes, les ventes d'automobiles effectuées par les concessionnaires et les marchands de voitures d'occasion.
- *Les ventes totales de voitures particulières* comprennent, outre les voitures nord-américaines, les voitures construites outre-mer et importées tout assemblées. Les voitures nord-américaines comprennent toutes celles qui ont été assemblées sur notre continent, même lorsqu'il s'agit de marques étrangères.
- *Les permis de construire* représentent la valeur des constructions industrielles et commerciales pour lesquelles des permis ont été émis, d'après les déclarations reçues de toutes les municipalités qui émettent ces permis.

I1

Source : Banque du Canada

- Par *cours du dollar É.-U.*, on désigne le cours de cette devise sur le marché interbancaire au Canada; présenté précédemment sous forme fractionnaire, depuis le 5 mars 1973, il figure sous forme décimale.
- Avant le 1^{er} janvier 1980, le taux de change du dollar É.-U. obtenu à midi était fixé en fonction des taux en vigueur sur le marché interbancaire à midi, heure d'Ottawa. Depuis, ce taux consiste en une moyenne pondérée fixée tant en fonction du volume d'opérations boursières qu'en fonction des taux pratiqués sur le marché dans un court laps de temps immédiatement avant et après midi.
- *Le report ou déport (–) à 3 mois* représente la différence entre le cours au comptant et le cours à terme dans les opérations de swap.
- *Les cours des autres monnaies* ont été obtenus par conversion en dollars canadiens, au cours à midi, heure d'Ottawa, du cours nominal de chaque monnaie exprimé en dollars É.-U. On peut également se procurer auprès du fichier Cansim les moyennes mensuelles des taux de change à midi des devises suivantes : à terme, le dollar É.-U. à 90 jours (B3401); au comptant, le franc belge (B3402), la couronne danoise (B3403); la lire italienne (B3406), le florin néerlandais (B3408), la couronne norvégienne (B3409) et la couronne suédoise (B3410).
- *DTS*. Jusqu'en juillet 1974 le droit de tirage spécial (DTS) était évalué par rapport au dollar américain. Du 1^{er} janvier 1970 au 18 décembre 1971, il valait \$É.-U. 1.00; du 18 décembre 1971 au 12 février 1973, \$É.-U. 1.08571; du 12 février 1973 au 1^{er} juillet 1974, \$É.-U. 1.20635. À partir du 1^{er} juillet 1974, la valeur du DTS avait été établie d'après la moyenne pondérée des cours de seize grandes monnaies. Depuis le 1^{er} janvier 1981, le nombre de monnaies utilisées dans ce calcul est de cinq.
- *L'indice des cours du dollar canadien vis-à-vis des devises du G-10* est une moyenne géométrique pondérée des cours du dollar canadien vis-à-vis des grandes monnaies étrangères. Pour plus de renseignements sur les monnaies, leurs pondérations respectives et la méthode utilisée, consulter l'article publié dans la livraison de septembre 1984 de la Revue.

Les moyennes journalières et hebdomadaires des taux de change fournies par le fichier Cansim peuvent être obtenues sur demande adressée au Contrôle des données, département des Recherches, Banque du Canada, Ottawa.

I2

Sources : Department of Finance Canada, Bank of Canada

In accordance with IMF practice, the data in this table are expressed in Special Drawing Rights (SDRs).

• The *Special Drawing Account* was established on 1 January 1970, when the first allocation of Special Drawing Rights (SDRs) was made. Additional allocations were made by the IMF on 1 January in 1971, 1972, 1979, 1980 and 1981. • A country's *quota in the General Account* determines its voting power in the Fund and the scale of its access to the Fund's resources. Canada's quota was initially set at the equivalent of SDR 300 million in February 1947; subsequent increases in members' quotas have brought Canada's quota up to SDR 2,035.5 million or 3.4 per cent of total subscriptions to the Fund. • *Notes held under outstanding IMF borrowing* comprise loans by Canada to the IMF under the General Arrangements to Borrow (GAB), the Oil Facility or the Supplementary Financing Facility as well as Canada's direct transactions with other countries in notes issued under either facility. Canada has undertaken to lend up to a maximum of Can. \$216.2 million under the GAB, a maximum of Can. \$300.0 million under the Oil Facility and a maximum of SDR 200 million under the Supplementary Financing Facility. • There is a *use of IMF credit* whenever, as a result of a drawing by Canada of other members' currencies, the Fund's holdings of Canadian dollars exceed the amount of Canada's quota. The use of IMF credit is thus equal to IMF holdings of Canadian dollars minus Canada's quota. • There is a *reserve position in the IMF* whenever the Fund's holdings of Canadian dollars are less than Canada's quota. When there are outstanding Canadian loans, this adds to the reserve position. The reserve position in the IMF represents the amount of foreign exchange which Canada is entitled to draw from the Fund on demand for balance of payments purposes. The U.S. dollar equivalent of this amount is included in Canada's official international reserves (Table I2). • *Transactions in the General Account*. The total of these transactions produces the net change in the use of IMF credit or reserve position in the IMF. • *Other net Canadian transactions with the IMF* include subscription payments in gold (the equivalent of SDR 47.5 million in May 1966 and SDR 90.0 million in December 1970) and IMF dividend and interest payments to Canada.

I3

Sources : Department of Finance Canada, Bank of Canada

Data are based on the definition of Canada's official international reserves given in the press statements of the Minister of Finance on 3 February 1970 and 2 June 1972. Prior to May 1972, SDRs and Canada's reserve position in the IMF were valued at 1SDR = U.S.\$1.00; they were revalued to U.S.\$1.08571 in May 1972 and to U.S.\$1.20635 in October 1973. Since July 1974 these assets have been valued on the basis of the month-end value of the SDR in terms of the U.S. dollar as determined by the IMF.

• *Convertible foreign currencies* comprise the holdings of the Exchange Fund Account, the Receiver General for Canada and the Bank of Canada. • *Holdings of currencies other than U.S. dollars* were valued at their official parity or central rates until May 1973 but have since then been valued at their month-end market closing rates. • *Gold holdings* were revalued from U.S.\$35 to U.S.\$38 per fine ounce in May 1972 and to U.S.\$42.2222 in October 1973. Since July 1974 gold has been valued on the basis of SDR 35 per fine ounce and the month-end value of the SDR in terms of the U.S. dollar. • *Canada's holdings of Special Drawing Rights* include allocations to Canada of SDRs at the first of the year as follows: 1970—U.S.\$124.3 million, 1971—U.S.\$117.7 million, 1972—U.S.\$116.6 million, 1979—U.S.\$183.9 million, 1980—U.S.\$186.5 million, 1981—U.S.\$176.5 million. They also reflect transactions involving Canada under the arrangements by the IMF providing for the use of SDRs by member countries and by the IMF. • The *reserve position in the IMF* is the amount of foreign exchange that Canada is entitled to draw from the Fund on demand for balance of payments purposes.

I2

Sources : Ministère des Finances Canada, Banque du Canada

Conformément à l'usage établi au FMI, les données de ce tableau sont exprimées en DTS.

• Le Compte de tirage spécial a été ouvert le 1^{er} janvier 1970, date de la première allocation de DTS. D'autres allocations ont été effectuées par le FMI les 1^{er} janvier 1971, 1972, 1979, 1980 et 1981. • La *quote-part* de chaque pays au *Compte général* détermine le nombre de voix dont le pays dispose au FMI et le montant des crédits qu'il peut obtenir du FMI; à l'origine, en février 1947, la quote-part du Canada a été fixée à l'équivalent de 300 millions de DTS. Les quotes-parts ont été augmentées par la suite et celle du Canada est actuellement de 2 035.5 millions de DTS, soit 3.4 % du total souscrit. • L'*encours des billets représentatifs de créances sur le FMI* comprend les prêts accordés à ce dernier par le Canada dans le cadre des Accords généraux d'emprunt (AGE), du mécanisme pétrolier ou de la facilité de financement supplémentaire ainsi que le résultat des opérations directes du Canada avec d'autres pays sur des billets émis en vertu de l'une ou de l'autre de ces formules. Le Canada s'est engagé à prêter un montant maximal de 216.2 millions de dollars canadiens, de 300 millions de dollars canadiens et de 200 millions de DTS respectivement, dans le cadre des AGE, du mécanisme pétrolier et de la facilité de financement supplémentaire. • Il y a *recours au crédit du FMI* lorsque, par suite de tirages effectués par le Canada dans la monnaie d'autres pays membres, les avoirs du Fonds en monnaie canadienne excèdent la quote-part du Canada. • Le Canada a une *position de réserve au FMI* lorsque les avoirs du Fonds en dollars canadiens sont inférieurs à la quote-part du Canada. Tout prêt accordé au Fonds par le Canada augmente d'autant la position de réserve. La position de réserve représente le montant des tirages en monnaies étrangères que le Canada peut effectuer sur le Fonds sur simple demande, pour les besoins de sa balance des paiements. L'équivalent de ce montant en dollars É.-U. est compris dans les réserves canadiennes officielles de liquidités internationales (Tableau I2). • *Opérations portées au Compte général*. L'ensemble de ces opérations se traduit par une variation nette, soit des crédits du FMI au Canada, soit de la position de réserve du Canada au FMI. • *Autres opérations du Canada avec le FMI (solde net)*. Cette rubrique comprend notamment les versements effectués en couverture de la souscription-or (l'équivalent de 47.5 millions de DTS en mai 1966 et de 90 millions de DTS en décembre 1970) et les dividendes et intérêts versés au Canada par le FMI.

I3

Sources : Ministère des Finances Canada, Banque du Canada

Ces données sont établies d'après la définition des réserves officielles de liquidités internationales énoncée dans les communiqués du ministre des Finances en date du 3 février 1970 et du 2 juin 1972. Avant le mois de mai 1972, les avoirs en DTS et la position de réserve du Canada au FMI étaient évalués sur la base de la parité entre le DTS et le dollar É.-U. En mai 1972, la base d'évaluation est passée à \$É.-U. 1.08571, puis en octobre 1973, à \$É.-U. 1.20635. Depuis juillet 1974, ces avoirs sont évalués sur la base de la valeur en fin de mois du DTS par rapport au dollar américain, laquelle est déterminée par le FMI.

• Les *monnaies étrangères convertibles* sont les devises convertibles détenues par le Fonds des changes, par le Receveur général du Canada et par la Banque du Canada. • Les *monnaies convertibles autres que les dollars É.-U.* sont évaluées à leur parité ou taux central officiels jusqu'en mai 1973, mais elles sont évaluées depuis à leur cours de clôture en fin de mois. • *Or*. La base d'évaluation de ces avoirs est passée, en mai 1972, de \$É.-U. 35 à \$É.-U. 38, puis, en octobre 1973, à \$É.-U. 42.2222. Depuis juillet 1974, l'or est évalué sur la double base de 35 DTS l'once de fin et du cours du DTS par rapport au dollar É.-U. à la fin du mois. • Les *droits de tirage spéciaux* détenus par le Canada représentent les droits attribués par le FMI au Canada, en début d'année, soit 124.3 millions de dollars É.-U. en 1970, 117.7 millions en 1971, 116.6 millions en 1972, 183.9 millions en 1979, 186.5 millions en 1980 et 176.5 millions en 1981. Leur montant traduit également le résultat des opérations touchant le Canada et effectuées dans le cadre des dispositions du FMI relatives à l'utilisation des DTS par le Fonds lui-même ou par des pays membres. • La *position de réserve au FMI* équivaut au montant du tirage en monnaies étrangères que le Canada pourrait effectuer sur le FMI, sur simple demande, pour les besoins de sa balance des paiements.

J1-J3

Source: Statistics Canada

Data in general are drawn from the Statistics Canada publication “Quarterly Estimates of the Canadian Balance of International Payments.” The Cansim numbers listed in Table J2 yield data which are seasonally adjusted at quarterly rates rather than the annual rates shown in the table. A minus sign indicates a debit balance or an outflow of capital from Canada. Undistributed profits of foreign-owned enterprises in Canada are not included in current account payments or in direct investment in Canada. Similarly, undistributed profits of Canadian-owned enterprises abroad are not included in current account receipts or in direct investment abroad. Such undistributed profits, however, are elements in Canada’s net balance of international indebtedness. From the second quarter of 1968, transactions in non-monetary gold between Canadians and non-residents are included with commodity transactions and resident holdings of gold in Canada are no longer considered a foreign asset.

- *Merchandise exports* and *merchandise imports* have been adjusted to make them consistent with the measures of other elements of the balance of payments in terms of timing, valuation and coverage.
- *Balance on current account by area* (Table J1) prior to the second quarter of 1968 excluded gold production available for export which had not been allocated on a bilateral basis; this was included in the total for all countries.
- *Other OECD* includes Australia, Austria, Finland, Iceland, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland and Turkey.
- *Other EEC* includes Belgium, Denmark, Federal Republic of Germany, France, Greece, Ireland, Italy, Luxembourg, and the Netherlands. In Table J2, gold production available for export is included in “other services” receipts.
- *Other long-term capital* (Table J3) comprises net long-term export credits extended by Canada directly or indirectly under guarantee or at the risk of the Government of Canada, long-term bank loans, mortgage loans, stretch-out payments under uranium contracts, transfers of funds by insurance companies and payments under the Columbia River Treaty.
- *Other short-term capital movements* (Table J3) reflect the change in foreign currency bank borrowing by Canadians, chartered bank Canadian dollar claims on non-residents and accounts receivable and payable.
- *Net errors and omissions* apply to both current and capital accounts.
- *Net official monetary movements* include changes in official international reserve assets and changes in official monetary liabilities.

J4-J9

Sources: Statistics Canada, Bank of Canada

For more details see “Technical note: Revisions to the merchandise trade tables”, Bank of Canada Review, January 1985. Data in these tables are all adjusted for seasonality and balance of payments purposes by Statistics Canada. Balance of payments adjustments aim at placing trade data on a basis consistent with the measures of other elements of the balance of payments in terms of coverage, valuation and timing. Where possible, these adjustments are made at the level of individual commodities. The Cansim series, identified by the numbers at the top of columns in Table J4, provide data that are seasonally adjusted at quarterly rates rather than the annual rates shown in the table. The Cansim numbers in other tables yield data seasonally adjusted at annual rates as shown in the tables.

- *Other EEC* in Table J4 includes the original member countries of the European Economic Community, i.e., Belgium, France, Federal Republic of Germany, Italy, Luxembourg and the Netherlands; Ireland and Denmark (effective January 1973), and Greece (effective January 1981); the United Kingdom is not included.
- *Other OECD* comprises Australia, Austria, Finland, Iceland, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland and Turkey.
- With the publication of data for the second quarter of 1975, the reference period for *prices* and *volumes* for merchandise exports and imports was changed from 1961=100 to 1971=100. At the same time the weighting system was altered to correspond with the

Source : Statistique Canada

Ces données sont extraites en général de la publication de Statistique Canada intitulée : «Estimations trimestrielles de la balance canadienne des paiements internationaux». Les données du fichier Cansim reproduites au Tableau J2 sont exprimées en chiffres trimestriels plutôt qu’en chiffres annuels, comme indiqué à ce tableau. Le signe (—) traduit un solde déficitaire ou une sortie de capitaux. Les bénéfices non répartis des entreprises étrangères établies au Canada ne figurent ni à la balance des paiements courants ni au poste des *Investissements directs au Canada*. De même, les bénéfices non répartis des entreprises canadiennes à l’étranger ne figurent pas dans les paiements courants ni au poste des *Investissements directs à l’étranger*. Toutefois, dans les deux cas il est tenu compte de ces bénéfices dans la balance canadienne de l’endettement envers l’étranger. À partir du deuxième trimestre de 1968, les transactions sur or non monétaire entre résidents canadiens et non-résidents sont comprises dans les transactions sur marchandises, et les avoirs en or que les résidents détiennent au Canada ne sont plus assimilés aux avoirs extérieurs.

- Les données des postes *Exportations* et *Importations* ont été corrigées de façon à pouvoir être comparées aux chiffres d’autres éléments de la balance des paiements; ces corrections concernent la chronologie des transactions, leur évaluation et le champ couvert par elles.
- Jusqu’au deuxième trimestre de 1968, les *soldes des paiements courants par pays* (Tableau J1) ne tenaient pas compte de la production d’or frais destiné à l’exportation quand cet or ne pouvait être attribué spécifiquement à un pays; il était compris dans la colonne *Tous autres pays*.
- Les *autres pays de l’OCDE* comprennent l’Australie, l’Autriche, l’Espagne, la Finlande, l’Irlande, la Norvège, la Nouvelle-Zélande, le Portugal, la Suède, la Suisse et la Turquie.
- Le poste *Autres pays de la CEE* comprend la Belgique, le Danemark, la France, la Grèce, l’Irlande, l’Italie, le Luxembourg, les Pays-Bas et la République fédérale d’Allemagne. Au Tableau J2, l’or frais destiné à l’exportation est compris dans les recettes au titre des *autres services*.
- Les *autres capitaux à long terme* (Tableau J3) comprennent les crédits nets à long terme accordés à l’exportation par le Canada, directement ou indirectement, sous la garantie ou aux risques du gouvernement canadien, les prêts bancaires à long terme, les prêts hypothécaires, les versements échelonnés sur une longue période en vertu des contrats de ventes d’uranium, les transferts de capitaux des compagnies d’assurance et les paiements effectués conformément au traité relatif à l’aménagement du fleuve Columbia.
- Les *autres capitaux à court terme* (Tableau J3) comprennent la variation des prêts bancaires en monnaies étrangères à des résidents canadiens, celle des créances en dollars canadiens sur les non-résidents détenues par les banques à charte, celle des fournisseurs ou des clients.
- Les *erreurs et omissions nettes* concernent la balance des paiements courants et la balance des capitaux.
- La *variation nette des réserves monétaires officielles* comprend la variation des réserves officielles de liquidités internationales et la variation des engagements en devises des autorités monétaires.

J4 à J9

Sources : Statistique Canada, Banque du Canada

Pour plus de renseignements, consulter la «Note technique sur les révisions aux tableaux de la balance commerciale» publiée dans la livraison de janvier 1985 de la Revue de la Banque du Canada. Toutes les données de ces tableaux sont désaisonnalisées et ajustées pour les besoins de la balance des paiements par Statistique Canada. Les ajustements effectués visent à rendre les données de la balance commerciale comparables aux chiffres d’autres éléments de la balance des paiements et concernent le champ couvert par les transactions, leur évaluation et leur chronologie. Dans la mesure du possible, les données des divers postes de marchandises ont été ajustées séparément. Les séries du fichier Cansim, dont les numéros figurent au haut des colonnes du Tableau J4, fournissent des données qui ont été désaisonnalisées en fonction des taux trimestriels plutôt qu’en fonction des taux annuels indiqués aux tableaux.

- Le poste *Autres pays de la CEE* comprenait auparavant les pays fondateurs de la Communauté Économique Européenne, soit la Belgique, la France, l’Italie, le Luxembourg, les Pays-Bas et la République fédérale d’Allemagne; depuis janvier 1973, il comprend également l’Irlande et le Danemark et, depuis janvier 1981, la Grèce. Le Royaume-Uni n’est pas compris dans ces données.
- Les *autres pays de l’OCDE* sont l’Australie, l’Autriche, l’Espagne, la Finlande, l’Irlande, la Norvège, la Nouvelle-Zélande, le Portugal, la Suède, la Suisse et la Turquie.
- La publication des données du deuxième trimestre de 1975 a coïncidé avec un changement de l’année de base des indices de *prix* et de *volume* des exportations et des importations; ces indices, qui avaient pour base l’année 1961, ont maintenant pour base 1971. En même temps, on a modifié le système de pondération pour

system used to estimate Gross National Product at constant prices. The disaggregated price indexes in Tables J8 and J9 are calculated using a Paasche formula of current weights. For total imports and total exports, both Paasche and Laspeyres indexes are shown in Table J5. Laspeyres price indexes provide a better indication of true price movements since they are not affected by weight shifts.

- *Other exports and other imports* in Tables J6 and J7 comprise special transactions trade and unallocated balance of payments adjustments (arising, for example, out of the reconciliation of trade with the United States).

For more details, see "Technical note: Revisions to the merchandise trade tables", Bank of Canada Review, January 1985. Data in these tables are not adjusted for seasonality nor for balance of payments purposes. Commodity groupings are constructed from Trade of Canada data based on the Standard Commodity Classification, and are matched to those shown in Tables J6 and J7 in terms of coverage.

obtenir un système identique à celui qui sert à calculer les chiffres du produit national brut à prix constants. Les indices de prix partiels des Tableaux J8 et J9 sont produits à l'aide de la formule de Paasche, qui utilise des pondérations variables. C'est avec les indices de Paasche et de Laspeyres qu'on a établi les données de l'ensemble des importations et de l'ensemble des exportations, qui sont publiées au Tableau J5. Étant donné que les indices de Laspeyres ne tiennent pas compte des modifications des pondérations, ils permettent de mieux saisir les variations véritables des prix.

- Les postes *Autres exportations* et *Autres importations* des Tableaux J6 et J7 comprennent les transactions spéciales commerciales et les ajustements non répartis, par exemple ceux provenant de la conciliation des statistiques des échanges avec les États-Unis.

Cover:

Scotland: Alexander III silver penny

Scotland did not have its own coinage until the 12th century. The first denomination struck was a silver penny minted during the reign of David I, 1124-1153. The coin illustrated on the cover was minted more than a century later, during the reign of Alexander III. Alexander III was born at Roxburgh, Scotland on 4 September 1241 and in 1249, when he was seven, he succeeded his father. His reign was a prosperous one, marked by cordial relations with the English. He died accidentally in 1286 at the age of forty-four when the horse he was riding went over a cliff in the darkness.

Alexander produced more coinage than any other Scottish mediaeval monarch. Indeed, eighteen mints were engaged in striking his first coinage. The silver penny illustrated on the cover is part of Alexander's second coinage struck about 1280. Scottish coins closely resemble those of England in general design and quality of silver, and this penny is no exception. There are many similarities between Alexander's coinage and the recoinage of Edward I of England produced in 1279 — for example, the long cross on the reverse. However, unlike the English coins, Alexander's portrait is in profile and his second coinage does not identify the producing mint. Alexander III also introduced the silver half-penny and quarter-penny (farthing) to Scotland. At that time, a silver penny was a good sum of money, enough to purchase a chicken. The penny pictured on the cover is a thin coin about the same diameter as a Canadian one-cent piece and forms part of the National Currency Collection, Bank of Canada. Photography by James Zagon, Ottawa.

Couverture :

Écosse : Penny d'argent d'Alexandre III

Ce n'est qu'au XII^e siècle que l'Écosse commença à battre sa propre monnaie. La première pièce frappée en Écosse est un penny d'argent émis sous le règne de David I^{er} (1124-1153). Le penny illustré sur la page couverture fut monnayé plus d'un siècle après, sous le règne d'Alexandre III. Né à Roxburg en Écosse, le 4 septembre 1241, Alexandre III succéda à son père en 1249, alors qu'il n'avait que sept ans. Sous son règne prospère, l'Écosse entretenait des relations cordiales avec l'Angleterre. Alexandre III mourut accidentellement à l'âge de 44 ans, par une nuit de 1286, lorsque son cheval tomba du haut d'une falaise.

Alexandre III fit battre davantage de monnaie que tous les autres monarques écossais du Moyen-Âge. En effet, il fallut faire appel à dix-huit ateliers monétaires pour frapper son premier monnayage. Le penny d'argent reproduit en couverture fait partie du second monnayage, qui date de 1280 environ. Les pièces écossaises sont très semblables aux pièces anglaises, tant pour ce qui est de la conception générale que pour ce qui est de la qualité de l'argent, et ce penny ne fait pas exception. Le monnayage d'Alexandre présente de grandes ressemblances avec le remonayage d'Edouard I^{er} d'Angleterre, frappé en 1279 : citons, à titre d'exemple, la croix longue qui figure au revers des deux séries de pièces. Remarquons toutefois que sur ce penny écossais le souverain est représenté de profil et qu'il n'est fait aucune mention de l'atelier monétaire, contrairement à l'usage sur les pièces d'Angleterre. Alexandre III a également introduit en Écosse le demi-penny en argent et le quart de penny (farthing, ou liard). À l'époque, un penny d'argent était une assez grosse somme puisqu'il permettait d'acheter un poulet. Le penny illustré est une pièce mince, d'un diamètre à peu près identique à celui d'une pièce canadienne d'un cent. Il fait partie de la Collection nationale de monnaies, Banque du Canada. Photographie : James Zagon, Ottawa.

Note on the modification of seasonal adjustment procedures

Remarques sur la modification de la méthode de désaisonnalisation

Beginning this month all seasonally adjusted financial data published in the Bank of Canada Review and the Weekly Financial Statistics have been re-estimated using a revised seasonal adjustment procedure. This procedure, known as the X-11 ARIMA method, was developed at Statistics Canada* and is used in the seasonal adjustment of its economic data. The underlying methodology remains basically the same as the Census Method II X-11 procedure which the Bank had previously used.

The X-11 ARIMA procedure improves the initial estimates of the seasonal factors for the most recent data† yet leaves the seasonal factors on past observations unchanged. As part of the process of estimating seasonal factors, both methods use the same weighted moving average technique in which the earlier and subsequent observations in the time series being adjusted are given smaller weights than the current observation. Near the end of a time series, where sufficient subsequent observations are unavailable, the Census Method II routine is forced to modify its estimation procedure in a manner that places greater than normal weight on the most recent available observations. The initial estimates of the seasonal factors for these observations are therefore not as good statistically as subsequent estimates made after additional years of data become available. What is different about the X-11 ARIMA

A compter de ce mois, toutes les données financières désaisonnalisées publiées dans la Revue de la Banque du Canada et dans le Bulletin hebdomadaire de statistiques financières seront calculées à l'aide d'une méthode révisée de désaisonnalisation. Cette méthode, dénommée X-11-ARMMI, a été mise au point par Statistique Canada* et sert à la désaisonnalisation des données économiques de cet organisme. La méthodologie retenue est essentiellement celle de la variante X-11 de la méthode II du Bureau de recensement des États-Unis, utilisée jusqu'à présent par la Banque.

La méthode X-11-ARMMI permet d'améliorer les premières estimations des facteurs de désaisonnalisation pour les observations les plus récentes†, mais elle n'a aucune incidence sur les facteurs de désaisonnalisation des observations passées. Dans les deux méthodes, le calcul des facteurs de désaisonnalisation se fait à l'aide de la même technique de moyennes mobiles pondérées, qui affecte, dans les séries chronologiques, les observations précédentes et subséquentes de pondérations plus faibles que la pondération dont est affectée l'observation courante. Vers la fin d'une série chronologique, lorsqu'on ne dispose pas de suffisamment d'observations pour la période qui suit, la méthode II du Bureau de recensement doit modifier sa technique d'estimation de manière à affecter les plus récentes observations d'une pondération supérieure à la normale. Les premières estimations des facteurs de désaisonnalisation de ces observations ne sont donc statistiquement pas aussi valables que les estimations faites par la suite, à l'aide des données observées au cours des années suivantes. Ce qui différencie

* A complete description of the X-11-ARIMA seasonal adjustment process is found in E.B. Dagum, *The X-11-ARIMA Seasonal Adjustment Method*, Cat. 12-564, Statistics Canada, 1983.

† In a short time series, the seasonal factors for the earliest data can also be improved using the procedure.

* Une description complète de la méthode de désaisonnalisation X-11-ARMMI se trouve dans la publication de Statistique Canada n° 12-564 intitulée « La méthode de désaisonnalisation X-11-ARMMI », par Estela Bee Dagum.

† Dans une série chronologique courte, les facteurs de désaisonnalisation pour les premières données peuvent également être améliorés grâce à cette méthode.

Questions regarding the seasonal adjustment procedures employed by the Bank of Canada should be addressed to the Department of Monetary and Financial Analysis.

Les questions relatives aux méthodes de désaisonnalisation employées par la Banque du Canada doivent être adressées au département des Études monétaires et financières.

NOTE: The seasonal factors in this table do not correspond to the published factors for net demand deposits as the latter are also adjusted for calendar effects.

NOTA : Les facteurs de désaisonnalisation figurant dans ce tableau ne correspondent pas aux facteurs publiés pour les données des dépôts à vue en chiffres nets car ces derniers facteurs ont été corrigés pour tenir compte des effets de calendrier.

modification is that an extrapolation technique* is used to provide additional data by artificially extending the time series. This extended time series is then submitted to the X-11 routine. With the additional data, less weight needs to be placed on the most recent available observations in estimating seasonal factors for that period and, as a result, the initial estimates for these factors are significantly improved.

X-11-ARMMI c'est l'utilisation d'une technique d'extrapolation* pour obtenir des données supplémentaires en prolongeant artificiellement les séries chronologiques. Ces séries prolongées sont alors désaisonnalisées au moyen de la technique X-11. Avec ces données supplémentaires, il n'est plus nécessaire d'accorder une pondération aussi forte aux plus récentes observations lorsqu'on estime les facteurs de désaisonnalisation pour cette période et les estimations initiales de ces facteurs sont donc sensiblement meilleures.

* This technique is a Box-Jenkins seasonal Autoregressive Integrated Moving Average (ARIMA) model, as developed by G.E.P. Box and G.M. Jenkins, *Time Series Analysis Forecasting and Control*, Holden-Day, San Francisco, 1970.

* Cette technique utilise un modèle saisonnier autorégressif à moyennes mobiles intégré (ARMMI) présenté par G.E.P. Box et G.M. Jenkins dans *Time Series Analysis Forecasting and Control*, Holden-Day, San Francisco, 1970.

The main advantages of X-11 ARIMA over the Census Method II variant are illustrated in the following example using net demand deposits.* Both procedures were applied to the data on these deposits, using time series ending in 1981, 1982, 1983 and 1984 successively. The resulting estimates of the seasonal factors for the year 1981 are compared in the accompanying table. Appreciable differences in the estimates generated by the two procedures are found only for the last three years of sample data (as well as for year-ahead forecasted factors).† The root mean squares of these differences indicate that the divergence between the two initial estimates of the 1981 seasonal factors virtually disappears with the addition of data to 1984. However, the root mean squared error between initial and final 1981 seasonal factor estimates for X-11 ARIMA is only half as large as the corresponding value for the Census Method II procedure. Therefore, X-11 ARIMA has produced better initial estimates of the 1981 seasonal factors for net demand deposits, and has also improved these factors proportionately more with additional years of data.

Pour faire ressortir les principaux avantages que présente X-11-ARMMI par rapport à la variante du Bureau de recensement, ces deux méthodes ont été appliquées à la série chronologique des dépôts à vue en chiffres nets*, en utilisant quatre périodes d'échantillonnage qui se terminent successivement en 1981, 1982, 1983 et 1984. Vous trouverez dans le tableau annexé une comparaison des estimations des facteurs de désaisonnalisation ainsi obtenues pour 1981. Les différences dans les estimations effectuées à l'aide de ces deux méthodes n'apparaissent de façon sensible que pour les trois dernières années de l'échantillon de données (ainsi que pour les facteurs prévus une année à l'avance)†. Les moyennes quadratiques de ces différences indiquent que la divergence entre les deux estimations initiales des facteurs de désaisonnalisation pour 1981 disparaît virtuellement avec l'ajout des données allant jusqu'en 1984. Toutefois, la racine de l'erreur quadratique moyenne entre les premières et les dernières estimations de ces facteurs calculée à l'aide de X-11-ARMMI ne représente que la moitié de la valeur correspondante obtenue au moyen de la méthode II du Bureau de recensement. La méthode X-11-ARMMI a donc produit de meilleures estimations initiales des facteurs de désaisonnalisation pour 1981 des dépôts à vue en chiffres nets et elle a également amélioré ces facteurs dans une plus large proportion au fur et à mesure de l'ajout d'années supplémentaires de données.

* Before applying the seasonal adjustment technique to it, this time series was adjusted for postal strikes and calendar effects as well as for the discontinuities arising from changes to the chartered bank statistical reporting system. For greater detail regarding these adjustments, see "Note on the use of the X-11 'Strike Option' in seasonally adjusting demand deposits at Canadian chartered banks", Bank of Canada Review, May 1977; "Note on seasonal adjustment of monthly currency and demand deposit statistics", Bank of Canada Review, March 1979; and, "Technical note: New and revised monetary and credit aggregates", Bank of Canada Review, March 1983.

† Minor differences remain for the earlier years because the X-11 ARIMA method contains improvements over the Census Method II X-11 program with respect to the measurement precision of the components' estimates. The X-11 ARIMA program also utilizes the information from the estimation procedure more efficiently than the Census Method II X-11 in evaluating the quality and reliability of the seasonal factor estimates.

* Avant d'être désaisonnalisée, cette série chronologique a été corrigée afin de tenir compte des grèves des services postaux et des effets du calendrier, ainsi que des ruptures découlant des changements apportés au système de relevés statistiques des banques à charte. Pour plus de détails sur ces corrections, veuillez consulter l'article publié dans la livraison de mai 1977 de la Revue de la Banque du Canada, intitulé «Remarques sur l'utilisation de l'option grève» du programme X-11 dans la désaisonnalisation des statistiques des dépôts bancaires à vue au Canada» ainsi que l'article publié dans la livraison de mars 1979 de la Revue intitulé «Remarques sur la désaisonnalisation des statistiques mensuelles de la monnaie et des dépôts à vue» et la «Note technique sur les nouveaux agrégats et les agrégats révisés de la monnaie et du crédit» publiée dans la livraison de mars 1983 de la Revue de la Banque du Canada.

Pour les premières années, quelques différences minimes demeurent, car la méthode X-11-ARMMI permet d'estimer avec plus de précision les composantes que ne le permet la variante X-11 de la méthode II du Bureau de recensement. Le programme X-11-ARMMI utilise également l'information obtenue au cours de l'estimation plus efficacement que ne le fait la variante X-11, lorsqu'il évalue la qualité et la fiabilité des estimations des facteurs de désaisonnalisation.

Bilingualism in the Bank of Canada

Le bilinguisme à la Banque du Canada

The Bank of Canada has recently released its report for 1984 on "Bilingualism in the Bank of Canada". This is the sixth annual report on bilingualism in the Bank. It outlines the progress made over the past year in implementing the Bank's bilingualism policies. Copies of the report are available on request from:

Public Information
Secretary's Department
Bank of Canada
OTTAWA, Canada

La Banque du Canada a publié récemment son rapport pour 1984 sur le bilinguisme. Ce rapport annuel, qui a pour titre «Le bilinguisme à la Banque du Canada» est le sixième que la Banque publie sur ce sujet. Cette publication décrit les progrès réalisés au cours de 1984 dans la mise en œuvre des politiques de la Banque en matière de bilinguisme. Les personnes qui désirent se procurer un exemplaire de ce rapport sont priées de s'adresser à la :

Studies undertaken for the Royal Commission on the Economic Union and Development Prospects for Canada

Études effectuées à la demande de la Commission royale sur l'union économique et les perspectives de développement du Canada

International Asset Substitutability Theory and Evidence for Canada

The authors were asked to undertake this study as part of the Economic Research Program of the Royal Commission on the Economic Union and Development Prospects for Canada. The study was prepared by Paul Boothe, Kevin Clinton, Agathe Côté and David Longworth of the International Department of the Bank of Canada. The views expressed are those of the authors; responsibility for them should not be attributed to the Bank of Canada.

* * *

The purpose of this study is twofold. First, the authors set out to establish the areas in which the efficacy of monetary, fiscal and foreign exchange market intervention policy under flexible exchange rates is affected by the degree of international substitutability among financial and real assets. Second, they attempt to determine from the available empirical evidence the degree of substitutability for Canadian assets and the resulting policy implications.

The study is not restricted to one theoretical model. The empirical evidence surveyed (supplemented at times with the authors' own estimates) is taken from estimates of various models.

The findings discussed here are fully consistent with the popular perception that the financial markets of Canada and the United States are closely integrated. The empirical results suggest that the mobility of

Substituabilité internationale des actifs Théorie et vérification empirique au Canada

Les auteurs ont été invités à entreprendre cette étude dans le cadre du programme de recherches en économie de la Commission royale sur l'union économique et les perspectives de développement du Canada. L'étude a été réalisée par Paul Boothe, Kevin Clinton, Agathe Côté et David Longworth, du département des Relations internationales de la Banque du Canada. Les opinions exprimées dans la présente étude sont celles des auteurs et ne traduisent pas nécessairement le point de vue de la Banque du Canada.

* * *

La présente étude poursuit un double objectif. Premièrement, elle vise à établir les domaines dans lesquels le degré de substituabilité internationale des actifs financiers et réels influence l'efficacité de la politique monétaire, de la politique budgétaire et de la politique d'intervention sur les marchés des changes en régime de changes flottants. Deuxièmement, elle tente de déterminer sur la base des résultats empiriques disponibles le degré de substituabilité des actifs canadiens et les implications de ce dernier en matière de politique économique.

L'étude ne se limite pas à un seul modèle théorique. Les résultats empiriques qui sont passés en revue, complétés de temps à autre par nos propres estimations, proviennent des estimations de différents modèles.

Les conclusions de la présente étude s'accordent parfaitement avec la perception générale selon laquelle les marchés financiers canadien et américain sont étroitement intégrés. Il ressort des résultats empiriques que la mobilité des capitaux entre le Canada et

capital across the Canada-U.S. border is high and that Canadian dollar and U.S. dollar assets are perceived to be close substitutes for one another. Indeed, except over the very short run, it is difficult to reject empirically the hypothesis that short-term Canadian and U.S. financial assets are perfect substitutes.

This high degree of substitutability of financial assets has important implications for the conduct of policy. In particular, the short-run effects of monetary policy on output and prices under flexible exchange rates are heightened, while the effects of fiscal and intervention policy are moderated. For the longer run, the implication is that real interest rates in Canada cannot vary substantially from those in the United States. Fiscal policy can play a useful role in stabilizing economic activity — even in the presence of perfect capital substitutability. Models that deny a short-run role for fiscal policy make extreme assumptions about the way expectations are formed and about wage and price flexibility.

For real capital assets (the stock of business fixed assets as opposed to financial assets) there is no strong evidence in favour of or against the perfect capital mobility hypothesis. The evidence is consistent with very low mobility in the short run and quite high, if not perfect, mobility in the long run. With less than perfect mobility, budget deficits would cause some crowding out of domestic investment as well as some reduction in the balance on current account.

This publication is available in both official languages. Persons wishing to receive copies should write to: Public Information Division, Secretary's Department, Bank of Canada, Ottawa K1A 0G9, stating language of preference.

les États-Unis est élevée et que les actifs libellés en dollars canadiens et en dollars américains sont perçus comme de proches substituts. De fait, sauf dans le très court terme, il est difficile de rejeter sur une base purement empirique l'hypothèse que les actifs financiers à court terme canadiens et les actifs américains correspondants sont parfaitement substituables.

La forte substituabilité des actifs financiers entraîne d'importantes conséquences pour la conduite des politiques. Par exemple les effets à court terme de la politique monétaire sur la production et les prix en régime de changes flottants sont renforcés, tandis que les effets de la politique budgétaire et d'intervention s'atténuent. Il en résulte qu'à long terme les taux d'intérêt réels au Canada ne peuvent pas s'écarter beaucoup des taux d'intérêt réels américains. Mais, même dans un contexte de substituabilité parfaite des capitaux, la politique budgétaire peut servir à stabiliser l'activité économique. Les modèles qui ne reconnaissent pas à la politique budgétaire au moins un rôle à court terme s'appuient sur des hypothèses trop restrictives concernant la formation des anticipations et la flexibilité des salaires et des prix.

Pour ce qui a trait aux actifs réels, c'est-à-dire les actifs immobilisés des entreprises par opposition aux actifs financiers, aucune preuve tangible ne permet de confirmer ni d'infirmer l'hypothèse de mobilité parfaite des capitaux. Les résultats empiriques indiquent que la mobilité des actifs est très faible à court terme mais assez forte, sinon parfaite, à long terme. Dans un contexte où la mobilité est moins que parfaite, un déficit budgétaire entraînerait l'éviction d'une partie des investissements intérieurs et une diminution du solde de la balance courante.

*Data for consumer credit balances are now shown on an average-of-month-ends basis where applicable.

* À partir de maintenant, les données de l'encours du crédit à la consommation sont des moyennes de fins de mois lorsqu'il y a lieu.

**Data revised — annual recalculation of seasonal factors.

**Données révisées — correction annuelle des coefficients de désaisonnalisation.

Special features of a number of issues are as follows:

- (a) Subject to partial redemption at par for the sinking fund on each interest payment date, commencing with 15 April 1965. The earliest call date is 15 October 1977.
- (b) This item represents the cancellation of securities held by purchase funds.
- (c) The earliest call date is 1 June 1978.
- (d) Callable after 15 September 1996.
- (e) On 18 March 1975 the Government of Canada announced that the 3% perpetual bonds will be redeemed at par on 15 September 1996.
- (g) Callable after 1 October 1984.
- (h) Callable after 1 April 1988.
- (i) Callable after 15 October 1988.
- (j) Callable after 20 March 1985.
- (k) Exchangeable on or before 14 December 1984 into an equal par value of 13³/₄%, 15 March 1990.
- (l) Exchangeable on or before 1 February 1985 into an equal par value of 13%, 1 May 1990.
- (m) Exchangeable on or before 29 June 1984 into an equal par value of 12¹/₂%, 1 October 1990.
- (n) Exchangeable on or before 1 November 1985 into an equal par value of 12¹/₂%, 1 February 1991.
- (o) Exchangeable on or before 1 May 1984 into an equal par value of 13³/₄%, 1 August 1989.
- (p) Exchangeable on or before 1 November 1984 into an equal par value of 13¹/₄%, 1 February 1990.
- (q) Exchangeable on or before 31 January 1986 into an equal par value of 14¹/₂%, 1 May 1991.
- (r) Exchangeable on or before 28 February 1986 into an equal par value of 15¹/₄%, 1 June 1993.
- (s) Exchangeable on or before 1 April 1986 into an equal par value of 14³/₄%, 1 July 1993.
- (t) Exchangeable on or before 30 June 1986 into an equal par value of 18%, 1 October 1991.
- (u) Exchangeable on or before 31 October 1986 into an equal par value of 15¹/₂%, 1 February 1992.
- (v) Exchangeable on or before 1 April 1987 into an equal par value of 15%, 1 July 1992.
- (x) Exchangeable on or before 1 June 1987 into an equal par value of 14¹/₄%, 1 September 1992.

Les renvois ci-dessous indiquent les particularités de certaines émissions :

- (a) Emprunt sujet à remboursement partiel par le fonds d'amortissement, au pair, aux dates d'échéance des coupons, à partir du 15 avril 1965; ne peut être remboursé intégralement par anticipation avant le 15 octobre 1977.
- (b) Annulation de titres détenus par le fonds de rachat.
- (c) Ces obligations ne peuvent être remboursées par anticipation avant le 1^{er} juin 1978.
- (d) Remboursables par anticipation après le 15 septembre 1996.
- (e) Le 18 mars 1975, le gouvernement canadien a annoncé que les rentes perpétuelles 3% seront remboursées à leur valeur nominale le 15 septembre 1996.
- (g) Remboursables par anticipation, après le 1^{er} octobre 1984.
- (h) Remboursables par anticipation, après le 1^{er} avril 1988.
- (i) Remboursables par anticipation, après le 15 octobre 1988.
- (j) Remboursables par anticipation, après le 20 mars 1985.
- (k) Échangeables, au plus tard le 14 décembre 1984, contre une valeur nominale égale d'obligation 13³/₄% échéant le 15 mars 1990.
- (l) Échangeables, au plus tard le 1^{er} février 1985, contre une valeur nominale égale d'obligation 13% échéant le 1^{er} mai 1990.
- (m) Échangeables, au plus tard le 29 juin 1984, contre une valeur nominale égale d'obligation 12¹/₂% échéant le 1^{er} octobre 1990.
- (n) Échangeables, au plus tard le 1^{er} novembre 1985, contre une valeur nominale égale d'obligation 12¹/₂% échéant le 1^{er} février 1991.
- (o) Échangeables, au plus tard le 1^{er} mai 1984, contre une valeur nominale égale d'obligation 13³/₄% échéant le 1^{er} août 1989.
- (p) Échangeables, au plus tard le 1^{er} novembre 1984, contre une valeur nominale égale d'obligation 13¹/₄% échéant le 1^{er} février 1990.
- (q) Échangeables, au plus tard le 31 janvier 1986, contre une valeur nominale égale d'obligation 14¹/₂% échéant le 1^{er} mai 1991.
- (r) Échangeables, au plus tard le 28 février 1986, contre une valeur nominale égale d'obligation 15¹/₄% échéant le 1^{er} juin 1993.
- (s) Échangeables, au plus tard le 1^{er} avril 1986, contre une valeur nominale égale d'obligation 14³/₄% échéant le 1^{er} juillet 1993.
- (t) Échangeables, au plus tard le 30 juin 1986, contre une valeur nominale égale d'obligation 18% échéant le 1^{er} octobre 1991.
- (u) Échangeables, au plus tard le 31 octobre 1986, contre une valeur nominale égale d'obligation 15¹/₂% échéant le 1^{er} février 1992.
- (v) Échangeables, au plus tard le 1^{er} avril 1987, contre une valeur nominale égale d'obligation 15% échéant le 1^{er} juillet 1992.
- (x) Échangeables, au plus tard le 1^{er} juin 1987, contre une valeur nominale égale d'obligation 14¹/₄% échéant le 1^{er} septembre 1992.

Millions of dollars, par valeur En millions de dollars, valeur nominale

*Users of these measures of capacity utilization are advised to refer to the discussion of them in the May 1980 issue of this Review "Measuring Capacity Utilization: A Technical Note". Particular attention should be paid to the discussion of how the data are to be evaluated and interpreted.

*Les utilisateurs des données des taux d'utilisation des capacités sont invités à se référer à l'étude qui a été publiée sur ce sujet dans la Revue de mai 1980 sous le titre : «Les méthodes d'estimation des taux d'utilisation des capacités». Il convient d'accorder une attention particulière à l'analyse de la façon dont il faut évaluer et interpréter ces données.
